## Chemicals - 2Q Review, Sector Outlook \& Top Picks

Overall volume growth remains subdued; medium-term growth story still remains intact...
The 2Q'20 earnings season turned out to be mixed for overall chemical companies with aggregate sales and EBITDA declining by $1.2 \%$ and $3.9 \%$ YoY, respectively, while PAT grew by $13.6 \%$ YoY as some of the companies adopted new tax rate. Sales decline was on account of correction in the crude oil prices by 17.5\% YoY and $9.6 \%$ QoQ and subdued demand in chemicals having exposure to automobile and agrochemicals segment, while sluggishness in profitability was partly on account of inventory loss owing to correction in product prices and subdued demand.
From our active coverage universe, Clariant Chemicals (India), Navin Fluorine International and Sudarshan Chemical Industries reported strong profitability by posting YoY EBITDA growth of 135.4\%, 33.7\% and $18.7 \%$, respectively. SRF continued to deliver strong performance in specialty chemicals business driven by strong exports. The chemicals segment (Refrigerants + Specialty chemicals) reported growth of $25.1 \%$ YoY to Rs 6.78 bn while EBIT grew by $107.8 \%$ YoY Rs 1.30 bn. Refrigerant witnessed growth of low single digit thereby indicating a very strong growth in specialty chemicals business. EBIT margins expansion of 770 bps YoY to $19.3 \%$ underlines this. Atul demonstrated its ability to shield most of the 1Q'20 gains into 2Q'20 and reported healthy EBITDA margins of $21.5 \%$. Aarti Industries' revenues were impacted by falling realisations, while EBITDA remained subdued due to tepid volume growth. However, while the absolute EBITDA was under pressure, the margins expanded on account of changing product mix with contribution from value-added down-stream products going up to $75.0 \%$ from $72.0 \%$. Gujarat Fluorochemicals registered weak performance owning to headwinds faced in PTFE segment on account of slowdown in the automobile segment and US-China Trade war impacting realisations. This coupled with declining caustic soda realisations dented EBITDA (down $34.7 \%$ QoQ). BASF India's performance continued to be subdued despite strong sales growth of $23.9 \%$ as profitability across segments remained under pressure.
In the passive coverage universe, the performance of companies operating in Chlor-Alkali segment was impacted by declining caustic soda realisation (rising imports) as well as high base. The impact was largest in Gujarat Alkalies and Chemicals and DCM Shriram.
Soda ash market continued to be balanced as Tata Chemicals' basic chemistry ( $62 \%$ of revenues) segment reporting subdued sales growth (muted domestic and Europe sales). Higher realisations in North American and Magadi coupled with declining energy costs resulted into EBIT margin expansion of 360 bps YoY.

Pigments and Dyes companies' performance was impacted by falling realisation as well as demand slowdown. Bodal Chemicals' revenues were impacted by declining product prices (on account of excess supply) as well as slowdown in the demand. Meghmani Organics reported decent revenue growth across segments led by volume growth while profitability remained under pressure across segments hit by falling realisations.

Deepak Nitrite reported strong set of numbers led by Performance Products segment (which was driven by higher DASDA realisation) and revenues from Phenolics. Performance was subdued on a sequential basis on account of maintenance shut down at the Phenol plant.

Companies operating in Amines chemistry reported subdued sales growth on account of poor realisations while PAT growth was supported by lower tax rate.
The performance of Rubber chemicals manufacturing companies' viz. Apcotex Industries, NOCIL and Phillips Carbon Black got impacted due to slowdown in the auto sector.

Among the specialty chemical companies, Galaxy Surfactants and Fine Organic and Industries reported margin expansion on account of richer product mix and benign raw material prices. Both also got benefited by lower tax rate. Vinati Organics reported subdued performance as sales of IBB and ATBS were impacted due to disturbance in user industry. Profitability too was under pressure sequentially due to poor operating leverage. S H Kelkar and Company reported subdued performance due to poor demand; however, raw material pressure have started to ease during the quarter. Neogen Chemicals continued to report strong performance led by higher capacity utilisation.

Sector outlook: Though the overall sectors performance remained subdued during $1 \mathrm{H}^{\prime} 20$, there were pockets of outperformance with six companies namely Atul, Clariant Chemicals (India), Sudarshan Chemical Industries, Alkyl Amines Chemicals, Deepak Nitrite and Neogen Chemicals delivering very healthy performance. While Atul and Deepak Nitrite continued to enjoy high profitability owing to higher than normal product prices, the other companies were benefited by lower base. The companies having exposure to automobile industry witnessed severe pressure while companies having exposure to agrochemicals were mixed (SRF delivered strong results, while Aarti's volume growth was tepid). The near-term outlook for the sector remains subdued owing to falling product prices and uncertain demand environment (largely attributable to automobile). However, we expect the pockets of outperformance to continue with companies having diversified exposure delivering healthy performance. The medium-term growth story for the sector remains intact with bulk of the capacity expansion getting commercialised by the end of FY20 or early FY21. We therefore continue to remain positive on the sector and remain selective in top picks. Atul and Aarti Industries remains our top picks.

## Atul

Key investment argument: Sensing opportunities arising out of China slowdown, Atul has been the first in the industry to expand capacities and incurred capex of Rs 8.0 bn in the last five years. It is now incurring further capex of $\sim$ Rs 4.0 bn which provides visibility and confidence to FY22E estimates. The capex is less than expected EBITDA for FY20. These projects once completed, at full capacity has potential to generate sales of $\sim$ Rs 7.0 bn . The bulk of these capex have been funded through internal cash accruals and Atul continues to remain a net cash company. Atul continues to enjoy dominant market share globally in some of its products, namely Para-Cresol, 2,4-D and Epoxies and has been benefiting from supply tightness arising out of China. We continue to remain positive on Atul from medium-term perspective as we expect the company to reap benefits of strong operating leverage in the next couple of years.
Maintain Buy with a target price of Rs 5,200. At the current market price of Rs 4,044 it is trading at 18.8xFY21E EPS of Rs 215.1 and 16.0x FY22E EPS of Rs 252.8.

## Aarti Industries

Key investment argument: We continue to remain positive on Aarti Industries as it remains one of the very few companies that provide earnings visibility beyond FY21E. The capex intensity continues unabated with the company going ahead with its planned capex of about Rs 10-12 bn in FY20E. It includes capex for two long-term contracts, chlorination and specialty chemical plant at Jhagadia, API and specialty chemicals de-bottlenecking at Vapi and Tarapur and one R\&D centre. ARTO has integrated capacities of their processes and therefore has flexibility to change its product mix according to the prevailing market conditions. This flexibility, over the years, has turned out to be a key strength and ARTO now intends to leverage these processes and optimise profitability.
Maintain Hold rating with a target price of Rs 910 . At the current market price of Rs 844 it is trading at $21.7 x$ FY21E EPS of Rs 38.8 and 18.5x FY22E EPS of Rs 45.6 .

## Chemicals: Quarterly trend

Below is the trend of 25 chemical companies over a few quarters. In 2QFY20, chemical companies have reported decline in Sales and EBITDA by $1.3 \%$ and $3.9 \%$ YoY while PAT grew by $13.6 \%$ YoY as some of the companies adopted new tax regime.

## Aarti Industries

## Maintain Hold

Reinstates guidance, ramp-up in dedicated plants remains key now... Aarti Industries (ARTO) is a chemical company, manufacturing benzene based intermediates that find application on various Agro chemicals, Pharma, Dyes and Polymer products. It ranks in the top 1-5 suppliers for most of its products and enjoys the status of being a strategic supplier.

## 2QFY20 performance

Aarti Industries (ARTO) consolidated sales and EBITDA declined by 18.8\% and $3.5 \%$ YoY to Rs 10.7 bn and Rs 2.54 bn, respectively, while PAT rose by $9.9 \%$ YoY to Rs 1.47 bn. The company has now provided the base numbers i.e. 2 Q'19 and $1 H^{\prime} 19$. The numbers are not comparable on YoY basis as the base quarter includes the performance from Home and Personal care business and does not include Nascent Chemicals numbers. The gross margins expanded by 810 bps YoY to $48.8 \%$, while EBITDA margins expansion was limited to 380 bps YoY as staff cost went up by $26.8 \%$ YoY to Rs 740 mn (this was on account of merger of Nascent Chemicals as well as hiring of new employees for upcoming projects).
Specialty Chemicals business EBIT grew by 5.3\% QoQ to Rs 2.13 bn and the margins expanded by 130 bps to $23.9 \%$. Pharmaceutical business EBIT grew by 5.3\% QoQ to Rs 337 mn and the margins expanded by 180 bps QoQ to $18.5 \%$. The changing product mix also contributed to margin expansion as contribution from Nitration and Chlorination products declined from $28 \%$ to $25 \%$ of sales.

Financial highlights

| Tax | 320 | 311 | $(2.7)$ | 365 | $(14.7)$ | 522 | 676 | 29.5 |
| Tax rate (\%) | 18.8 | 17.0 | - | 20.4 | - | 18.4 | 18.7 | - |
| Adjusted PAT | 1,343 | 1,476 | 9.9 | 1,381 | 6.8 | 2,244 | 2,857 | 27.3 |
| NPM (\%) | 10.1 | 13.7 | - | 12.2 | - | 9.1 | 12.9 | - |
| Adjusted EPS (Rs) | 16.5 | 16.9 | 2.5 | 15.9 | 6.3 | 27.6 | 32.9 | 19.1 |

Adjusted PAT grew by 9.9\% YoY to Rs 1.47 bn on the back of lower interest cost (down $39.9 \%$ YoY to Rs 311 mn ) and higher other income (up $7.5 x$ YoY to Rs 56 mn ) despite higher depreciation (up $9.5 \%$ YoY to Rs 457 mn ). The tax rate stood lower at $17.0 \%$ against $18.8 \%$ in 2QFY19.

## 1HFY20 performance

The company reported sales of Rs 22.1 bn, down $10.0 \%$ YoY. Gross margins expanded by 780 bps YoY to $47.8 \%$ while EBITDA margin expansion was restricted to 390 bps YoY to $22.8 \%$. This resulted into EBITDA growth of $8.7 \%$ YoY to Rs 5.0 bn. Higher other income by $576.5 \%$ YoY to Rs 81 mn and lower interest cost by $37.0 \%$ YoY to Rs 621 mn allowed the company to report PAT growth of $27.3 \%$ YoY to Rs 2.85 bn.

Long-term and short-term borrowings decreased by Rs 1.69 bn and Rs 1.28 bn, respectively, from March 2019. According to the cash flow statement, the loan repayment was about Rs 2.58 bn . Net cash inflow from operations was Rs 3.79 bn against Rs 2.3 bn in 1HFY19. Cash generation from operation improved on account of better cash cycle management. The company incurred a capex of Rs 5.1 bn against Rs 3.3 bn in 1HFY19.

## Outlook

Though, the management came back with specific growth guidance in $2 Q^{\prime} 20$, it was largely in line with our expectation and hence does not change our FY20 estimates. However, the management also indicated the ramp-up in the two dedicated plants could be lower as it would be the first year of operation even at the client end and therefore has guided for gradual ramp-up. We continue to remain positive on Aarti Industries as it remains one of the very few companies that provide earnings visibility beyond FY21E. The capex intensity continues unabated with the company going ahead with its planned capex of about Rs 10-12 bn in FY20. It includes capex for two long-term contracts, chlorination and specialty chemical plant at Jhagadia, API and specialty chemicals de-bottlenecking at Vapi and Tarapur and one R\&D centre. Maintain Hold rating with a target price of Rs 910.

## Concall highlights

- The production volumes for NCB and Nitro toluene were impacted on account of de-bottlenecking of the plant (from 75,000 mtpa to $108,000 \mathrm{mtpa}$ ) and shortage of nitric acid due to water supply cuts at Taloja impacting production of Deepak Fertilisers (company procures Nitric Acid from Deepak Fertilisers). ARTO had to buy expensive nitrated product for downstream manufacturing. Nitric acid supply has normalised from November.
- The revenue decline for the quarter is attributed to three factors mainly 1) de-merger of HPC business, 2) drop in raw material prices passed on to the customers and 3) higher contribution downstream products in specialty chemicals resulting in lower volumes.
- The raw material price drop impacted specialty chemicals revenue to the extent of $7.0 \%$ (passed on to the customers) while the decline on account of volumes was about $12.0 \%$.
- Pharma revenues were impacted by changing product mix (focus towards value-added products) while the profitability remained strong. The plant continues to operate at higher capacity utilisation levels as certain new products which were due for validations are undergoing trials.
- The company continues to push sales of downstream products. The capacity expansion of NCB to 108,000 mtpa would take care of growth for the next five-seven years. The NCB de-bottlenecking is being carried out in 2 phases with a total capex of Rs 1.5 bn.
- The agro intermediate facility for multiyear contract is expected to get commissioned by 4QFY20 and would reach full utilisation level by FY22E.
- The R\&D centre in Navi Mumbai would be operational in 2 HFY 20 and the specialty complex in Dahej along with Chlorination complex would be commissioned in 2HFY20.
- The employee benefit expenses during the quarter were higher on account of merger of Nascent Chemicals as well as hiring of new employees for upcoming projects.
- Incremental profit at EBITDA level due to higher realisation of PDA was about Rs 150 mn .
- $50 \%$ of the APIs is sold to regulated markets like US and Europe.
- The export contribution during the quarter has gone from $36.0 \%$ to $44.0 \%$ YoY leading to higher working capital (working capital for exports is higher).
- The company has incurred capex of Rs 5.0 bn in 1HFY20 and full year capex guidance is Rs 10.0-12.0 bn.

## Atul

Maintain BUY
Shields profitability despite subdued demand, tax cut propels PAT... Atul Ltd. (ATLP) a Lalbhai group company established in 1947 is chemical conglomerate and has one of the biggest integrated chemical plants in Asia. It has a well-diversified product portfolio of around $1,000+$ products spanning across Life Science Chemicals and Performance \& Other Chemicals. It caters to diversified industries like textile, paints, agriculture, fragrance \& flavours, tyres, paper, pharma, aerospace, construction, etc.

## 2QFY20 performance

ATLP delivered a stable performance with consolidated sales, EBITDA and PAT growth of $1.0 \% / 12.6 \% / 70.9 \%$ to Rs $10.45 \mathrm{bn} / \mathrm{Rs} 2.2 \mathrm{bn} / \mathrm{Rs} 2.09 \mathrm{bn}$, respectively. Gross margins expanded by 350 bps YoY to $51.5 \%$ clearly indicating benefits of higher realisations. However, EBITDA margins expansion was limited to 230 bps to $21.5 \%$ YoY on account of deteriorating operational leverage. The company has adopted new tax regime and has accordingly recomputed deferred tax assets/liabilities. This has resulted into lower tax rate of $1 \%$ for the quarter thereby shooting up the PAT upwards to Rs 2.1 bn , a growth of $70 \%$ YoY.

Consolidated performance was impacted by Life Science Chemicals revenues declined by 8.4\% whileEBIT grew by just $5.2 \%$ YoY. The performance was supported by Performance and Other chemicals which witnessed 4.2 \% growth in sales, while EBIT grew by $14.9 \%$ YoY.

## 1HFY20 performance

During IHFY20, the company reported sales growth of $7.1 \%$ YoY to Rs 20.8 bn . Gross margins have expanded by 380 bps YoY to $51.3 \%$ while EBITDA margin expanded by 430 bps YoY to $22.3 \%$. Though, other income declined by $11.0 \%$ YoY to Rs 310 mn and depreciation rose by $12.6 \%$ YoY to Rs 641 mn , lower tax rate of $16.7 \%$ compared to $37.2 \%$ in 1HFY19 allowed the company to report PAT growth of $75.0 \%$ YoY to Rs 3.56 bn.

The cash flows from operations increased by Rs 1.55 bn to Rs 4.16 bn and the company incurred a capex of Rs 2.08 bn in IHFY20. In order to fund the operations the borrowings increased from Rs 431.4 mn to Rs 834.9 mn ; however, the company remains a net cash company.

## Outlook

Sensing opportunities arising out of China slowdown, Atul has been the first in the industry to expand capacities and incurred capex of Rs 8.0 bn in the last five years. It is now incurring further capex of $\sim$ Rs 4.0 bn which provides visibility and confidence to FY21E estimates and beyond. The capex is less than expected EBITDA for FY20. These projects once completed, at full capacity has potential to generate sales of $\sim$ Rs 7.0 bn. The bulk of these capex have been funded through internal cash accruals and Atul continues to remain a net cash company. We maintain Buy rating on the stock with a target price of Rs 5,200 .

Industrial Solution Business revenues stood at Rs 3.19 bn , up $9.7 \%$ YoY while EBIT stood at Rs 125 mn , down $16.9 \%$ YoY. EBIT margins contracted by 130 bps YoY to $3.9 \%$. Surface Technologies Business revenue was up $2.6 \%$ YoY to Rs 1.9 bn, while the company reported a profit of Rs 21 mn against a loss of Rs 26 mn in 2QFY19.

Nutrition \& Care segment reported growth of $81.8 \%$ YoY to Rs 3.65 bn with EBIT of Rs 33 mn against a loss of Rs 73 mn in 2QFY19. Chemicals Business revenues were up ~8x YoY to Rs 3.14 bn; EBIT was up $110.5 \%$ to Rs 98 mn . EBIT margins contracted by 870 bps YoY to $3.1 \%$.

## 1HFY20 performance

Sales grew by $11.8 \%$ YoY to Rs $11.8 \%$ driven by strong growth in Nutrition \& Care (up $47.7 \%$ to Rs 5.75 bn) and Chemicals business ( $388.7 \%$ to Rs 4.17 bn ) followed by $8.8 \%$ growth in Agricultural Solution and $3.1 \%$ in Industrial solution. Revenue from materials segment declined by $4.8 \%$ to Rs 8.2 bn while Surface Technologies revenue was flat at Rs 4.0 bn.

Gross margin contracted by 420 bps while EBITDA margins contraction was limited to 60 bps on account of improved operating leverage.

Profitability was under pressure across all the segments expect for Surface Technologies (margins expanded by 260 bps to $4.2 \%$ ) and Nutrition \& Care (reported a profit of Rs 38 mn against a loss of Rs 143 mn in IHFY19).

PAT declined by $17.8 \%$ YoY to Rs 278 mn on account of higher depreciation (up $22.7 \%$ YoY to Rs 911 mn ) despite higher other income (up $127.5 \%$ YoY to Rs 117 mn ) and lower tax rate ( $26.7 \%$ against $28 \%$ in 1 HFY 19 ).

## Key highlights from Balance Sheet and Cash Flow statement

- Long-term borrowing came down by Rs 1.86 bn while short-term borrowings went up by Rs 1.47 bn from 1HFY19. According to the cash flow statement, net borrowings increased by Rs 746 mn .
- Trade receivables, inventories and trade payables increased by Rs 2.5 bn, Rs 1.32 bn and Rs 3.1 bn to Rs 15.6 bn, Rs 11.3 bn and Rs 15.5 bn, respectively. Working capital increased marginally by Rs 730 mn to Rs 11.4 bn YoY.
- BASF incurred a capex of Rs 333.2 mn in 1HFY20 against Rs 422.4 mn in 1HFY19.
- The company generated cash inflows of Rs 1.06 bn from the operations in 1HFY20 instead of using cash of Rs 636.4 mn for operations in 1HFY19.

## Outlook

The financial performance of the company has been subdued since quite some time now owing to divestments of business segments and weak sentiments in the user industries. The lack of growth visibility and no clear road map by the Parent company for the listed business has been hurting the stock performance. While the company has announced capacity expansion of Polymer Dispersion (doubling the capacity) at Dahej, the product forms a very small part of the folio and we do not expect it to have any meaningful impact. The plant is expected to come up in 2021. While we remain hopeful of the gradual improvement in the performance of the company, rich valuation and lack of near-term growth trigger limits upside.

## Highlights from BASF SE (Parent) results

BASF SE (Parent) reported 2\% decline in revenue, led by prices decline in Materials and Chemicals segment (isocynates prices declined considerably) as volume growth was flat YoY. The company was able to maintain its sales volumes on YoY basis despite poor demand from key consumer markets. EBIT declined by $24 \%$ YoY on account of lower contribution from Chemicals and Material. Surface Technologies, Agricultural

Solution, Industrial Solutions and Nutrition \& Care segments performed well. We maintain Hold rating on the stock with a target price of Rs 1,400 .

## Agricultural Solution

Strong revenue growth of $26 \%$ was driven by $21 \%$ volume growth as well as $8 \%$ growth from portfolio effect from the acquisition of significant businesses and assets from Bayer in August 2018. This offset $6 \%$ decline in the prices. In Europe, sales were at the level of the prior-year quarter. Portfolio effects were able to offset lower sales volumes for herbicides and fungicides, mainly as a result of a decline in cultivation area for canola (oilseed rape), as well as a lower price level and negative currency effects. North America sales volumes went up marginally thereby offsetting lower prices along with positive currency and portfolio effects. Asian sales grew YoY on account of volume growth especially for herbicides and positive portfolio effects. Positive currency effects also contributed to the increase in sales. Overall, higher sales led to profit at EBIT level as compared to a loss in 3QCY18. The company had a very strong start to the season in South America as the demand came in earlier than expected.

## Chemicals

Revenue declined by $22 \%$ YoY on account of poor performance by both the divisions (Intermediates and Petrochemicals). The sales decrease was due to lower volumes (substantial drop) in both divisions, primarily in the Petrochemicals division due to the scheduled turnarounds of steam crackers in Port Arthur, Texas and Europe, and significantly lower capacity utilisation of the condensate splitter in Port Arthur, Texas. Volumes also declined in the Intermediates division, particularly of amines and butanediol \& derivatives.

## Materials

The segment was largely impacted by the lower prices. Sales decline of $13 \%$ was impacted largely by lower price in monomers (down 25\%) on account of high supply in the market. Performance material sales declined on account of decrease in the raw material prices

## Surface Technologies

Revenue grew by $22 \%$ YoY, largely driven by $38 \%$ growth in Catalyst business on the back of increased precious metal prices as well as increased volumes in mobile emissions catalysts as well as battery business. EBIT grew by $35 \%$ YoY driven by coatings division on account of lower fixed costs. While the world automotive industry is growing at $2 \%$ BASF's automotive business is growing at 6\%. With new emission regulation in India which is positive for the Catalyst business, as the company has put new capacities into India which are now getting filled.

## Relative Performance

## Clariant Chemicals (India)

Maintain Hold
Continues to post improved performance...
Clariant Chemicals India (CLRC) operates in the business areas of Care Chemicals (BU Industrial \& Consumer Specialties), Plastics \& Coatings (BU Pigments, BU Masterbatches and BU Additives), Natural Resources (BU Functional Minerals, BL Mining Services) and Catalysis (BU Catalysts).

## 2QFY20 performance

Clariant Chemicals (India) Ltd. (CLRC) continued to post improvement in its performance. Though sales growth remained lower at 6.1\% YoY, low base coupled with price hikes aided EBITDA and PAT growth of $135.4 \%$ and $177.8 \%$ YoY, respectively, to Rs 297 mn and Rs 133 mn .
Plastics and Coatings segment posted $7.8 \%$ YoY growth to Rs 2.6 bn while Specialty Chemicals reported $22.3 \%$ decline in sales to Rs 109 mn . Plastics and Coatings reported EBIT margins of $7.7 \%$ against loss last year while Specialty Chemicals EBIT margins improved from 2.4\% in 2Q'19 to 14.6\%.

Gross margins improved by 330 bps YoY and 90 bps QoQ to $38.3 \%$. This coupled with lower overheads partly on account of Ind AS 116 adoption resulted into 600 bps YoY EBITDA margin expansion to 10.9\%. The adoption of Ind AS 116 has resulted into decrease in profit before tax by Rs 6.6 mn for 2Q'20 and Rs 13.7 mn during $1 \mathrm{H}^{\prime} 20$. Other income declined by $10.3 \%$ YoY to Rs 39.0 mn while depreciation increased by $24.8 \%$ YoY to Rs 115.0 mn resulting into $185.5 \%$ YoY growth in EBIT to Rs 220.0 mn.

| Adjusted EPS (Rs) | 1.6 | 5.8 | 263.5 | 4.9 | 18.4 | 5.8 | 10.7 | 84.9 |

The company continued to remain in the higher tax regime with the company reporting tax rate of $36.7 \%$ for 2Q'20. Reported PAT stood at Rs 133.0 mn, up 263.5\% YoY. EPS for the quarter stood at Rs 5.78.
The Board unanimously approved the sale of Business Unit namely Additives (BU - Additives) to Clariant India Limited, a Related Party, on a going concern basis for a consideration of Rs 168.4 mn ( 0.6 x sales and $4.7 x$ PAT). The said unit had sales of Rs 265.2 mn ( $\sim 2.7 \%$ of total sales) and PAT of Rs 36.1 mn ( $\sim 12.0 \%$ of PAT) in FY19. The transaction is expected to get completed by end of FY2O.

## IHFY20 performance

Performance improved significantly on the back of price hikes and weak base. Revenue grew by $9.1 \%$ YoY to Rs 5.7 bn as the company took price hikes and passed on the raw material price increase.
Price hikes led to gross margins expansion of 180 bps to $37.8 \%$, while controlled expenses and adoption of Ind AS 116 has resulted into further expansion in EBITDA margin by 600 bps to $10.9 \%$.
PAT grew by $84.9 \%$ YoY to Rs 246 mn despite higher depreciation (up $24.3 \%$ to Rs 231 mn ) and interest cost (up $576 \%$ to Rs 20 mn ) and lower other income (down $14.7 \%$ to Rs 65 mn ).

## Key highlights from Balance Sheet and Cash Flow statement

- The company has capitalised Rs 114.6 mn during 1H'20 with CWIP coming down to Rs 84.3 mn .
- The working capital improves as the company reports improved cash flows from operation (after working capital changes) to Rs 490.9 mn (up Rs 364.6 mn YoY).
- The company has created lease liabilities worth Rs 280.4 mn under non-current liabilities.
- Cash inflow from operations went up from Rs 605 mn in 1HFY19 to Rs 3.86 bn . As per the cash flow statement, CLRC incurred a capex of Rs 1.86 bn in $1 H F Y 20$ as against Rs 1.28 bn in 1HFY19.

## Outlook

The financial performance of CLRC has been subdued for quite some time as rising raw material prices, subdued demand and ban on one-time use plastics in many states took toll on the financial performance. The news flow from the parent company regarding divestment of the pigment and Masterbatch business ( $\sim 90 \%$ of the total revenue of the Indian entity) further adds to the uncertainty for the Indian business. Nonetheless, we remain watchful and expect gradual improvement in the ensuing quarters. Maintain Hold with a target price of Rs 360.

## Gujarat Fluorochemicals

Maintain Hold
Drop in realisations dent profitability....
Gujarat Fluorochemicals Ltd. (FLUOROCH) got listed as a spin-off chemical entity during 2QFY20. The company includes along with erstwhile chemical business, Gujarat Fluorochemicals Americas LLC (engaged in the business of processing and marketing of PTFE products manufactured by GFL, in United States of America), Gujarat Fluorochemicals GmbH (engaged in business of trading as well as processing, distribution, marketing and storage of polymers to its German and EU customers) and Morocco Mines (fluorspar mines).

## 2QFY20 performance

Consolidated Net Sales/EBITDA/Adjusted PAT declined by 0.8\%/34.7\%/60.4\% to Rs $6.68 \mathrm{bn} /$ Rs $1.9 \mathrm{bn} / \mathrm{Rs} 970 \mathrm{mn}$, respectively. Standalone Net Sales/ EBITDA/Adjusted PAT declined by $3.4 \% / 32.6 \% / 46.4 \%$ to Rs $6.57 \mathrm{bn} / \mathrm{Rs} 1.33 \mathrm{bn} /$ Rs 597 mn , respectively. The quarter had exceptional item of Rs 260 mn pertaining to one-off de-merger expenses.

Revenues from Caustic Soda, Refrigerants, PTFE and value-added products declined sequentially by $18.6 \%, 4.6 \%, 15.9 \%$ and $10.8 \%$, respectively, led by falling realisations. PTFE, one of the key growth drivers in the last couple of years reported both volume and realisations decline owing to slowdown in automobile and US-China trade war impacting realisations in Europe.

| NPM (\%) | 16.4 | 5.8 | - | 10.8 | - | 16.5 | 8.4 | - |
| Adjusted EPS (Rs) | 10.1 | 3.5 | $(65.5)$ | 7.2 | $(51.7)$ | 20.6 | 10.7 | $(47.9)$ |

The value-added products too witnessed sequential decline owing to lower off-take and resulted into overall sequential decline in sales of $10.5 \%$ to Rs 6.6 bn.

Caustic soda segment which has been among the most profitable segment last year has seen correction in realisation severely impacted profitability. The management indicated that the performance also got impacted by high cost inventory which resulted into inventory loss. Negative operating leverage resulted into EBITDA margins contraction of 1,050 bps to $18.6 \%$.

Profits were impacted by one-time de-merger cost and Income Tax credits worth Rs 3.49 bn in base quarter. Adjusting for these, adjusted PAT declined by $60.4 \%$ YoY to Rs 385 mn .

## 1HFY20 performance

Consolidated revenues grew by 2.0\% YoY to Rs 14.0 bn while EBITDA and adjusted PAT declined by $23.4 \%$ and $47.9 \%$ YoY to Rs 3.1 bn and Rs 1.2 bn, respectively. Revenue growth was stunted on account of $10.5 \%$ decline in Caustic Soda revenues and $9.2 \%$ decline in PTFE revenues as well as muted growth of $3.1 \%$ in Chloromethane on account of lower realisation in all the segments. Revenues from Refrigerant segment grew by $11.6 \%$ to Rs 2.1 bn and value-added products by $33.5 \%$ to Rs 2.3 bn. Others grew by $15.4 \%$ to Rs 600 mn .

Gross margins contracted by 280 bps to $22.4 \%$ and EBITDA margins further contracted by 740 bps on account of poor operating leverage.
PAT declined on account of high interest cost (up $51.8 \%$ to Rs 441 mn ) and depreciation (up $21.2 \%$ to Rs 952 mn ) as well as low other income (down $87.7 \%$ to Rs 70 mn ).

## Key highlights from Balance Sheet and Cash Flow statement

- The historical numbers of balance sheet and cash flow statement are not provided.
- On standalone basis, the long-term borrowings have come down by Rs 312 mn while the short-term borrowings went up by Rs 4.57 bn; according to the cash flow statement, net borrowings went up by Rs 4.26 bn . On consolidated basis, debt stands at Rs 13.0 bn . The company has tax assets worth Rs 5.3 bn which are largely advanced taxes as well as MAT credits which are due.
- The company incurred capex of Rs 7.2 bn in IHFY2O; cash flow from operations was about Rs 3.7 bn.
- Net working capital went up marginally by Rs 39 mn .

## Outlook

The company's performance has been weak and is expected to remain subdued in the near-term. PTFE segment, the key growth engine is witnessing headwinds with regards to slowdown in the automobile and US-China trade issue leading to lower realisations. The situation is expected to stabilise in the next couple of quarter, as per the management. We believe the valuations are attractive for a long-term investment and recovery in the financial performance remains a key near-term trigger.

## Concall highlights

- PTFE segment performance was impacted by slowdown in the EU auto market; the company had not anticipated such sharp drop in realisations; 3QFY20 would be similarly subdued and the company expects revival from 4QFY20 onwards.
- The sales volume of PTFE was about $3,600 \mathrm{MT}$ and the weighted average realisations were about Rs 680,000/MT against Rs 740,000 MT. 47\% was regular grade while $53 \%$ was value-added.
- Further, the raw material prices declined during the quarter. Due to volatile nature of raw material, the company keeps four-five months of inventory which resulted into inventory loss.
- There was sharp jump in the fluorochemicals intermediates revenue as the company launched 6 products in 1HFY20. The company intends to launch 3 products in 3QFY20, 4QFY20 and 1QFY21, consecutively.
- Caustic soda realisations have dropped significantly and the company does not expect any revival in the prices soon.
- The capex guidance for the year has gone up from Rs 1.25 bn to Rs 7.0 bn . The company has now planned new project for Dahej which would be carried out in a phased manner and has placed orders for wind power plant in order to save power cost. As per the management, the company would save about 35\% of its power cost. Capex guidance for rest of the year is about Rs $300 \mathrm{mn} / \mathrm{month}$.
- The capex for Phase 1 for Dahej would be Rs 3.5 bn and would be incurred in FY20, largely for setting up civil infrastructure and utilities. Rs 1.5 bn would be used towards de-bottlenecking of current products. The Ranjitnagar plant would require further capex of Rs $400-500 \mathrm{mn}$.
- The power cost currently in Gujarat is about Rs 7/unit. The new wind power plant ( 60 MW ) is expected to be operational by the end of FY2OE.
- The debt on the books has gone up by Rs 9.0 bn to Rs 13.0 bn.
- The company would not shift to the new tax regime as it has Rs 6.5 bn worth of MAT credit. It intends to exhaust it over the next three-four years.

## Navin Fluorine International Maintain Hold

Specialty chemicals drives growth...
Navin Fluorine International Ltd. (NFIL), an Arvind Mafatlal Group company was established in 1967 to manufacture Fluorochemicals. Over the years, the company has diversified into Refrigerants, Inorganic Fluorides, Specialty Fluorochemicals and CRAMS businesses.

## 2QFY20 performance

Navin Fluorine International (NFIL) reported healthy performance with consolidated Sales/EBITDA/PAT growth of by $7.7 \% / 33.7 \% / 27.0 \%$ to Rs $2.7 \mathrm{bn} /$ Rs 681 mn /Rs 473 mn , respectively. Revenues from CRAMS declined by 6\% YoY to Rs 470 mn ; however, the performance improved sequentially on account of weak base and healthy order book. The performance was yet again led by Specialty Chemicals BU as revenues grew by $20.5 \%$ YoY to Rs 940 mn on the back of strong volume growth as well as good order flow from both Life Science and Crop Science segments.
The company has passed on the input cost inflation through price hikes in the last quarter of FY19. This coupled with strong performance from new products in specialty chemicals segment drove gross margin expansion of 360 bps YoY. The EBITDA margins further expanded by 490 bps as the company took several cost reduction initiatives during the start of FY20E. Standalone Sales/EBITDA/PAT grew by 9.1\%/34.3\%/35.6\% YoY to Rs 2.63 bn/Rs $676 \mathrm{mn} /$ Rs 464 mn , respectively. The tax rate stood at $32 \%$ as the company is still evaluating options and is likely to take a call by the end of the year.

While the issues at the Piramal JV plant were resolved during the last quarter, the company had taken a planned shut down during the quarter which impacted the performance. Further, the tax provisions for IHFY20 were entirely considered in 2QFY20E thereby impacting the JV performance. The JV reported a profit of Rs 8 mn a decline of $\sim 71 \%$ YoY limiting consolidated PAT growth to $27 \%$ YoY to Rs 473 mn .

## 1HFY2O performance

Revenue grew by $2.9 \%$ YoY to Rs 5.2 bn as revenue from CRAMS BU declined by $16.3 \%$ due to poor performance in 1QFY20 despite $13.2 \%$ growth in specialty chemicals BU. Revenue from Refrigerants BU grew by $5.0 \%$ YoY to Rs 1.5 bn and Inorganic Fluorides by $6.1 \%$ to Rs 1.0 bn.

Gross margins expanded marginally by 60 bps to $52.9 \%$. EBITDA margin further expanded by 170 bps to $24.6 \%$. EBITDA grew by $12.5 \%$ YoY to Rs 1.3 bn.
PAT grew by $20.2 \%$ to Rs 905 mn despite higher depreciation (up $18.4 \%$ to Rs 167 mn ) and interest cost (up $209.2 \%$ to Rs 9.0 mn ) as other income grew by $31.4 \%$ to Rs 160 mn . Tax rate stood at $32.5 \%$ against $33.2 \%$ in 1HFY19.

## Key highlights from Balance Sheet and Cash Flow statement

- Inventory days decreased by 3 days to 85 days while the receivable days increased by 1 day to 65 days. Payable days increased by 8 days to 37 days. The overall cash conversion cycle decreased by 11 days to 113 days.
- The core capital employed stood at Rs 8.95 bn and annualised core RoCE stood at 25.12\%.
- Cash generated from operations during the period was about Rs 597 mn against Rs 394 mn during 1HFY19.
- Net cash used in investing activities was about Rs 309 mn ; the company sold Rs 2.23 bn worth of investments and spent about Rs 670 mn towards PPE.
- The company repaid all of its short-term borrowing during the period (Rs 41.3 mn ) and is currently a zero debt company.

## Outlook

CRAMS remains the growth driver for the company going ahead and with the management commentary turning optimistic for CRAMS BU, the outlook remains positive. The long-term agreement with US client is a milestone for the company as it is the first molecule which has overcome the long R\&D gestation and is getting launched next year. A successful launch by the customer would make the business sticky. However, we believe the ramp-up would be gradual and incremental investments would be required for sustainable performance. We would therefore be eagerly looking forward to further growth plans by the company. Maintain Hold with a revised target price of Rs 890.

## Concall highlights

## Specialty Chemicals BU

- The jump in the domestic revenue came in due to product mix shift which varies quarter on quarter. The product which underwent de-bottlenecking during the last quarter is a $100 \%$ export product and the company spent about Rs 100 mn towards de-bottlenecking. Majority of the growth in the BU came in from 4 products, 3 of which are multi consumer products. Two of those products contribute to the domestic revenue, 1 product contributes to the exports revenue and 1 contributes to the both.
- Going ahead, the company plans to incur a small capex in Surat and a large capex for greenfield expansion in Dahej for specialty chemicals and a certain other segment which is not a part of any existing BU. The plans are yet to firm up and the company would make the announcements by 3QFY20.
- There were certain increases in the product realisation during the quarter on account of supply shortage in the market of one of the key products of the company. However, majority of the growth came in on the back of strong volume growth and cost reduction.
- The order book visibility in specialty chemicals is comparatively stronger as compared to other BUs and the company is looking forward to enter into supply contracts with their customers; however, they would not be focusing on long-term contracts as the company wants to diversify this BU in terms of products and customers.

## CRAMS BU

- The new supply contract signed by the company is a 5-year contract and would start to contribute to the revenue from 3 Q end or 4 Q onwards and hence the 2QFY20 revenue of CRAMS does not reflect the revenue from the long-term contract. The second customer that delayed the campaign is reworking on their project and would reconnect by the end of November or early December.
- The commissioning of the new cGMP facility has been delayed from October 2019 to December 2019 post which it would start fulfilling the order book back log piled up due to the delay. The company decided to delay order fulfilment as the new cGMP3 plant is larger than the current cGMP2 plant and further many other capabilities.
- Large number of CRAMS opportunity gets initiated from MOL for customers who do not directly come to India for solutions; and for this reason, the company is planning to make an investment in 1 HCY 20 in MOL to upgrade its capabilities.

## Inorganic Fluorides BU

Despite the subdued demand from the domestic stainless steel industry the growth came in as the company maintained their volumes and realisations. The company expects to maintain them going forward as well.

## Refrigerants BU

The pricing in the refrigerants BU was better in the domestic as well as exports market. The export contribution to the revenues of the BU jumped to $49 \%$ from $40 \%$ sequentially.

## Other highlights

- The standalone tax rate stood at $34.9 \%$ as the company has yet not adopted the new tax rate of $25.17 \%$ despite having not MAT credit entitlement or Deferred Tax Asset; the company is evaluating multiple options by the end of the year through which they may be able to accrue tax benefits.
- The reported other income of Rs 86 mn includes Rs 14 mn of one of gain towards sale of investment as well as Rs 37 mn of MTM gain.

## Relative Performance

## Sudarshan Chemical Industries

## Sequential recovery visible...

Sudarshan Chemicals (SCHI) started manufacturing Pigments in 1952 and currently has a wide range of organic pigments, inorganic pigments, high performance pigments, effect pigments etc. Sudarshan Chemicals is the 4th largest pigment manufacturing company in the world and currently is the largest pigment producer in India.

## 2QFY20 performance

The revenue growth was on the back of $6 \%$ volume growth in both specialty and non-specialty pigments portfolio. Price hikes were undertaken in Azo pigments while profitability in non-specialty pigments continued to remain under pressure. Exports contribution for the quarter was about 48\%.
The gross margins on consolidated basis, contracted by 10 bps YoY to $41.6 \%$, as the raw material prices continue to remain high on account of shortage from China. However, the margins expanded sequentially by 80 bps, on the back of raw material prices increases being passed on by the company to the customers as well as improved product mix.
EBITDA margins expanded on YoY basis by 290 bps to $15.7 \%$, on the back of lower other expenses (down $7.2 \%$ YoY to Rs 744 mn ). EBITDA margins were flat sequentially as higher other expenses as \% of net sales eroded gross margin expansion.

## Financial highlights

| (Rs mn) | 2QFY19 | 2QFY20 | YoY <br> $(\%)$ | 1QFY20 | Q0Q <br> $(\%)$ | IHFY19 | lHFY20 | YoY <br> $(\%)$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Net sales | 3,560 | 3,935 | 10.5 | 3,903 | 0.8 | 7,109 | 7,838 | 10.3 |
| Gross profit | 1,485 | 1,638 | 10.3 | 1,594 | 2.8 | 3,025 | 3,232 | 6.8 |
| Gross margin (\%) | 41.7 | 41.6 | - | 40.8 | - | 42.6 | 41.2 | - |

| Tax | 109 | 6 | $(94.7)$ | 193 | $(97.0)$ | 456 | 198 | $(56.5)$ |
| Tax rate (\%) | 31.4 | 1.3 | - | 29.8 | - | 31.6 | 18.3 | - |
| Adjusted PAT | 208 | 462 | 121.8 | 277 | 67.0 | 391 | 739 | 89.2 |
| NPM (\%) | 5.9 | 11.7 | - | 7.1 | - | 5.5 | 9.4 | - |
| Adjusted EPS (Rs) | 3.0 | 6.7 | 121.8 | 4.0 | 67.0 | 5.6 | 10.7 | 89.2 |

Adjusted PAT grew by $121.8 \%$ to Rs 462 mn despite lower other income (down $34.6 \%$ YoY to Rs 11 mn ) and higher depreciation (up $6.5 \%$ to Rs 169 mn ) and interest cost (up $29 \%$ to Rs 33 mn ) on account of lower tax rate.

## 1HFY20 performance

Revenue growth came in at $10.3 \%$ to Rs 7.8 bn as the company passed on the raw material prices increases to the customers. EBITDA grew by $20.0 \%$ to Rs 1.2 bn. While the gross margin contracted by 140 bps to $41.2 \%$, EBITDA margin expanded by 130 bps to $16.0 \%$ on the back of improved operating leverage.

PAT grew $89.2 \%$ to Rs 739 mn despite lower other income (down $28.2 \%$ to Rs 45 mn ) and higher depreciation (up $6.5 \%$ to Rs 338 mn ), as the tax rate was lower at $18.3 \%$. The company re-assessed deferred tax assets and liabilities which resulted into lower tax rate for 2QFY20.

## Key highlights from Balance Sheet and Cash Flow statement

- The long-term borrowings have gone up by Rs 1.16 bn while the short-term borrowings came down marginally by Rs 71 mn . As per the cash flow statement, the net borrowings went up by Rs 1.0 bn .
- The company incurred a capex of Rs 942 mn in 1 HFY 20 as against Rs 330 mn in 1 HFY 19 .
- There was an increase of Rs 206 mn in working capital which stood at Rs 4.3 bn . Trade receivables, inventories and trade payables went up by Rs 168 mn , Rs 254 mn and Rs 217 mn to Rs 3.63 bn , Rs 3.33 bn and Rs 2.63 bn, respectively.
- Cash inflow from continuing operations were about Rs 726 mn against Rs 436 mn in 1HFY19.

## Outlook

While the high raw material costs continued to impact the profitability, sequential improvement in gross margin was seen as the company passed on the raw material price increases to the customers and further expects to take price increases in certain products. The company introduced a Yellow HPP pigment which is expected to get launched by the end of November 2019 and expects to launch 2 more products. One is an organic HPP pigment which would be launched by March 2020 and another large molecule would be launched by June 2020, thereby increasing the focus towards specialty products portfolio. While the management is working towards improving margins via fixed cost optimisation as well as skewing product mix towards value-added products, decrease in the raw material prices remains key for improvement in the performance. Maintain Buy with a revised target price of Rs 480.

## Concall highlights

- The revenue growth was on the back of $6 \%$ volume in both specialty and non-specialty pigments portfolio. Price hikes were undertaken in Azo pigments while profitability in non-specialty pigments continued to remain under pressure. Exports contribution for the quarter was about 48\%. The exports are largely focused towards Europe and in coatings segment.
- The performance during the quarter was impacted by rescheduling of the orders of Masterbatch from 2QFY20 to 3QFY20 on account of indecision caused by impending ban of single use plastics. The growth on account of plastics segment remained flat despite it being the highest growth segment for the company in the past. There is still a lot of ambiguity in the market related to the definition of 'Single use' which has led to a subdued market sentiment.
- The contribution of the automotive coatings to the revenue is considerably less and hence the impact of the auto industry slowdown on the performance of the company was not significant.
- The raw material prices during the quarter were stable and the company expects gross margins to normalise going ahead. Other expenses have gone up from historical levels as the insurance cost for
the chemical companies have gone up 7-8x; the minimum wages for the labours have gone up as well. Adjusting for the forex gains and losses, Rs 1.5 bn of other expenses in 1HFY20 is expected to recur for 2HFY20 as well.
- Capex incurred during the quarter was about Rs 550 mn ; capex of about Rs 500 mn which was to be incurred in August and September has been pushed to 3QFY20 due to prolonged rainfall. The company has announced further capex of Rs 1.25 bn in order to expand the capacity at Mahad and Roha.
- The company has introduced a Yellow HPP pigment which is expected to get launched by the end of November 2019. SCHI is one of the only 2 companies in the world to manufacture this product. The product finds application in coatings and plastics and the market size is about Rs 2.5 bn . It was developed in 18 months using in-house R\&D. The ramp-up for the product would be gradual. The time taken for the approval for the product from the coatings customers would be about 6-12 months while for plastics customers it would be about six months.
- SCHI expects to launch 2 more products, one is an organic HPP pigment which would be launched by March 2020 and another large molecule would be launched by June 2020.
- The entire capex for FY2O is about Rs $3.0-3.25$ bn out of which more than $50 \%$ would be revenue generating capex. The expected asset turnover is about 2.5-3.0x.
- The pigment industry in India is growing at a rate of 7-8\% while the global pigment industry is growing at 2-4\%.
- The company has not yet adopted the new tax rate regime; however, they have re-assessed deferred tax assets and liabilities which have resulted into lower tax rate for the quarter. The company has about Rs 100 mn of benefit still left. The effective tax rate for the company would be about 28-29\%.
- The gross debt of the company is about Rs 4.57 bn while the net debt is about Rs 3.6 bn . The company had to borrow Rs 1.0 bn at the end of September for capex as there was a mismatch in cash flows. The funds are being invested in mutual fund till the time it would be utilised for the capex.
- The current asset utilisation rate is about $75-80 \%$ and the company can sweat the assets up to $90 \%$.

Relative Performance

## SRF

## Maintain Hold

Specialty chemicals delivers yet again...
SRF began as Shri Ram Fibres in 1970. Over the years, the company expanded its product line in technical textiles. Over the years it has also diversified into other businesses like Chemicals, Packaging Films and Engineering Plastics.

## 2QFY20 performance

SRF delivered encouraging results by reporting flattish sales at Rs 17.0 bn while EBITDA and PAT grew $10.2 \%$ and $56.1 \%$ YoY to Rs 3.3 bn and Rs 2.0 bn, respectively. The tax rate was low at $2 \%$; however, the company has not yet adopted new tax structure. The chemicals segment (Refrigerants + Specialty chemicals) reported growth of $25.1 \%$ YoY to Rs 6.78 bn while EBIT grew by $107.8 \%$ YoY Rs 1.30 bn.
Technical Textiles Business performance was weak with revenues declining by $28.8 \%$ YoY to Rs 3.23 bn with EBIT declining by $69.9 \%$ YoY to Rs 209 mn . EBIT margin contracted by 880 bps YoY to $6.5 \%$. During the quarter, SRF Industries (Thailand) has decided to close the operations of the unit located at Rayong, Thailand w.e.f. 21st October 2019. The financial information of the said business has been classified as Discontinued Operations. The business reported sales of Rs 467.0 mn and EBIT loss of Rs 72.0 mn during the quarter. Further, the company lost a case in Supreme Court pertaining to demand for stamp duty related to tyrecord division worth Rs 288.2 mn and provided for the same during the quarter.

## Financial highlights

| (Rs mn) | 2QFY19 | 2QFY20 | YoY <br> (\%) | $\mathbf{1 Q F Y 2 0}$ | QoQ <br> $(\%)$ | IHFY19 | IHFY20 | YoY <br> (\%) |

| Tax | 377 | 41 | $(89.1)$ | 556 | $(92.6)$ | 839 | 597 | $(28.8)$ |
| Tax rate (\%) | 22.6 | 2.0 | - | 24.1 | - | 24.5 | 13.7 | - |
| Adjusted PAT | 1,287 | 2,009 | 56.1 | 1,753 | 14.6 | 2,585 | 3,763 | 45.5 |
| NPM (\%) | 7.5 | 11.8 | - | 10.1 | - | 7.7 | 11.0 | - |
| Adjusted EPS (Rs) | 22.4 | 35.0 | 56.1 | 30.5 | 14.6 | 45.0 | 65.5 | 45.5 |

Further, there was an inventory loss of Rs 100 mn on account of decline in Caprolactam prices from US\$ 2,000/MT to US\$ $1,400 / \mathrm{MT}$. Adjusting for this, EBIT would have been at Rs 597 mn (down $14.1 \%$ YoY instead of down $69.9 \%$ ) and margins healthy at $18.5 \%$ instead of $6.5 \%$.
Packaging Films Business reported stable performance with revenues declining by $4.8 \%$ YoY to Rs 6.62 bn EBIT of Rs 1.29 bn, up $7.9 \%$ YoY. EBIT margins expanded by 230 bps YoY to 19.6\%. The business has started to feel the pinch of declining spreads on account of capacity expansions in the industry as EBIT margins witnessed contraction of 110 bps QoQ. The performance; however, has been better than expectation with the company limiting the contraction to 110 bps only.

The tax rate was low at 2\%; however, the company has not yet adopted new tax structure. It had carrying forward long-term capital losses of Rs 1.86 bn which were offset but no deferred tax asset was recognised till previous quarter. Pursuant to long-term capital gain, a tax credit of Rs 434.0 mn has been recognised during the current quarter resulting into lower taxes for the quarter.

## The company has announced three capex

1) Rs 400 mn for high volume specialty product and derivatives which would be used as key raw materials in several of the upcoming products.
2) Rs 1.25 bn for TCF value chain. This is an enhancement of the capex of Rs 815.8 mn approved by the Board at its meeting held on 04 February 2019, to cater to the customer requirements from India as the Technical Textiles Business operations of SRF Industries (Thailand) Ltd. have been shut down due to economic unviability.
3) Rs 3.5 bn for setting up 45,000 mtpa BoPP film line in Thailand. Earlier investors used to react negatively to any capex in the Polyfilms business; however, the reaction to the last two capex in Polyfilms business has been neutral. We therefore do not expect any negative reaction to this announcement.

## 1HFY2O performance

Performance was driven largely by specialty chemicals as chemicals business revenue grew by $25.7 \%$ to Rs 12.8 bn. Revenue growth was subdued at $1.8 \%$ to Rs 34.3 bn as Technical Textiles revenues declined by $26.2 \%$ YoY, hit by slowdown in auto industry as well as muted growth of $2.8 \%$ in Packaging Film Business. EBITDA growth came in $14.3 \%$ to Rs 6.9 bn.
Though revenue growth was subdued, gross margins expanded by 340 bps to $46.5 \%$. EBITDA margins expansion was limited to 220 bps to $20.1 \%$ on account of poor operating leverage in 2 QFY 20 .
PAT grew by $45.5 \%$ YoY to Rs 3.7 bn on the back of higher other income (up $447.4 \%$ to Rs 372 mn ) and lower tax rate ( $13.7 \%$ against $24.5 \%$ in 1 HFY 19 ) despite higher interest cost and depreciation.

## Key highlights from Balance Sheet and Cash Flow statement

- The long-term borrowings and short-term borrowings have come down by Rs 3.03 bn and Rs 1.0 bn, respectively. As per the cash flow statement, the net repayment of loans stands at Rs 276 mn .
- The company incurred a capex of Rs 6.43 bn during $1 H^{\prime} 20$ as against Rs 4.94 bn in 1 HFY 19 .
- Trade receivables are lower by Rs 2.86 bn to Rs 9.25 bn, trade payables are lower by Rs 1.5 bn to Rs 12.1 bn . Inventory is down marginally by Rs 251 mn to Rs 12.4 bn. Working capital is down by Rs 1.6 bn to Rs 9.37 bn.

## Outlook

Strong performance of the specialty chemicals segment has been a key re-rating trigger for SRF in the past. Though the company has been consistently delivering earnings, the performance of specialty chemicals business remained bumpy. However, things have turned around since 4QFY19 with the company
continuing to report strong numbers. This is very much evident from the company maintaining its full year growth guidance of 40-50\%. Further, capex of Rs 4.2 bn for setting up PTFE facility and Rs 400 mn for intermediate has enhanced growth visibility beyond FY21 (commissioning in October 2021 and benefits likely in FY22 and FY23). This has enhanced quality of earnings growth from FY20 onwards. We therefore believe the multiple re-rating would sustain and expect SRF to trade at higher multiple (17x, 3-year mean PE multiple) leading it to be an earnings compounding story. Maintain Hold with a target price of Rs 3,055 .

## Concall highlights

## Specialty Chemicals

- Both Agro and Pharma products gained momentum during the quarter while bulk of the growth came in from emerging markets viz. Brazil and Latin America. Sales in North American were impacted by adverse weather condition.
- The impact from North America was lower for the company as its customer base is more skewed towards Europe. The company; however, continues to focus on customer acquisition in North America by expanding product offerings. It expects the scenario to improve in 2 HFY 2 O .
- The performance improved during the quarter on account of improved traction in 5-6 key products while other products continued to do well.
- The agro intermediates facility commissioned in October 2019 is expected to ramp-up at a faster pace and expected to contribute significantly to profitability.
- Fluorspar contracts are in place to safeguard supply and the prices are currently stable.

## Fluorochemicals

- Revenue was driven on the back of increased domestic volumes as well as market share gains. The performance was stable despite auto slowdown and drop in global prices of refrigerants.
- The volumes and realisations for R22 went up on account of ensuing phase down from January 2020.
- R134a refrigerant sales were impacted on account of production loss of about 800-1,000 MT as the reactor was not operating up to the mark. 70-80\% of the issue has been resolved and the production is expected to normalise by 4QFY20.
- The slowdown in the auto segment was offset by good pick-up in the refrigerant gasses used for domestic ACs.
- The facility doubling its refrigerant capacity was commissioned in October 2019. The full ramp-up is expected over 18-24 months.
Packaging Films Business (PFB)
- The performance was driven by high volumes as well as margins on account of cost control and richer product mix.
- Both exports and domestic market in BoPET and BoPP segments delivered steady contribution to operating profits. The company witnessed significant growth in value-added products sales; the delta of value-added products is expected to go up in future.
- The impact on the margins due to new BoPET lines coming on-stream is expected to impact profitability in 2HFY20. The two new lines, one by Jindal and another by Polyplex, were commissioned in August and October 2019, respectively.
- The oversupply scenario in the BoPP segment is expected to get normalised soon. The profitability is therefore expected to improve in the next 12-18 months.
- The Hungary and Thailand BoPET projects are on track and as per schedule and the machine erection has started.
- The company's products do not form a part of single use plastic items as defined by the government and hence are not under threat.

## Technical Textiles Business (TTB)

- The NTCF business was impacted due to slowdown in auto industry on account of which the tyre companies shut/cut their production by $10-25 \%$. The replacement demand was impacted due to financing issues.
- Inventory loss stood at Rs 90-100 mn as Caprolactam prices dropped from US\$ 2,000/MT to US\$ 1,400 / MT.
- The volume loss was about 800-1,000 MT/month and is expected to normalise by 4QFY20.
- The 3 Q is expected to be subdued; however, the performance is expected to normalise from 4QFY20 onwards.
- During the quarter, the company announced closure of its Thailand operations as it was becoming economically unviable to run the plant. This is expected to improve profitability as the margin profile in India business is better compared to the Thailand business.
- Belting fabric performance improved on account of higher sales of value-added products.
- Polyester Yarn segment performance was impacted due to domestic slowdown as well as intense competition from Chinese players.

## Others

- SRF continues to maintain its price and volume leadership in Coated Fabrics; however, the company faced challenges in the sale of truck tarpaulin on account of low movement of new chassis.
- The sales volume in laminated fabrics grew despite adverse market situation (continued oversupply in the segment as well as competition from new players).

## Discontinued operations

- During the quarter, SRF completed the sale of Engineering plastic division and Profit after Tax of Rs 1.75 bn from disposal of this business was recorded under discontinued operations.
- The company also shut its Thailand plant and the net loss of Rs 763 mn was recorded under discontinued operations. Overall, reported PAT was higher by Rs 1.0 bn on account of discontinued operations as well as lower tax rate.

## Capex and Capital allocation

- The company commissioned HFC facility at a cost of Rs 4.77 bn which got approved for Rs 3.56 bn. The cost and time overrun was on account of change in original design in order to create scope for capacity enhancement at a future date as well as increase in the steel and cement prices.
- SRF also commissioned the agrochemical intermediates facility at Dahej in October 2019 at a cost of Rs 1.66 bn. The project was approved at Rs 1.4 bn and due to changes in the original design and installation of additional effluent treatment equipment, there was cost overrun.
- The company has approved a capex of Rs 400 mn towards a high volume specialty chemical which finds application in agro and pharma intermediates and would be used to manufacture several upcoming products; the project is expected to get commissioned by July 2020.
- The company also announced capex of Rs 3.5 bn towards setting up 45,000 mtpa BoPP film line in Thailand. Thailand is a net importer of BoPP and the company expects BoPP scenario to improve in 12-18 months. The plant is expected to come up by September 2021.

## Alkyl Amines Chemicals

Not Rated

## Benefits from lower raw material prices...

Alkyl Amines Chemicals Limited (AACL) is the largest manufacturer of Ethyl Amines in India and is one of the leading manufacturers of Diethyl Hydroxy Amine (DEHA), DMA HCL, Acetonitrile and has a wide array of Amines and Amine derivatives in its product basket. The products of the company find application across rubber chemicals, agrochemicals, pharmaceuticals industries. The company has three manufacturing sites with 12 plants in western Maharashtra and Gujarat.

## 2QFY20 performance

Sales stood at Rs 2.3 bn, up $7.7 \%$ YoY. Gross margins expanded by 300 bps YoY to $51.1 \%$ while EBITDA margins expanded by 200 bps YoY to $24.6 \%$. EBITDA came in at Rs 577 mn , up $17.2 \%$ YoY. Interest cost reduced by $33.2 \%$ YoY while reversal of deferred and current tax of Rs 1.48 bn and Rs 80.7 mn , respectively, due to adoption of new tax regime allowed the company to report PAT growth of $103.4 \%$ YoY to Rs 539 mn .

The company has divested 29,77,996 equity shares representing 30.44\% stake in its associate company Diamines and Chemicals Ltd. during November 2019.

## 1HFY20 performance

During IHFY20, the company reported sales growth of $26.5 \%$ YoY to Rs 5.0 bn . Gross margins have contracted by 110 bps YoY to 47.7\%; however, EBITDA margins have expanded by 160 bps YoY to 23.3\%. EBITDA came in at Rs 1.17 bn, up $35.6 \%$ YoY. Depreciation cost increased by $15.5 \%$ YoY to Rs 129 mn while interest cost declined by $20.3 \%$ YoY to Rs 62 mn . Further, lower tax rate of $11.0 \%$ compared to $35.6 \%$ allowed the company to report PAT growth of $106.5 \%$ YoY.
During IHFY2O, D/E ratio came down from $0.43 x$ to $0.19 x$ as the long-term borrowings declined from Rs 1.0 bn to Rs 600 mn YoY. The company incurred a capex of Rs 207 mn . Working capital days have come down from 29 days to 25 days YoY. Cash flow from operations gone up from Rs 6.3 bn to Rs 10.5 bn YoY.

## Growth drivers

In the short-term, the company is expected to benefit from lower raw material prices, while the planned expansion and de-bottlenecking of Acetonitrile, Methyl amines and its derivatives over FY20-22E would support volume growth in the medium-term. We do not have rating on the stock.

## Concall highlights

- The volume growth for 1HFY20 was slightly above $15 \%$ YoY while for 2QFY20 there was a sequential drop in volumes on account of fire and flood at Kurkumbh and Patalganga, respectively. The company has filed for insurance claim.
- The capex for FY20E is about Rs 1.0-1.2 bn; tentative capex planned for FY21E is about Rs $1.0-1.2$ bn; however, the company is yet to map out the final capex plans for FY21E. The asset turnover of the capex to be incurred is about 1.5-2.0x.
- The current capacity utilisation for Methyl amine is about 80-85\%; it was at about $70 \%$ last year.
- The company is de-bottlenecking the methyl amine capacity which would add about 15,000 mtpa to the current capacity of $30,000 \mathrm{mtpa}$. The additional capacity is expected to come up in 1QFY21E.
- While some of the plants are operating at full capacity utilisations, the company has 10-20\% of head room for the production of all the products.
- INOES plans Acrylonitrile plant which led to an increase in the feedstock prices for acetonitrile. The competition from China is increasing and is putting prices under pressure. The company is able to fetch good price for the product and is able to sustain margins.
- The company has not launched any product this year; however, the product pipeline continues to remain strong.
- The demand for methyl amine is about $70,000 \mathrm{mtpa}$ in India and the capacity is about 85,000 tpa; the prices for methanol are stable currently.
- Going ahead, the recurring tax rate for the company would be about $22-24 \%$ as they would further accrue some benefit from deferred tax assets write-back.
- Gross margins improved YoY on account of stable alcohol prices and increased volumes; improved product mix as well as better realisations further aided margins expansion.
- EBITDA margins going ahead would be sustainable at 18-20\% levels.
- The company is setting up a plant to manufacture acetonitrile at Dahej and expects to commission it in the next two years.
- AACL acquired Diamines when it was a sick facility and turned it around into a profitable company, it divested the stake in the company as they want to focus on their own business and also gain from current valuations.

## Slowdown in auto drags performance...

Apcotex Industries Limited (APCO) was established in the year 1980 as a division of Asian Paints and later spun-off as a separate company in 1991. The company's product range includes VP latex, Carboxylated $\delta$ NonCarboxylated SB latexes, Acrylic latexes, Nitrile latex and Synthetic Rubber.

## 2QFY20 performance

During 2QFY20, the company reported sales at Rs 1.24 bn, down 22.5\% YoY. Gross margins have contracted by 10 bps YoY to $29.3 \%$ while the EBITDA margin was at lowest in the last 10 quarters, contracted by 670 bps YoY to $5.6 \%$. This was on account of higher other expenses and staff cost by $10.2 \%$ and $5.9 \%$ YoY, respectively. EBITDA came in at Rs 69 mn , down 64.9\% YoY. Other income came in at Rs 21 mn as against loss of Rs 4 mn in 2QFY19 while tax rate came in higher at $33.4 \%$ as the company reported deferred tax of Rs 17 mn . Adjusted PAT reported de-growth of 64.1\% YoY to Rs 36 mn .

## 1HFY20 performance

During 1HFY20, the sales came in at Rs 2.7 bn, down 12.6\% YoY. Gross margins have expanded by 180 bps YoY; however, EBITDA margins have contracted by 270 bps YoY to $9.2 \%$. EBITDA came in at Rs 250 mn , down 32.1\% YoY. Other income grew by 48.9\% YoY to Rs 33 mn while tax rate came in at 29.5\% as against 33.9\% in 1HFY19 which restricted PAT de-growth to Rs 150 mn , down 29.8\% YoY.

During IHFY20, Inventory days have gone up from 44 days to 54 days YoY while creditor's days increased from 28 days to 30 days YoY. Overall, cash conversion days increased from 80 days to 92 days YoY. Asset turnover came down from $0.9 x$ to $0.7 x$ YoY. The company reported net operating cash flow of Rs 59.4 mn against Rs 34.7 mn YoY.

## Growth drivers

Short-term challenges like slowdown in the auto industry ( $30-35 \%$ of revenue), higher cost raw material inventory and poor realisations of the products continues to affect the performance of the company; however, commissioning of captive power plant is expected to improve margins. We do not have rating on the stock.

## Concall highlights

- The company reported marginal growth in volume. The topline de-grew mainly due to decrease in realisations of NBR while margins got impacted due to change in product mix. Compared to 1QFY20, revenue mix has changed from 50:50 NBR: Latex to 45:50.
- After many quarters, the company witnessed de-growth in exports mainly on account of exports ban to Pakistan from August 2019. The prices of Butadiene are lower than US\$ 100/MT for European competitors, which made the company non-competitive in exports market.
- The company has direct $15 \%$ sales to automobile industry (without considering tyre industry). Slowdown in auto and allied industry also affected NBR sales.
- During the quarter, the company continues to utilise its NBR capacity at $100 \%$ and has increased the inventory for the same. NBR prices have corrected from US\$ 2,300/MT to US\$ 1,700/MT in the last few months. According to the management, the raw material prices in Europe have started increasing while domestically raw material prices are moving in the downward direction.
- In India, $80 \%$ of Nitrile Butadiene Rubber (NBR) is imported, which creates good potential for the company as it is the sole manufacturer in India. However, lower prices of imports are hurting the company's margins currently. The company is working with the government to increase ADD on imports.
- One of the biggest producers of NBR in Korea has called for one month of plant shut down which is expected to balance the demand supply situation.
- The company is in the process of expanding its NBR capacities while has been delayed by six months.
- The capex spend for the first phase post-acquisition was planned for Rs 1.0 bn (for FY17-18, FY18-19 and FY19-20) out of which the company already spent Rs 740 mn till 2QFY20, remaining amount will be spent in the next six months. The company raised term loan of Rs 200 mn for ongoing expansion.
- CPP commissioning delayed to 3Q due to heavy and extended monsoons as well as delays in environment clearances.
- Due to MAT credit entitlement, the company will stick to earlier tax regime.
- In India, the company is number one player for sale of many latex products and commands market share of over 40-70\%.

## Poor realisations hurts performance...

Balaji Amines Ltd. (BLA) is an ISO 9001: 2008 certified company, specialised in manufacturing of Methylamines, Ethylamines, derivatives of Specialty Chemicals and Natural Products. BLA also has facilities for manufacturing derivatives of amines, which are downstream products for various Pharma/Pesticide industries apart from user specific requirements. BLA commenced manufacture of Methyl Amines in the year 1989 and subsequently added facilities for manufacture of Ethyl Amines and other derivatives of Methyl Amines and Ethyl Amines.

## 2QFY20 performance

During 2QFY20, the company reported sales of Rs 2.27 bn, up 5\% YoY; this was on the back of $22.7 \%$ YoY growth in volumes. Revenue from amines division was up by $6.2 \%$ YoY to Rs 2.25 bn while hotel division revenues were up by $17.3 \%$ YoY to Rs 57 mn . Balaji Specialty reported revenue of Rs 83 mn in 2QFY20 as against Rs 19 mn in 1QFY20. Gross margin contracted by 220 bps YoY to $45.2 \%$ while EBITDA margin contraction was limited to 100 bps YoY to $19.7 \%$. Though, interest cost increased by $137.7 \%$ YoY to Rs 72 mn while depreciation cost increased by $65.3 \%$ YoY to Rs 78 mn , lower tax rate of $8.0 \%$ as against $19.3 \%$ restricted the adjusted PAT decline of $7.2 \%$ YoY to Rs 287 mn .

## 1HFY20 performance

During IHFY20, the company reported sales at Rs 4.5 bn, down $5.5 \%$ YoY. Gross margin contracted by 300 bps YoY to $43.4 \%$ while EBITDA margin contracted by 350 bps YoY to $18.3 \%$ with EBITDA declining by $20.5 \%$ YoY to Rs 823 mn . Though, interest and depreciation cost rose by $67.4 \%$ YoY and $43.4 \%$ QoQ to Rs 104 mn and Rs 135 mn , lower tax rate of $22.8 \%$ restricted decline in PAT of $27.1 \%$ YoY to Rs 472 mn .

During 1HFY20, the company generated cash flow from operation of Rs 421 mn as against Rs 322 mn in 1HFY19 and has incurred a capex of Rs 300 mn . Inventory days have gone up from 46 days to 56 days YoY while creditors' days have come down from 54 days to 38 days YoY.

## Growth drivers

The company is expected to report strong revenue growth in FY21 and FY22 due to start of Balaji Specialty Chemicals Pvt. Ltd. plant and expected potential revenue from Phase-I of mega project plant. However, FY20 performance would remain subdued on account of poor product prices. We do not have rating on the stock.

## About Balaji Specialty Chemicals Private Limited

Balaji Specialty is subsidiary of Balaji Amines (holds 55\%). The subsidiary recently received environmental clearance for manufacturing Ethylenediamine (EDA), Piperazine (PIP), Diethylenetriamine (DETA) and a very small quantity of Aninoethylpiperazine (AEP). The subsidiary has already completed capex of Rs 2.5 bn . In FY20 and FY21, the management expects revenue of Rs 700 mn with margin of $16-18 \%$ while in FY21, expects revenue of $\sim$ Rs 4.0 bn with margin of $18-20 \%$ at optimum utilisation.

## About mega greenfield project

The company got mega project status for 90-acre greenfield project. In the first phase, the company will use 8-10 acres of land and would invest Rs 2.0 bn which would be funded through both debt and internal accruals. The company would borrow Rs 1.2 bn for the project. The management expects project to come on stream by the end of FY21 and expects Rs 3.5 bn revenue in FY22. In Phase-I, the company would be producing 50 tpd ( $\sim 18,000 \mathrm{tpa}$ ) of Ethyl amines and few other import substitute products.

## Key concall highlights

- Total volumes for 2QFY20 stood at 21,376 MT as against 17,426 MT in 2QFY19. For 2QFY20, the amines, amines derivatives and specialty chemicals volume stood at 4,631 MT, 9,024 MT, 7,720 MT, respectively.
- In 2QFY20, amines constituted $21.7 \%$ of sales, amines derivatives constituted $42.2 \%$ and $36.1 \%$ of sales was from specialty chemicals. End-user industry-wise, API contributed about 50-56\% of revenue followed by agrochemicals at $19 \%$. Other segments like dyes, textile, animal feed, water treatment chemicals and refinery contributed about 5\% each.
- Several pharmaceutical manufacturers have voluntarily stopped supplies of ranitidine to gauge the level of NDMA impurities and in some cases recalled products while this has not impacted 2QFY20 performance; however, the management expects some impact in 3QFY20.
- The company has 10,000 mtpa of Morpholine capacity out of which, it would be manufacturing 7,0008,000 MT of Morpholine. Other than China, there are only three players making this product in the world. In India itself, there is a shortfall of 5,000 MT of supply of Morpholine. The company has started exporting Morpholine to other countries including China and USA.
- The company started manufacturing of fungible products like Acetonitrile and THF, the company has licenced capacity of 18,000 mtpa. In FY20, the company would be manufacturing 4,000-5,000 MT of Acetonitrile. Total demand of Acetonitrile in India is around 12,000 MT. Due to high volatility in prices of

Acetonitrile; the company has developed another fungible product called Tetrahydrofuran (THF), which can be manufactured on the same manufacturing line as Acetonitrile. If the volatility persists, the company plans to manufacture Acetonitrile and THF for six months alternatively. THF will be produced for first time in India and there is a demand for 15,000 mtpa.

- The company got the clearance for manufacturing Di-Methyl Hydrochloride for additional 7,500 mtpa capacities; however, it is waiting for the market demand to improve to increase the capacity.
- Balaji Specialty Chemicals Private Limited, subsidiary of the company has commenced production of niche products like Ethylenediamine (EDA), Piperazine (PIP) and Diethylenetriamine (DETA) and it expect gradual ramp-up going ahead. With these products, Balaji Amines would be substituting the products that are currently being imported in India. The company undertook capex of Rs 2.5 bn for the subsidiary company. At peak utilisation level, the margin profile of the subsidiary company will be similar to that of Balaji Amines.
- India is currently importing 29,000 tonnes of EDA, which goes into end use industry of agrochemicals. UPL, Coromandel International and Indofil are the major consumers of EDA. The other two products are consumed by pharmaceutical, polymer, coatings, etc. BLA will be the only company in India manufacturing EDA, PIP and DETA. India is importing 7,000-8,000 MT of Piperazine and 3,000-4,000 MT of DETA. These two products have good demand in other countries also.
- The company is expecting environmental clearance for 90 acres greenfield project in the month of November 2019. Once the company starts the land digging for the construction of greenfield project, it will take ~15 months' time to commence production. This project has received "Mega Project" status. The total capex for Phase-I of greenfield project is Rs 2.0 bn, out of which Rs 1.2 bn will be borrowed from banks, while the rest will be financed through internal accruals. In the first phase, the company will be manufacturing two products - 50 tpd of Ethyl Amines and 50 tpd of Iso Propyl Alcohol (IPA) or Mono Iso-propyl Amine (MIPA).
- The hotel business has now started contributing to the bottomline. The hotel business constituted $2.5 \%$ of the total revenue in 2QFY20. The average revenue for room stood at Rs 3,381 and revenue per available room was Rs 2,108 . The occupancy rate in 2QFY20 stood at $62.3 \%$. The cash profit from hotel division in 2QFY20 was Rs 14.1 mn .

## Subdued demand delays capex plans...

Bodal Chemicals (BODL) is the largest integrated manufacturer of dyestuff and dye intermediates player in India and manufactures over 25 varieties of Dye Intermediates and around 150 variants in Dyestuff. The company exports to 151 customers from 41 countries (like the US, the UK, Germany, China, Turkey etc.) and is an approved supplier for many global players. BODL has nine manufacturing units in Gujarat, four in Ahmedabad, three in Vadodara and two in Ankleshwar.

## 2QFY20 performance

- Consolidated Sales/EBITDA/PAT declined by $21.7 \% / 64.6 \% / 50.8 \%$ YoY to Rs 3.08 bn/Rs 258 mn/Rs 224 mn, respectively. Standalone Sales/EBITDA/ PAT declined by $31.2 \% / 63.9 \% / 44.1 \%$ YoY to Rs $2.6 \mathrm{bn} / \mathrm{Rs} 251 \mathrm{mn} /$ Rs 242 mn , respectively. Standalone revenues declined as Dye intermediate revenues dipped by $50.1 \%$ YoY on account decline in Dye intermediate prices and 16.4\% drop in Basic chemicals revenues on account of lower Caustic soda realisation.
- Consolidated gross margins contracted by 340 bps to $37.1 \%$ while on standalone basis the margins expanded by 80 bps to $40.2 \%$. The prices started correcting in 2QFY20 and currently are at their lowest level. EBITDA margins contracted by 1,010 bps to $8.4 \%$ as the employee cost as well as other expenses as \% of net sales went up by 200 bps and 480 bps YoY.

- PAT was impacted on account of higher interest cost (up $119 \%$ to Rs 45 mn ) and depreciation (up 24\% YoY to Rs 67 mn ).
- Bodal Chemicals (BODL) decided to adopt the new tax rate regime and received overall tax refund of about Rs 67 mn.

## 1HFY20 performance

- Consolidated Sales/EBITDA/PAT declined by $8.7 \% / 45.3 \% / 42.8 \%$ YoY to Rs $6.8 \mathrm{bn} / \mathrm{Rs} 747 \mathrm{mn} / \mathrm{Rs} 499 \mathrm{mn}$, respectively.
- Gross margins contracted by 420 bps to $36 \%$ and EBITDA margins further contracted by 730 bps on account of poor operating leverage.
- The overall performance was impacted on account of subdued 2QFY20 performance.

## Key highlights from Balance Sheet and Cash Flow statement

- Long-term borrowings came down by Rs 9.3 mn to Rs 121.3 mn , from March 2019, short-term borrowings increased by Rs 914 mn to Rs 1.7 bn .
- Cash flow from operations stood at Rs 1.37 bn in IHFY19.

## Growth drivers

The performance of the company has been impacted on account of declining Dyes and Dye intermediate prices due to slowdown in the demand. While the demand is subdued, the supply from China has restarted and there is ample supply in the market. Looking at the scenario, the company has put the capex plan on hold and is reassessing the flow of capex. SPS' Vinyl Sulphone plant has been put on hold as well on account of lower realisation. Trion continues to incur losses as the plant faces technical issues. It is expected to be operational by the next quarter.

## Concall highlights

- The company has deferred capex plans announced in May 2019 on account of subdued market and demand scenario.
- The total production was up $2 \%$ YoY while 64,109 MT; however, dyestuff production was down $25 \%$ YoY mainly on account of lower demand slowdown in the application industry.
- Production in Thionyl chloride plant has picked up and reached $50 \%$ capacity utilisation.
- The average prices of Vinyl Sulphone (Vs) during the quarter were about Rs $197 / \mathrm{kg}$, down from Rs $311 / \mathrm{kg}$ in 2QFY19. H-Acid prices during the quarter were down from Rs 502/kg in 2QFY19 to Rs 380/kg in 2QFY20. The average price for Thionyl chloride during the quarter was about Rs $13 / \mathrm{kg}$ to Rs $14 / \mathrm{kg}$.
- Currently, the prices are lower compared to the 2QFY20 levels. However, along with the product prices, raw material prices have also come down and are currently at their historical low. H -Acid currently is at Rs $350 / \mathrm{kg}$ and VS prices come down to Rs $180 / \mathrm{kg}$. Raw material cost is about $60-62 \%$ of sales.
- Margins going ahead are expected to be at the 2 Q levels in the coming quarters despite the fall in the dye intermediate prices, as the raw material prices have declined as well.
- On account of changing business model (shifting product mix towards dyestuff), working capital has increased as the credit period for dyestuff sales is higher and the inventory level to be maintained is also high. Wherever there is a slowdown, inventory days increase.
- The company has adopted the new tax rate regime and would save about 5-7\% on the income tax; SPS Processors has some MAT balance (Rs $20-30 \mathrm{mn}$ ) and once that is utilised BODL would opt for the new regime for SPS Processors.

SECTOR UPDATE

- $50 \%$ of the dyestuff produced by the company goes into textiles, $35 \%$ goes into leather and $15 \%$ goes into paper.
- The company enjoys $2 \%$ Merchandise Exports from India Scheme (MEIS) on their exports.

## Relative Performance

## DCM Shriram

Not Rated
Revival in Chlor-Alkali segment remains a key...
DCM Shriram Ltd. (DCMS) is an integrated business entity, mainly presence across the Agri value chain and Chloro-Vinyl industry. The company has added innovative value-added businesses domains primarily Bioseed and Fenesta. Access to captive power at all key manufacturing units enables the businesses to optimise competitive edge. The company has manufacturing facilities of Fertiliser, Chloro Vinyl \& Cement in Kota (Rajasthan), Chlor-Alkali in Bharuch (Gujarat), and Sugar in Central Uttar Pradesh.

2QFY20 performance

- Consolidated sales grew by $2.9 \%$ YoY to Rs 17.4 bn while EBITDA and PAT declined by $28.7 \%$ and $29.6 \%$ YoY to Rs 2.1 bn and Rs 1.2 bn. Standalone sales grew by $3.0 \%$ YoY to Rs 17.3 bn while EBITDA and PAT declined by $27.6 \%$ and $28.5 \%$ YoY to Rs 2.2 bn and Rs 1.2 bn.
- Chlor vinyl segment revenues grew by $1.9 \%$ YoY to Rs 5.6 bn; EBIT declined by $11.9 \%$ to Rs 1.7 bn; EBIT margins contracted by 480 bps to $30.6 \%$.
- Sugar segment revenues de-grew by 8.3\% YoY to Rs 4.4 bn; EBIT declined by $169.3 \%$ to Rs 268 mn ; EBIT margins contracted by 1,210 bps to $6.1 \%$.
- Bioseed segment revenues grew by $41.9 \%$ YoY to Rs 1.2 bn; segment reported a profit of Rs 54 mn against a loss of Rs 40 mn in 2QFY19 at EBIT level.
- Fertiliser segment revenues grew by $13.9 \%$ YoY to Rs 2.2 bn; EBIT declined by $14.0 \%$ to Rs 151 mn ; EBIT margins contracted by 170 bps to $5.4 \%$.
- Other segment revenues grew by $3.4 \%$ YoY to Rs 2.1 bn; EBIT grew by $88.6 \%$ to Rs 240 mn ; EBIT margins expanded by 490 bps to $11.6 \%$.

## 1HFY20 performance

- Consolidated Sales, EBITDA and PAT declined by $3.2 \%$ YoY, $11.4 \%$ and $12.2 \%$ to Rs 36.3 bn, Rs 5.6 bn and Rs 3.4 bn, respectively.
- Chlor vinyl segment revenues grew by $7.6 \%$ YoY to Rs 12.5 bn; EBIT declined by $6.7 \%$ to Rs 4.4 bn; EBIT margins contracted by 540 bps to $35.0 \%$.
- Sugar segment revenues de-grew by $16.0 \%$ YoY to Rs 9.2 bn; EBIT grew by $17.5 \%$ to Rs 994 mn; EBIT margins expanded by 310 bps to $10.8 \%$.
- Bioseed segment revenues declined by $21.1 \%$ YoY to Rs 2.9 bn; EBIT declined by $20 \%$ YoY to Rs 350 mn ; EBIT margins expanded by 20 bps to $12.2 \%$.
- Fertiliser segment revenues declined by $6.9 \%$ YoY to Rs 4.4 bn; segment reported a loss of Rs 74 mn against a profit of Rs 262 mn at EBIT level in IHFY19.
- Other segment revenues grew by $7.2 \%$ YoY to Rs 4.3 bn; EBIT grew by $78.1 \%$ to Rs 437 mn; EBIT margins expanded by 400 bps to $10.1 \%$.

## Key highlights from Balance Sheet and Cash Flow statement

- While the short-term borrowings increased by Rs 3.2 bn YoY to Rs 6.0 bn, short-term borrowings increased by Rs 4.7 bn to Rs 10.1 bn.
- Cash flow from operations stood at Rs 7.1 bn in 1HFY20 against Rs 8.7 bn in 1HFY19.
- The company incurred a capex of Rs 3.8 bn against Rs 4.0 in 1HFY19.

## Growth drivers

The two major segments in which the company operates are under pressure. The Chlor vinyl segment is impacted by lower Caustic soda realisations on account of increasing imports. The sugar business is under pressure on account of excess inventory in the market. While the outlook for Caustic soda remains uncertain, Sugar segment may see some relief going ahead on the back of initiatives taken by the government to solve the excess supply scenario in the market by allowing sugar exports as well as incentivising ethanol production. The company is also planning to get into chlorine derivatives to improve ECU realisations; however, nothing concrete has been announced as of now. Revival on the Chlor vinyl segment remains key for the company as the segment contributes more than $70 \%$ at the BEIT level.

## Concall highlights

Performance was subdued on account of lower ECU realisations in chemicals and lower sales of sugar and ethanol.

## Chemicals

The import of caustic soda has gone up post the BIS approvals to international manufacturers; the ECU realisations have dropped significantly and are stable since last two months. About 1.69L MT of caustic soda was imported in 1HFY20; total imports for FY19 was about 2.35L MT. The exports of caustic soda from the country have also been adversely affected due to sharp drop in global caustic prices. Chlorine prices have been volatile as well from negative to Rs $3 / \mathrm{kg}$.
On account of lower prices, the company shut down its operations in Gujarat (about 100 MT capacity) as they do not have a captive power plant there. DCM Shriram (DCMS) does not expect any increase in prices in the short-term. The realisations have fallen from average Rs $33 / \mathrm{kg}$ in FY19 to Rs $26 / \mathrm{kg}$, currently.

New capacities are expected to come up which may cause short-term disturbances in the market. About 1 mn mt would be added over the next two-three years. The capacity expansion is taking place in India and some of the producers in South East Asia. The global growth rate has come down from $2.5 \%$ to $1.5 \%$.

Volumes of caustic soda are up $25 \%$ YoY. ECU realisations are down $20 \%$ YoY and $24 \%$ QoQ; caustic soda flakes price premium over liquid has also dropped sharply. The consumption in the aluminium industry is high and hence they have been importing the material as well. Consumption in the paper industry is lower on account of recycling of the paper.

The company is still waiting for board's approval for chlorine downstream capex.
The company is incurring a capex of Rs 2.5 bn for a coal-based power plant at Kota which would be operational from December. Further, a capex of Rs 10.7 bn would be incurred towards 700 tpd caustic soda expansion at Bharuch and 10 MW power plant.

## Plastics

The domestic PVC prices have improved since April 2019, supported by upward movements in global prices, additional custom duty from July 2019 and favourable currency movements.
Performance has improved YoY as last year was impacted by the issues relating to use of Pet Coke and shut down of one of the power plants at Kota.

## Sugar

The industry continues to face excess supply situation. The carryover stock on September 2019 was about 14.5 mn mt compared to a normal level of about 4.5 mn mt .

Despite the government issuing lower advance estimate for cane production (down $5.6 \%$ ) for the next sugar season, ISMA expects higher production level and even with expected exports of 6 mn mt , there would be excess stock by September 2020; the quota for exports is about $125,000 \mathrm{mt}$ and DCMS would stick to it.

The company is excepting to commission 200 klpd distillery by end of November 2019, thereby providing full integration.

Sugar revenues declined 8\% YoY due to lower volumes in distillery and sugar sales. Sugar volumes stood $6 \%$ lower due to lower releases.

## Capex

The company has completed most of the capex for the projects which would be commissioned in 3QFY20. The company is incurring a capex of Rs 2.5 bn for a coal-based power plant at Kota which would be operational from December. Further, a capex of Rs 10.7 bn would be incurred towards 700 tpd caustic soda expansion at Bharuch and 10 MW power plant; this would be commissioned in April 2021.

## Relative Performance

## Deepak Nitrite

Not Rated

## Continues to benefit from higher DASDA prices...

Deepak Nitrite (DN) headquartered in Vadodara, incorporated in 1970 is a multi-division, multi-product company. DN has global footprint in 21 countries. The company is a market leader for Sodium Nitrite, Sodium Nitrate and Nitro Toulenes in India and among the top three global producers of Xylidines, Cumidines and Oximes. It is also the largest Phenol producer in India.

## 2QFY20 performance

- Consolidated Sales/EBITDA/PAT grew by $117.6 \% / 290.4 \% / 532.7 \%$ YoY to Rs $10.3 \mathrm{bn} /$ Rs $2.5 \mathrm{bn} /$ Rs 1.5 bn , respectively. The revenue and EBITDA declined on sequential basis by $4.5 \%$ and $1.3 \%$ on account of maintenance shut down at the phenol plant.
- Standalone Sales/EBITDA/PAT grew by $31.5 \% / 210.7 \% / 536.5 \%$ YoY to Rs 5.7 bn/Rs 2.13 bn/Rs 1.8 bn, respectively.
- Revenue growth was driven by $118 \%$ growth in the Performance products by DASDA realisation and $17.0 \%$ growth in Basic chemicals as well as revenue from phenolics. Fine \& Specialty products revenue declined by $3.9 \%$ YoY to Rs 1.38 bn.
- Consolidated gross margins expanded by 190 bps YoY to $46.7 \%$. EBITDA margins further expanded by 1,110 bps to $25.0 \%$.
- Margins expanded across segment with 670 bps, 150 bps and 4,050 bps expansion in Bulk chemicals, Fine \& Specialty Chemicals and Performance Products to $24.6 \%$, $27.4 \%$ and $55.1 \%$, respectively.

## Financial highlights

| (Rs mn) | 2QFY19 | 2QFY20 | YoY <br> (\%) | $\mathbf{1 Q F Y 2 0}$ | QOQ <br> (\%) | IHFY19 | IHFY2O | YoY <br> (\%) |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Sales | 4,611 | 10,033 | 117.6 | 10,510 | $(4.5)$ | 9,250 | 20,543 | 122.1 |
| Gross margin (\%) | 44.8 | 46.7 | - | 44.2 | - | 41.0 | 45.4 | - |
| EBITDA | 642 | 2,505 | 290.4 | 2,538 | $(1.3)$ | 1,170 | 5,043 | 331.2 |
| EBITDA margin (\%) | 13.9 | 25.0 | - | 24.2 | - | 12.6 | 24.5 | - |
| Other income | 3 | 78 | 2202.9 | 116 | $(32.4)$ | 12 | 194 | $1,574.1$ |
| Depreciation | 135 | 351 | 160.9 | 332 | 5.8 | 263 | 684 | 159.5 |
| Interest | 130 | 298 | 128.8 | 310 | $(3.9)$ | 248 | 607 | 144.9 |
| PBT | 380 | 1,934 | 408.7 | 2,012 | $(3.9)$ | 670 | 3,946 | 489.1 |
| Tax | 143 | 430 | 201.9 | 696 | $(38.2)$ | 245 | 1,126 | 360.5 |
| Tax rate (\%) | 37.5 | 22.2 | - | 34.6 | - | 36.5 | 28.5 | - |
| Adjusted PAT | 238 | 1,504 | 532.7 | 1,316 | 14.3 | 425 | 2,820 | 563.1 |
| EPS (Rs) | 1.7 | 11.0 | 532.7 | 9.6 | 14.3 | 3.1 | 20.7 | 563.1 |

- PAT came in higher despite higher interest cost (up $129 \%$ YoY to Rs 298 mn ) as well as depreciation (up $161 \%$ YoY to Rs 351 mn ).
- Tax rate came in lower at 22.2\%, against 37\% in 2QFY19.

## 1HFY20 performance

- Consolidated Sales/EBITDA/PAT grew by $122.1 \% / 331.2 \% / 563 \%$ YoY to Rs $20.5 \mathrm{bn} / \mathrm{Rs} 5.0 \mathrm{bn} / \mathrm{Rs} 2.8 \mathrm{bn}$, respectively.
- Revenue growth was driven by $146.7 \%$ growth in the Performance products and $8.9 \%$ growth in Basic chemicals as well as revenue from phenolics business. Fine $\mathcal{\&}$ Specialty products revenue declined by 4.6\% YoY to Rs 2.5 bn.
- Gross margins expanded by 440 bps to $45.4 \%$ and EBITDA margins further expanded by 1,190 bps on account of improved operating leverage.
- Margins expanded across segment with $440 \mathrm{bps}, 20 \mathrm{bps}$ and 1,690 bps expansion in Bulk chemicals, Fine \& Specialty Chemicals and Performance Products to $20.5 \%, 24.9 \%$ and $56.6 \%$, respectively.

## Key highlights from Consolidated Balance Sheet and Cash Flow statement

- Short-term borrowings came down by Rs 58 mn to Rs 2.49 bn, from March 2019, and the long-term borrowings increased by Rs 252 mn to Rs 8.4 bn .
- Cash flow from operations stood at Rs 3.16 bn in IHFY20.
- Incurred a capex of Rs 1.53 bn against Rs 2.78 bn in IHFY19.
- Working capital increased Rs 1.32 bn to Rs 6.1 bn on account of lower trade payables (down Rs 1.26 bn YoY to Rs 3.7 bn in IHFY20) while Trade receivables and Inventories were largely flat at Rs 5.7 bn and Rs 4.16 bn, respectively.

## Growth drivers

The performance of Deepak Nitrite (DN) has been strong in the last couple of quarter on the back of high DASDA realisations coupled with revenue stream from phenol plant. Going ahead, we expect the prices of DASDA to correct on account of capacities restarting in China. The company intends to move towards downstream value-added products in the phenolics division which, we believe would be the next growth driver.

## Concall highlights

The company performed well despite headwinds arising out of US-China trade war, Brexit and slowing Europe economy.
The domestic revenues grew by $22.0 \%$ amidst slowing economic growth as the volume growth across products remained strong.
Exports grew by $52.0 \%$ largely contributed by DASDA. Further, enhanced volumes, diverse customer base and improved product mix contributed to the growth in exports.
The company expects improved performance from each segment in 2HFY20. While the value growth has been significant in recent quarters, the growth going ahead is expected to come in from volume.

## Basic Chemistry segment

The segment revenues grew by $17.0 \%$ YoY and the volume growth stood at $10 \%$ YoY. Strong volume growth accompanied by higher realisations drove the performance of the segment. The profitability has improved and the company expects margins to normalise at $18-20 \%$ going ahead. The company plans to de-bottleneck the capacities which would increase the capacity by $20.0 \%$.

## Fine \& Specialty Chemicals

While the performance for 1Q was subdued, the company maintained its guidance of 15-20\% revenue growth for the year. The sequential growth in the volumes was about $12 \%$ while the value growth was about $8 \%$.

## Performance Products

Performance Products (PP) segment was the key growth driver for the quarter. The growth in revenue was about $119 \%$ YoY and the volume growth was just about $10 \%$. The value growth was on account of high DASDA prices which are expected to sustain till 3Q. Post 3Q, the prices may go down.
OBA continued to do well and the company is deriving benefits of having an integrated OBA-DASDA facility. DN is moving away from their US focus strategy for OBA (which wasn't fruitful) and focusing on domestic and nearby markets.

The DASDA plant is operating at full utilisation levels and the company is able to sell all of its produce in the market, despite the high prices. DN is planning to de-bottleneck the DASDA plant.

## Deepak Phenolics

During the quarter, the company took a planned shut down of about 14 days leading to a decline in the revenue and EBITDA on sequential basis. However, the plant touched capacity utilisation of more than 100\% (adjusting for the shut down) and achieved highest ever level of production in a single day in September 2019.

The spreads during the quarter were lower on account of prolonged monsoon as well as slowdown in the application industry. The company expects the spreads to increase post November as the effect of monsoon diminishes and the growth in the infra and real estate sectors revives.
The margins in the Phenolics division are expects to reach about 14-15\% going ahead. The spreads for the company are higher than normal as the company has more cost effective process technology for production.

The domestic demand continues to be strong as India is a net importer of Phenol.

## Capex and Debt

The company is forward integrating into acetone derivative and the expansion would be completed by the end of FY2OE. The capacity has a potential to generate revenue of about Rs 1.0-1.5 bn at full utilisation level. $25 \%$ of the Acetone would be used captively for the downstream product.
The company is also into the process of acquiring land for their future capex.
The total capex for FY20 would be Rs 4.0 bn, Rs 2.5 bn for standalone entity and Rs 1.5 bn for Deepak Phenolics. The capex for FY21E is expected to be at similar levels.
The net debt/equity for standalone entity stands at $0.18 x$ down from $0.48 x$ and for consolidated entity stands at 0.86x. The company is comfortable at these levels of leverage.

Major Shareholders (\%)

## Fine Organic Industries

Not Rated

## Margin expansion continues...

Fine Organic Industries (FINEORG) is the largest manufacturer of oleochemical-based additives in India and one of the few large players, globally. The company has basket of 400+ products which constitute of wide range of oleochemical-based additives used in food, plastic, cosmetics, paint, ink, coatings, etc.

## 2QFY20 performance

During 2QFY20, FINEORG reported Sales/EBITDA/PAT growth of $3.1 \% / 8.5 \% /$ $74.3 \%$, respectively. In the benign raw material price environment, gross margins have expanded by 330 bps YoY and 100 bps QoQ to 41.1\%; however, EBITDA margin expansion was restricted to 120 bps YoY while contracted by 40 bps sequentially to $23.8 \%$. Depreciation rose by $52.0 \%$ YoY to Rs 65 mn on account of commissioning of third Ambernath facility during the quarter. PAT grew by $74.3 \%$ YoY as the company has exercised the option of lower tax rate and accordingly re-measured its tax expenses.

## 1HFY20 performance

During lHFY20, the company reported Sales/EBITDA/PAT growth of $2.2 \% / 3.4 \% / 21.2 \%$, respectively. Gross margin have expanded by 160 bps YoY to 40.6\%. While EBITDA margin expansion was restricted to 30 bps YoY to $24.0 \%$. Though, other income declined by $13.8 \%$ YoY to Rs 102 mn and depreciation cost increased by $17.2 \%$ YoY to Rs 99 mn , the PAT grew by $21.2 \%$ YoY to Rs 946 mn.

During IHFY20, the company incurred capex of Rs 5.2 bn. cash flow from operations rose from Rs 10.4 bn in 1HFY19 to Rs 15.1 bn in 1HFY20. Cash conversion days have gone up from 69 days to 77 days YoY. This was mainly on account of increase in inventory days from 52 days to 56 days while creditor's days have gone down from 38 days to 32 days.

## Growth drivers

The company has developed strong business model in niche oleochemical-based additives industry on the back of strong R\&D capability, proprietary technology and experienced management team. Going ahead, the company is expected to report healthy growth on the back of ongoing doubling of capacities and healthy demand from the end-user industries. We do not have rating on the stock.

## Galaxy Surfactants

Not Rated

Volume growth led by AMET, margin expansion continues...
Incorporated in 1986, Galaxy Surfactants (GALSURF) has developed secular business through long standing relationships with multinationals, regional and local players. The company emerged as one of the leading manufacturer of surfactants and other specialty ingredients which caters to entire gamut of home and personal care (HPC) industry.

## 2QFY20 performance

During 2QFY20, the company reported volume growth of $10.2 \%$ YoY on the back of $11.2 \%$ and $8.4 \%$ volume growth in performance surfactants and specialty care product segment; however, the sales de-grew by $5.3 \%$ YoY on account of lower lauryl alcohol prices. Gross margin have expanded by 380 bps YoY to $33.3 \%$; however, EBITDA margin expansion was restricted to 90 bps YoY. This resulted into flat EBITDA growth of $1.3 \%$ YoY to Rs 880 mn . PAT grew by $44.8 \%$ to Rs 671 mn on account of lower tax rate of $0.7 \%$ as the company has exercised the option of lower tax rate.

## 1HFY20 performance

During 1HFY20, the company registered overall volume growth of $7.3 \%$ YoY. The volume of performance surfactants and specialty care product segment grew by $5.7 \%$ and $10.0 \%$, respectively; however, sales came in at Rs 13.1 bn , down $6.3 \%$ YoY. Gross margin expanded by 500 bps YoY to $33.3 \%$; however, EBITDA margin contracted by 150 bps YoY to 14.0\%. EBITDA came in at Rs 1.8 bn, up $4.8 \%$ YoY. Adjusted PAT came in at Rs 1.2 bn, up $30.0 \%$ YoY on account of lower tax rate of $16.9 \%$ as against $32.0 \%$ YoY.

During IHFY20, debt-to-equity came down from $0.44 x$ to $0.29 x$ whereas overall working capital days have gone up from 40 days to 48 days. Cash from operating activities has gone up from Rs 857.4 mn to Rs 1.01 bn YoY.

## Growth drivers

GALSURF is the professionally managed company with strong management pedigree and has developed long standing relations with the customers, which provides confidence in the business, while consistent free cash flow generation allows the company to fund capex, pay dividend and reduce debt. In the nearterm, the sales are expected to remain sluggish on account of lower lauryl alcohol prices but the volume growth is expected to remain healthy backed by expansion into new geographies. Further, focus on specialty chemical segment is expected to improve margins of the company in the medium-term.

## Concall highlights

- The company witnessed increase in premiumisation. The premium product demand continues to rise while demand for mass and mastige product was weak. Despite slowdown, the company registered volume growth across regions and is able to log in $10.2 \%$ volume growth.
- EBITDA/MT has come down to Rs 15,654 mainly due to 1) change in product mix, 2) last year in same period the company reported Rs 35.4 mn of forex gain which was absent this year and 3) increase in cost of newly started Jhagadia plant.
- Egypt geography is showing steady recovery. The company registered $29.7 \%$ YoY growth from the region. The growth was on the back of low base. The management expects momentum to continue.
- Raw material prices are currently at multiyear low (6-7 years low). Raw material prices remained stable sequentially while declined by US\$ 200/MT YoY. Any disruption in weather or harvesting would impact the palm oil plantation which in turn would increase the raw material prices. The management expect raw material prices to move up slightly and then stabilise.
- In India, sales from performance surfactant and specialty chemicals segment accounts in the ratio of 80:20. In India, mass and mastige products are sold in bulk; however, the premiumisation trend is slowly gaining traction. Rest of the world continued the volume growth momentum.
- The company has witnessed good growth coming in from baby care, mens grooming and natural products and also witnessed emergence of smaller players on e-commerce platform.
- The company has guided for $6-8 \%$ volume growth in FY2O and full year tax rate of $\sim 25 \%$.
- During IHFY20, the company incurred capex of Rs 700 mn and is expected to spend the similar amount in 2HFY2O.
- In Egypt, the company sells performance surfactants to the tier-l customers. The customers in Egypt are slowly gaining their market share which was loosed earlier.
- The company has been reviewing projects for inorganic expansion but nothing is on plate as of now. During 2QFY20, the overall capacity utilisation stood at 63\%.

Relative Performance

## Gujarat Alkalies and Chemicals

Realisations under pressure; recovery uncertain...
Gujarat Alkalies and Chemicals Ltd. (GALK) was established in 1973 and over a period of time, it has emerged as one of the largest producers of Caustic Soda in India. The company produces 35 different products which include Chloromethanes, Sodium Cyanide, Caustic Potash (Lye and Flakes), Potassium Carbonate, Hydrogen Peroxide, Phosphoric Acid, Poly Aluminium Chloride, Aluminium Chloride, Chlorinated Paraffins, Benzyl Alcohol, Sodium Chlorinate and other chemicals.

## 2QFY20 performance

- Sales/EBITDA/PAT declined by $9.4 \% / 45.6 \% / 41.5 \%$ YoY to Rs 6.9 bn/Rs 1.5 bn/Rs 1.0 bn , respectively. The revenue was impacted on account of high base as well as poor realisation on account of over-supply in the market due to large amount of imports from now BIS compliant international companies.
- Gross margins contracted by 1,180 bps to $61.6 \%$ on account of poor realisation in Caustic soda. EBITDA margins further contracted by 1,410 bps to $21.7 \%$ as the employee cost as well as other expenses as $\%$ of net sales went up by 30 bps and 260 bps YoY. The margins are; however, expected to stay at current levels.

| Adjusted EPS (Rs) | 23.8 | 13.9 | $(41.5)$ | 21.6 | $(35.6)$ | 48.8 | 35.6 | $(27.1)$ |

- PAT declined despite $163.7 \%$ increase in other income and $17.2 \%$ decline in interest cost. Depreciation was higher at Rs 383 mn, up 7.7\%.
- Tax rate was lower at 30.2\% against 31\% in 2QFY19.

## 1HFY20 performance

- Consolidated Sales/EBITDA/PAT declined by $5.1 \% / 28.7 \% / 27.1 \%$ YoY to Rs $14.4 \mathrm{bn} / \mathrm{Rs} 4.03 \mathrm{bn} / \mathrm{Rs} 2.6 \mathrm{bn}$, respectively.
- Gross margins contracted by 570 bps to $66.8 \%$ and EBITDA margins further contracted by 920 bps to 27.9 on account of poor operating leverage.

## Key highlights from Balance Sheet and Cash Flow statement

- The long-term borrowings came down by Rs 660 mn YoY to Rs 1.6 bn, while short-term borrowings decreased marginally by Rs 29 mn to Rs 24 mn.
- Cash flow from operations stood at Rs 4.21 bn against Rs 5.3 bn in 1HFY19; the company incurred a capex of Rs 1.1 bn in 1HFY20 against Rs 2.9 bn in 1HFY19.

## Growth drivers

The performance of the company has been impacted significantly on account of operations impacted due to heavy flooding, pressure on prices due to large imports and high base. In order to improve realisation, the company has taken up new projects towards chlorine derivatives such as Aluminium chloride, Chlorotoulene, etc. which would lead to ECU realisation improvement. The Rs 20.0 bn project with National Aluminium Company (Nalco) is moving as per schedule. Nalco has agreed to purchase at least $50 \%$ of the produce. Recovery in the prices remains a key challenge for the company.

## Management commentary

- The plant was shut for 5 days due to heavy flooding; however, the major impact was on account of fall in the demand as well as increase in the imports as the international companies (Japanese, Iranian, etc.) are getting BIS complaint.
- The aluminium projects which the company expected to come online have been delayed; these projects are expected to come on-stream in FY21. All the capex plans are as per schedule.
- The revenue growth for 2HFY20 would be subdued; however, the margins are expected to remain at 2223\% level.
- Last year, due to BIS non-compliance, the imports were lower and the company was able to sell huge quantities to importers like Vedanta. This has stopped as they have started importing caustic soda again.

Relative Performance

## Meghmani Organics

Not Rated
Falling realisations dent profitability...
Meghmani Organics (MEGH) has diversified business operations with presence in Pigments, Agrochemicals and Basic Chemicals. MEGH has vertically integrated operations in the Agrochemicals including intermediate, technical grade and formulations (bulk and branded) and has the 4th largest Caustic-Chlorine capacity in India.

## 2QFY20 performance

- During the quarter, net sales grew by $6.2 \%$ YoY to Rs 5.32 bn. While EBITDA declined by $5.6 \%$ YoY to Rs 1.1 bn, PAT grew by $53.9 \%$ YoY to Rs 844 mn as the company adopted new tax rate regime.
- While decent revenue growth came in across all the segments (largely driven by volumes); profitability across all the segments was under pressure.
- Though, pigment production during the quarter was lower, revenues grew (up $6.4 \%$ YoY to Rs 1.64 bn ) on account of higher sales volume (up $18.0 \%$ YoY). Realisations declined by $11.6 \%$ YoY and EBIT declined by $8.2 \%$ to Rs 213 mn ). EBIT margins contracted by 200 bps to $13 \%$. Exports declined by $7.6 \%$ YoY to Rs 1.2 bn while domestic sales grew by $79.5 \%$ to Rs 444 mn .

- Volumes in agrochemicals grew by $26.5 \%$ YoY; however, lower realisation limited segment revenue growth to $12.6 \%$ YoY (Rs 2.18 bn ). EBIT grew by $9.6 \%$ to Rs 488 mn . EBIT margins contracted by 60 bps to 22.4\%. Domestic revenues declined by 19.6\% YoY to Rs 546 mn while exports grew by $30.0 \%$ YoY to Rs 1.6 bn.
- Basic chemicals segment reported strong volume growth of $37.6 \%$; however, Revenue growth of $4.4 \%$ was impacted due to falling realisation during the quarter. EBIT declined by $9.8 \%$ to Rs 400 mn . EBIT Margins contracted by 390 bps YoY to $25.0 \%$. Exports of basic chemicals declined by $47.8 \%$ to Rs 64.1 mn while domestic revenues grew by $8.9 \%$ to Rs 1.5 bn.

## 1HFY2O performance

- Net sales/EBITDA/PAT for the period grew by $17.5 \% / 1.9 \% / 19.2 \%$ YoY to Rs $11.5 \mathrm{bn} /$ Rs $2.5 \mathrm{bn} / \mathrm{Rs} 1.41$ bn during the period.
- Revenues from the pigment segment grew by $8.3 \%$ YoY to Rs 3.2 bn was driven by volumes growth of $18.0 \%$. Realisation declined by $\sim 9.7 \%$ and EBIT declined by $16.8 \%$ to Rs 358 mn . Margins contracted by 330 bps. Exports declined by $3.6 \%$ to Rs 2.6 bn while domestic sales grew by $62.4 \%$ to Rs 873 mn .
- Revenues from agrochemicals grew by $44.0 \%$ to Rs 5.1 bn led by $24.6 \%$ volume growth. EBIT grew by $14.7 \%$ to Rs 920 mn while margins contracted by 460 bps to $18 \%$ on account of poor margins of $14.8 \%$ in 1QFY20. Growth in the revenue was driven by exports which grew by $68.1 \%$ to Rs 3.9 bn while domestic sales declined by $2.6 \%$ to Rs 1.2 bn.
- Basic chemicals segment reported strong volume growth of 21.9\%; however, Revenue growth of 2.9\% was impacted due to falling realisation during the period. EBIT remained flat at Rs 1.1 bn . EBIT margins contracted by 90 bps to $31.7 \%$. Exports of basic chemicals declined by $17.7 \%$ to Rs 133 mn while domestic revenues grew by $4.0 \%$ to Rs 3.2 bn.

## Key highlights from Balance Sheet and Cash Flow statement

- Long-term borrowings went up by Rs 1.7 bn YoY, while short-term borrowings came down by Rs 961 mn .
- The company incurred a capex of Rs 2.86 bn as compared to Rs 1.27 bn YoY.
- Cash generated from operations in 1HFY20 was about Rs 3.3 bn as against Rs 1.87 bn in 1HFY20.
- Working capital came down by Rs 383 mn as trade payables went up by Rs 600 mn to Rs 3.18 bn while inventories went up by just Rs 214 mn . Trade receivables were flat at Rs 4.14 bn .

## Growth drivers

The company is incurring capex of Rs 1.27 bn in Agrochemicals ( $2,4 \mathrm{D}$ capacity doubling, to be operational by June 2020) and Rs 6.4 bn in Chlor Alkali segment in 3 phases to be completed by 4QFY20. In the first phase, the company completed the expansion of the CMS facility by 50,000 mtpa in July 2019 to produce MDC, Chloroform and Carbon Tetra Chloride. In the second phase, the company would expand the caustic soda facility to 271,600 mtpa and CPP capacity to 96 MW which is expected to be operational by 4QFY20. In the last phase, the company is setting up Hydrogen Peroxide capacity of $30,000 \mathrm{mtpa}$ which is also expected to come up by 4QFY20.

## Neogen Chemicals

Not Rated

## Strong growth continues....

Neogen Chemicals Limited (NEOGEN) started its operations in 1991, is one of India's leading manufacturers of bromine and lithium-based specialty chemicals. The company has fungible manufacturing plants located in Mahape, Maharashtra and Vadodara, Gujarat. The company's products are mainly used in Pharmaceutical, Agrochemicals, Refrigerants, Construction chemicals, Aroma chemical, Speciality polymer and Electronic-chemical industries.

## 2QFY20 performance

During 2QFY20, the company reported sales growth of $34.5 \%$ YoY to Rs 771 mn . The sales growth was on the back of $53.6 \%$ YoY growth in organic chemicals segment; however, Inorganic chemicals segment reported sales de-growth of $15.1 \%$ YoY. Gross margins contracted by 380 bps YoY to $38.8 \%$; however, lower other expenses (down $10.7 \%$ YoY to Rs 105 mn ) allowed the company to register EBITDA margin expansion of 160 bps YoY. EBITDA grew by $47.5 \%$ YoY to Rs 148 mn . Other income declined by $73.3 \%$ YoY to Rs 0.45 mn while Interest cost declined by $13.3 \%$ YoY to Rs 26 mn . Depreciation cost rose by $86 \%$ YoY to Rs 13.0 mn while tax rate has gone up YoY from $24.0 \%$ to $29.4 \%$, which restricted PAT growth to $53.4 \%$ YoY. The company has not yet adopted the new tax regime.

## 1HFY20 performance

During 1HFY20, the company reported sales of Rs 1.45 bn, up 47.4\% YoY. The growth is on the back of $65.0 \%$ and $5.0 \%$ growth in Organic and Inorganic segment, respectively. Gross margin contracted by 290 bps YoY to $39.6 \%$. However, lower other expenses allowed EBITDA margin expansion of 110 bps YoY to $18.6 \%$. EBITDA grew by $56.6 \%$ YoY to Rs 263 mn . Other income declined by $64.7 \%$ YoY to Rs 1 mn while interest and depreciation cost increased by $4.3 \%$ and $73.1 \%$ YoY to Rs 58 mn and Rs 22 mn , respectively. Further, increase in tax rate from $23.3 \%$ to $28.4 \%$ YoY restricted PAT growth to $66.9 \%$ YoY to Rs 132 mn . The company has adopted IND AS116, due to which profit before tax for IHFY2O is lower by Rs 2.55 mn .

During IHFY20, the company incurred capex of Rs 48.8 mn . Debt-to-equity improved from 1.64 x in 4QFY19 to $0.64 x$ in 2QFY20. Inventories have gone up from Rs 724 mn in 4QFY19 to Rs 1.09 bn in 2QFY20. Cash outflow from operating activities have gone up from Rs 586 mn to Rs 1.76 bn YoY.

## Growth drivers

The company has been focussing on establishing core competencies, building on research capabilities and expanding product portfolio with newer compounds. With capacity expansion, the company is well poised to capture opportunities in organic as well as inorganic chemicals. Post doubling of the capacity at Dahej, the revenues are expected to increase in line with capacities. Further, improved focus on advanced intermediate and custom synthesis business would likely to improve the margins of the company. Currently, we do not have rating on the stock.

## Concall highlights

- The quarter witnessed, healthy growth on lower base as major overhaul got completed in 1HFY19. Both plants are operating at high utilisation since 2HFY19.
- The company witnessed positive demand from the customers and higher capacity utilisation which improved performance during the quarter.
- Lithium prices have come down which were passed on to the customers. This resulted into lower sales from Inorganic segment. Currently, the lithium prices are very volatile and are changing on quarterly basis as against yearly basis earlier.
- The management expects revenue of Rs 3.0 bn in FY20. Second half of every year remains strong compared to first half. Expect revenue of Rs 1.6 bn in 2HFY20. The management continues to maintain EBITDA margin guidance of $18.5 \%$.
- To utilise capacity continuously and support the demand in 2HFY20, the inventory has gone up. The inventory days are expected to come down in second half and will be in line with the last year. The company is trying to improve upon the receivable days.
- With improvement in product mix as well as scale, the inventory days would reduce from 120 days to 100 days.
- The company has been spending Rs 150 mn for expansion of inorganic chemical capacity by 1,200 mtpa. The trial runs for the same have started and expect the commercial production from 4QFY20. For organic chemicals, the company would be spending Rs 700 mn to expand capacities by 126,000 litres which is expected to come on stream in December 2020. The work on organic chemical plant will start soon.
- The company does not have capacity to support growth in FY21; however, if organic chemical capacity comes on stream during December 2020, then it will add to the revenue from 4QFY21 onwards. New inorganic chemical capacity is expected to add revenue of $\sim$ Rs 200 mn in FY21.
- The company has planned to support demand coming in for new organic capacity from both new as well as existing customers.
- The company has availability of land both at Dahej and Vadodara for future expansion. The company will look for the demand scenario once the organic capacity comes on stream and then take a decision for new capex.
- Advanced intermediate business contributed ~26\% during IHFY20.
- There are many products at different stages in R\&D which has huge revenue potential.
- The company has large customer base from the pharmaceutical industry. In the last two-three years, the company witnessed growth mainly from pharmaceutical industry. Going ahead, with new organic capacity, customers from the agrochemical industry are expected to increase.

Removal of ADD and slowdown in auto impacts performance... NOCIL Limited (NOCIL) is the largest rubber chemical manufacturers in Indiawithmorethanfour decades of experience.NOCIL hasmanufacturing facilities at TTC Industrial Area in Navi Mumbai, Maharashtra and Dahej, Gujarat. The products of the company are mainly consumed by tyre industry.

## 2QFY20 performance

During 2QFY20, the company reported sales of Rs 2.1 bn, down by $22.9 \%$ YoY. Gross margins expanded by 160 bps YoY and 130 bps QoQ to $57.7 \%$; however, EBITDA margins have contracted by 590 bps YoY to $23.1 \%$ due to negative operating leverage resulting into EBITDA decline of $38.6 \%$ YoY to Rs 485 mn . Though, other income declined by $35.3 \%$ YoY to Rs 21 mn and depreciation cost increased by $43.6 \%$ YoY to Rs 80 mn , the company reported PAT growth of $4.0 \%$ YoY as it exercised the option of lower tax rate and accordingly reversed deferred tax of Rs 240 mn .

## 1HFY20 performance

During 1HFY20, the sales were down by $18.7 \%$ YoY to Rs 4.4 bn. Gross margins expanded by 110 bps YoY to $57.0 \%$; however, EBITDA margins contracted by 550 bps YoY to $23.9 \%$. EBITDA declined by $34.4 \%$ YoY to Rs 1.04 bn. Though, depreciation cost rose by $39.2 \%$ YoY to Rs 154 mn , lower tax rate of $5.5 \%$ restricted the PAT decline of 15.2\% YoY to Rs 879 mn.

During 1HFY20, the company capitalised capex of Rs 143 mn . Cash conversion days have moved up from 45 days to 62 days YoY due to increase in inventory days by 57 days to 67 days YoY while debtors days have gone up from 84 days to 89 days. Net cash flow from operating activities has gone up from Rs 777 mn to Rs 1.3 bn YoY.

## Growth drivers

The company's performance has been impacted by slowdown in auto sector and removal of antidumping duty (ADD). However, expected commercial production from Phase-II, Dahej plant from 4QFY20 onwards would improve volumes. Further, revival in auto industry remains key as it would lead to better utilisation and positive operating leverage. We do not have rating on the company.

## Concall highlights

- Volumes declined by $8 \%$ during 1HFY20. The management has guided for 0\% to 5\% de-growth for FY20.
- The domestic volume de-growth of $8 \%$ during the quarter coupled with two months without ADD on few products has impacted sales. The management expects sequentially flattish trend in 3QFY20.
- The company reported $10 \%$ volume growth in exports.
- Better product mix and stable raw material prices helped the company to report gross margin expansion.
- The company has exported $\sim 500$ MT and is targeting $1,500 \mathrm{MT}$ to the US.
- ADD is still sub-judice and pending in Supreme Court. ADD on some of the products is removed after July 2019. Post removal of ADD, the prices have come down which has affected the realisations. Impact of expiry of ADD is about Rs 450 mn per annum.
- The company has completed the Phase-I and Phase-II capex worth Rs 4.25 bn. The Phase-I came on stream in January 2019 while the Phase-Il capacities are on trial runs. The commercial production is expected post approval from the customers.
- The capacity ramp-up is delayed due to slowdown in auto sector.
- From end of September 2019, the Chinese domestic rubber prices remained stable. Imports of rubber chemical in India remained steady; however, the end user market has shrunk which resulted in poor domestic volumes.
- International prices of rubber chemicals have been correcting in the last three-four quarters. The management opines the prices to have bottomed out.

Not Rated
Poor demand from tyre industry impacts performance...
Phillips Carbon Black Limited (PCBL) incorporated in 1962, is a part of RPSanjiv Goenka Group, and is India's largest carbon black producer and 7th largest carbon black company globally by sales. The company provides a complete portfolio of products to meet the specific end requirements across Rubber, Plastics, Coatings, Inks and other niche industries, globally.

## 2QFY20 performance

During the quarter, domestic demand was weak led by the weakness in tyre industry. However, the company was able to push volumes in the international markets with export volumes registering a growth of $35 \%$ YoY. The overall volume grew by $4.7 \%$ YoY and $2.9 \%$ QoQ. Sales at Rs 8.6 bn, were down $2.0 \%$ YoY while gross margin contracted by 460 bps YoY; however, expanded by 190 bps QoQ to $32.7 \%$. Better product mix and customer segmentation led to rise in margins QoQ. EBITDA came in at Rs 1.2 bn, down $26.6 \%$ YoY while EBITDA margin contracted by 500 bps YoY to 14.9\%. Though, interest cost increased by $27.5 \%$ YoY to Rs 91 mn, lower tax rate of $24.8 \%$ as against $29.7 \%$ during last year restricted the decline in PAT by $28.3 \%$ YoY to Rs 775 mn .

## 1HFY20 performance

During 1HFY20, sales came in at Rs 17.7 bn, up $6.8 \%$ YoY. Gross margin contracted by 550 bps YoY to $31.7 \%$ while EBITDA margins further contracted by 640 bps YoY to $13.6 \%$. EBITDA came in at Rs 2.4 bn, down $27.2 \%$ YoY. Though interest cost increased by $42.1 \%$ YoY to Rs 218 mn , higher other income of Rs 140 mn , up $85.7 \%$ YoY and lower tax rate of $24.3 \%$ as against $29.3 \%$ during $1 H F Y 19$ restricted the PAT de-growth by 29.9\% YoY to Rs 1.44 bn.

During $1 \mathrm{HFY} 2 \mathrm{O}, \mathrm{D} / \mathrm{E}$ ratio was down from 0.43 x to 0.33 x . The company repaid Rs 430 mn of non-current borrowings and Rs 4.04 bn of current borrowings which resulted into net cash outflow from financing activities of Rs 1.75 bn. Net cash flows from operating activities stood at Rs 2.87 bn.

## Growth drivers

In the short-term, slowdown in the automobile and tyre industry would continue to impact the company's performance; however, the company is expected to partially mitigate the impact by focussing on export market and increase sale of high performance, high margin products. Going ahead, the company's thrust on expansion of high margin specialty carbon products along with timely commercialisation of 30,000 MT brownfield project of specialty carbon black at Palej in 3QFY20 and likely recovery in auto industry during FY21 would improve the overall performance of the company.

## Management commentary

- The company was able to achieve a higher capacity utilisation of $90 \%$ in 2QFY20.
- Power realisations remained flat at Rs 3.14/unit in 2QFY20 with sale volumes of 75 MU .
- Continued focus on R\&D led to increased sales volume from the Specialty Carbon Black portfolio which stood at 5,300 MT during the quarter.
- The company is witnessing weak demand from the domestic tyre market. The company has been focusing on export market to maintain volumes.
- The company continues to expand its product portfolio of high-performance high-margin grades for both rubber and specialty black applications.

## Relative Performance

## S H Kelkar and Company

Not Rated

## Raw material price stabilises, recovery in sight

S H Kelkar and Company Limited (SHKL) is the largest Indian-origin Fragrance and Flavour company which produces $9,700+$ products. Its fragrance products and ingredients are used as a raw material in personal wash, fabric care, skin and hair care, fine fragrances and household products. Its flavour products are used as a raw material by producers of baked goods, dairy products, beverages and pharmaceutical products. The company offers products under SHK, Cobra and Keva brands.

## 2QFY20 performance

During 2QFY20, the company reported sales at Rs 2.76 bn, down $2.1 \%$ YoY, this was on the back of flat YoY sales in Fragrance segment to Rs 2.5 bn while Flavours segment reported de-growth of $24.6 \%$ YoY to Rs 212 mn . Gross margin expanded by 40 bps YoY to 42.7\%. EBITDA margin has also expanded in line with gross margin to $13.8 \%$. EBITDA came in at Rs 383 mn, up 1.4\% YoY. EBIT margin of Fragrance division declined from $14.4 \%$ to 10.6\% YoY whereas for Flavours segment it increased from 8.1\% to 12.4\% YoY. Adjusted PAT came in at Rs 154 mn , down $46.5 \%$ YoY mainly on account of increase in interest cost by $277.2 \%$ YoY to Rs 71 mn and increase in tax rate from $14.7 \%$ to $19.5 \%$ YoY.

## 1HFY20 performance

During 1HFY20, sales came in at Rs 5.5 bn, up $5.7 \%$ YoY. Gross margin contracted by 40 bps YoY to $42.6 \%$; however, EBITDA margin expanded by 180 bps YoY to $15.4 \%$. EBITDA came in at Rs 846 mn , up $19.8 \%$. Other income declined by $76.1 \%$ YoY to Rs 20 mn while interest cost increased by $315.6 \%$ YoY to Rs 141 mn . Further, increase in tax rate from $28.1 \%$ as against $24.3 \%$ in 1HFY19, resulted into adjusted PAT de-growth of $28.7 \%$ YoY to Rs 339 mn .

During IHFY20, D/E ratio increased from $0.32 x$ to $0.51 x$ YoY. The company incurred capex of Rs 700 mn while cash from operating activities declined to Rs 276 mn against Rs 378 mn YoY.

## Growth drivers

The company witnessed poor growth on account of weak FMCG demand in the domestic market. With stabilisation of raw material situation globally along with the steps taken by the company to reduce the cost of producing ingredients by shifting production from Netherlands to India and increase in exports of high value-added products, is expected to improve the operating performance of the company. However, higher inventory level remains the key concern. We do not have rating on the stock.

## Concall highlights

- During 2QFY20, the promoters have bought 0.2 mn shares which increased promoters holding from $56.91 \%$ to $57.49 \%$. The promoters also released pledge on 5.55 mn shares. Remaining pledge on 0.33 mn shares would be released in due course.
- In the Fragrance business, the company reported 6\% decline in the volume due to subdued demand. While international business witnessed $15 \%$ growth.
- In the Flavours business, domestic market witnessed de-growth of $54 \%$ mainly on account of seasonality as well as poor demand during Diwali.
- The company remains hopeful of achieving $12 \%$ volume growth. The $12 \%$ volume growth may not translate into $12 \%$ sales growth on account of declining realisations. The selling prices of the products are correcting due to benign raw material price.
- Raw material pressure eased during the quarter and also the raw material availability improved in the last 1-1.5 months.
- The company has taken steps for inventory reduction which would free up cash of Rs 300 mn . Also, the management expects tax related dues to get refunded in 2HFY20 which will further add cash to the business. The management is targeting Rs 1.35 bn free cash flow by end of FY20.
- Net debt has gone up from Rs 3.4 bn to Rs 4.0 bn. The company intends to reduce the debt level with generation of free cash flow.
- In 2QFY20, the company reported Rs 60 mn of non-recurring cost on account of some changes in organisation. It includes change in employee cost structure (added variable cost component) and one time freight and forwarding cost for transport of inventories/equipment as Mahad facility came on stream.
- The capacity utilisation of Mulund plant was at $50 \%$ while utilisation at other facilities stood at $75 \%$. The Netherlands facility is running at very low capacity utilisation.
- The management expects EBITDA margin to recovers to $18-20 \%$ in the next two quarters. The company is on track to achieve Rs 1.0 bn revenue in the next four-five quarters. It has been taking steps to achieve it through product development, organisation restructuring, etc.

SECTOR UPDATE

- Inventory levels stays normally in the range of three-four months, as the company receives some raw material once in the year and some products needs to be produced at once depending on the requirements.

## Relative Performance

## Tata Chemicals

Not Rated

Focus shifts towards specialty chemicals...
Tata Chemicals (TTCH) is one of the largest producers of Soda Ash globally and operates under 3 segments viz. Basic Chemistry Products, Consumer Products and Specialty Products. The company was started as Okhamandal Salt Works in 1927 and then was taken over by Tatas to incorporate Tata Chemicals Ltd. In 1994, a fertiliser plant was set up at Babrala. In 2003, TTCH acquired Hind Chemicals and got an entry into DAP and other complex fertilisers. TTCH operates in North America, Europe and Kenya through its subsidiaries. In 2018, the company completely exited from the fertiliser business and shifted their focus towards consumer products and specialty chemicals. In 2019, the company announced the transfer of consumer business to Tata Global Beverages Ltd. and plans to become a specialty play company. The transaction would be completed in 2020.

## 2QFY20 performance

- Consolidated revenues grew by only $4.1 \%$ YoY to Rs 30.8 bn on account of subdued standalone revenue growth (up $0.7 \%$ YoY to Rs 10.2 bn) coupled with decline in Tata Chemicals Europe revenues (down 4.5\% YoY to Rs 3.4 bn). TCNA revenues grew by $3.3 \%$ YoY to Rs 8.9 bn while Magadi and Rallis reported strong revenue growth of $8.6 \% \mathrm{YoY}$ and 14.2\% YoY respectively to Rs 1.4 bn and Rs 7.5 bn.

- Gross margins contracted by 300 bps YoY while EBITDA margins expanded by 30 bps on account of improved operating leverage (energy costs in India have started to normalise).
- EBITDA and PAT grew by $5.5 \%$ and $10.3 \%$ YoY to Rs 6.3 bn and Rs 3.5 bn, respectively.
- Basic Chemistry revenue grew by $1.0 \%$ YoY to Rs 20.5 bn; EBIT grew by $27.9 \%$ YoY to Rs 3.5 bn; EBIT margins expanded by 360 bps YoY to $17.3 \%$.
- Consumer products revenue grew by 11.7 \% YoY to Rs 5.1 bn; EBIT declined by $15.0 \%$ YoY to Rs 734 mn; EBIT margins contracted by 450 bps YoY to 14.3\%.
- Specialty products revenue grew by $13.7 \%$ YoY to Rs 7.6 bn; EBIT declined by $15.9 \%$ YoY to Rs 884 mn ; EBIT margins contracted by 410 bps YoY to $11.6 \%$.

## 1HFY20 performance

- Consolidated Revenue/EBITDA/PAT grew by $4.8 \% / 12.3 \% / 14.2 \%$ YoY to Rs $59.8 \mathrm{bn} / \mathrm{Rs} 12.3 \mathrm{bn} / \mathrm{Rs} 6.0 \mathrm{bn}$, respectively.
- Gross margins contracted by 40 bps YoY to $79.1 \%$ on account of lower margins in 2QFY20.
- EBITDA margins expanded by 130 bps YoY to $20.5 \%$ on account of lower base impacted by poor 1QFY19 margins.
- Basic Chemistry revenue grew by 1.1\% YoY to Rs 39.9 bn; EBIT grew by 21.7\% YoY to Rs 6.7 bn; EBIT margins expanded by 280 bps YoY to 16.8\%.
- Consumer products revenue grew by $12.3 \%$ YoY to Rs 10.1 bn; EBIT declined by $13.5 \%$ YoY to Rs 1.5 bn; EBIT margins contracted by 430 bps YoY to 14.5\%.
- Specialty Products revenue grew by $11.5 \%$ YoY to Rs 13.9 bn; EBIT declined by $4.8 \%$ YoY to Rs 1.6 bn; EBIT Margins contracted by 200 bps YoY to $11.8 \%$

## Key highlights from Balance Sheet and Cash Flow statement

- Long-term borrowings came down by Rs 23.5 bn to Rs 32.4 bn while short-term borrowings went up by Rs 247 mn to Rs 1.64 bn.
- Tata Chemicals (TTCH) incurred a capex of Rs 6.2 bn in 1HFY20 against Rs 4.3 bn in 1HFY19; cash flow generation from operations was about Rs 11.5 bn against Rs 7.6 bn in 1HFY19.
- Working capital in 1HFY20 increased by Rs 1.7 bn to Rs 17.2 bn; inventories increased by Rs 1.58 bn to Rs 16.43 bn while trade receivables and payables decreased by Rs 323 mn and Rs 436 mn , respectively, to Rs 16.4 bn and Rs 15.6 bn.

## Growth drivers

While the Soda Ash business is expected to be under pressure in the short-term, the demand supply in the medium-term is expected to be tight. Many large players have globally have announced large capacity expansions in the last couple of months which would be coming on-stream over the next 18-24 months years. This reaffirms that the companies expect tightness in Soda ash market. The next leg of growth is expected to come in from the specialty chemicals division as the Nutraceutical and Specialty Silica facilities as well as Rallis' Metribuzine facility is expected to come on-stream by the end of FY20E. The Lithium battery project is still in a pilot stage.

## Concall highlights

## Basic Chemistry

- Indian operations revenue were lower on account of routine maintenance carried out at the plant
- The margins however expanded on the back of higher realisations as well as declining energy costs; the energy costs which had gone up significantly have been declining since a couple of quarters and have stabilised.
- Further, the market continues to be balanced, as all the new capacities have been absorbed in the market.
- Tata Chemicals Europe revenues were lower as the company stopped trading of Soda Ash; however, the margins expanded as most of the EBITDA is contributed by the salt business which performed well.
- TCML and TCNA performance improved as the sales volume as well as realisation of soda ash improved.
- The company has taken price increases in the North America region and these new prices would kick in as the contracts renew further.
- The realisations for Magadi improved as the contracts got renewed at the higher prices of South East Asia; $1 / 3$ rd of the revenue come in from long-term contracts; 1/3rd comes in from three-six months contracts and rest is based on spot prices.
- The domestic auto industry contributes about $15 \%$ to the soda ash revenue and hence six-eight months of soda ash won't make a difference. Slowdown in consumer goods demand would lead to a shift towards value products - low value detergent - where the content of soda ash is higher thereby beneficial for soda ash manufacturers.
- The TCNA plant usually operates at a low utilisation level in winters; however, after certain modifications, the plants are expected to run at optimal capacities in winter and the company expects to achieve its target on annual basis.
- The domestic soda ash market is current at 4 mn MT and growing at 4-5\%.
- The company does not expect to take any price cuts in the domestic market.
- The planned capex to be incurred at Mithapur is about Rs 24.0 bn out of which Rs 10.0 bn has already been incurred; most of the capex is expected to come online by the end of FY22E.
- The capex announced by the global companies will take at least three years to come online and the demand, at this rate, is expected to catch up by then.

## Specialty Products

- The revenue from the pilot plant of Nutraceutical was about Rs 119 mn . The large scale commercial plant at Nellore is undergoing trial production.
- The Silica plant at Cuddalore is expected to commence commercial production by the end of FY20E.
- Majority of the revenue stream in the Specialty Products comes in from Rallis. EBITDA margin for the quarter impacted due to higher input prices and higher competitive intensity, in select products both in India and Internationally exerted pressure on the margins and profitability.
- The metribuzine capacity - $50 \%$ of it has come on-stream while rest of it is expected to come on-stream by the end of the year.
- The asset turnover for the Nutraceutical and Materials business is about 1.7-2.0x.
- The company has planned a capex of Rs 2.5 bn for Nutraceutical and Materials each, out of which it has fully incurred the capex for Nutraceutical business and about Rs 1.5 bn for Materials business.
- The company is foraying into energy business and planning to incur a capex of Rs 8.0 bn over the years to set up a 2 GW plant, starting with a 300-350 MW plant for 1/3rd of the cost; The land has been allotted the company at Dholera, can be used to set up a plant up to 5-6 GW.
- The company has currently recycled about 500 kg of batteries and plans to set up a facility to recycle 500 MT of batteries.

## Consumer business

- The business was impacted by higher marketing spends in order to push volumes
- The business was also impacted by certain one off fixed cost related to transactions (de-merger); the transaction cost YTD is about Rs 70 mn and by the end of the year it is expected to be about Rs 150 mn .
- The company has received nod from the shareholders for the de-merger and now would be working towards completing further formalities with NCLT.
- The revenue growth in the pulses and spice segment was about $25 \%$.

## Other highlights

- Other income was lower on account of following factors:
o Timing of dividend received Rs 240 mn in 1QFY20 which the company received in 2Q of last year.
o Last year, the company received one-off income tax repayment of about Rs 120 mn .
o The bank income reduced by Rs 150 mn .
- Tax rate: the company had Rs 390 mn of deferred tax liability on their balance sheet which brought down the effective tax rate.
- The strategy of the company is to improve the RoCE of Basic Chemistry at all locations and invest in growing the Specialty Products.

## Relative Performance

## Thirumalai Chemicals

Not Rated
Sluggish demand and volatility in raw material prices impacted performance...
Thirumalai Chemicals Limited (TMC) was set up in 1972, is the second largest producers of Phthalic Anhydride (PA) in India with market share of $\sim 40 \%$ and produces Maleic Anhydride in India and Malaysia. The company has distinctive characteristic of producing food ingredients from effluent of PA.

## 2QFY20 performance

During 2QFY20, the company reported sales at Rs 2.7 bn, down 26.1\% YoY. Gross margin contracted by 980 bps YoY to $30.5 \%$ while EBITDA margin contracted by 1,570 bps YoY to $8.5 \%$ mainly on account of higher other expenses and increase in employee cost by $\mathbf{1 0 . 5 \%}$ YoY. EBITDA came in at Rs 229 mn, down 74.0\% YoY. Though, interest cost increased by 55.4\% YoY to Rs 72 mn , other income increased by $71.9 \%$ YoY to Rs 72 mn which restricted the decline in PAT to Rs 121 mn, down 61.4\% YoY.
During the quarter, the company has invested $€ 25,000$ (Rs 20.03 mn ) in TCL Global BV, a wholly owned subsidiary located in Amsterdam, Netherlands.

## 1HFY20 performance

During IHFY20, sales came in at Rs 5.6 bn, down $10.2 \%$ YoY. Gross margin contracted by 1,160 bps YoY to $30.7 \%$ while EBITDA margin contracted by 1,350 bps YoY to $9.3 \%$. EBITDA came in at Rs 522 mn , down $63.2 \%$ YoY. PAT further declined by $73.9 \%$ YoY to Rs 220 mn on account of increase in interest cost by $72.9 \%$ YoY to Rs 68 mn and increase in tax rate from $36.1 \%$ to $34.2 \%$ YoY.

During lHFY20, the company incurred a capex of Rs 480 mn . D/E ratio remains comfortable at 0.28 x . Working capital days have come down from 95 days to 81 days YoY. Cash flow from operating activities came down to Rs 5.49 bn from Rs 15.04 bn YoY.

## Growth drivers

The performance of the company was impacted due to sluggish demand and high volatility in raw material prices. The company has revamped the four decade old Ranipet plant which would increase the utilisation and reduce the operating cost while PA plant at Dahej with capacity of 20,000 mtpa is expected to come on stream in 4QFY20. The plant would significantly reduce logistic cost as it is situated in the proximity of its key customers. Further, the company is planning to increase Maleic Anhydride capacity at Malaysian subsidiary by $50 \%$ in two years to cater to the demand coming in from Middle East and European markets. The major concern for the company remains the imports from Far East countries which is impacting the realisations.

## Relative Performance

## Vinati Organics

Not Rated
Lowers guidance; butylated phenols to drive growth...
Established in 1989, Vinati Organics Limited (VO) is a global leader in the production of Isobutyl Benzene (IBB) with global market share of $\sim 65 \%$, 2-Acrylamido 2 Methylpropane Sulfonic Acid (ATBS) with global market share $\sim 55 \%$ \& Domestic leader in the production of Iso Butylene with domestic market share of $\sim 70 \%$.

## 2QFY20 performance

- Sales declined by 1.5\% YoY and 15.7\% QoQ to Rs 2.45 bn.
- Gross margins expanded by 550 bps YoY and 220 bps QoQ to 59.9\%.
- EBITDA grew by $10.1 \%$ YoY to Rs 999 mn while it declined by $16.9 \%$, sequentially.
- EBITDA margins expansion was limited to 420 bps YoY and a contraction of 60 bps QoQ on account of higher staff cost (up 110 bps YoY and 130 bps QoQ) and other expenses (up 10 bps and 150 bps ) as \% of net sales.
- PBT growth was limited to by 4.8\% YoY to Rs 1.03 bn on account of lower other income (down 26.7\% YoY to Rs 112 mn ) and higher depreciation (up $4.2 \%$ to Rs 71.9 mn ); PBT declined by $16.7 \%$, sequentially.
- PAT growth of $69.2 \%$ YoY and $33.2 \%$ QoQ came in as the company chose to exercise the option of the new tax rate and had reversed deferred tax liabilities amounting to Rs 225.6 mn due to reduction in corporate tax rate.

## 1HFY20 performance

- Sales/EBITDA/PAT grew by 5.4\%/24.0\%/48.8\% YoY to Rs 5.35 bn/Rs 2.2 bn/Rs 1.92 bn.
- Gross margins expanded by 680 bps YoY to $58.7 \%$, while EBITDA margins expansion was limited to 620 bps YoY to 41.1\%.
- PBT growth was limited to $16.4 \%$ YoY to Rs 2.27 bn on account of lower other income (down $30.2 \%$ to Rs 226 mn ) and higher depreciation (up $3.8 \%$ to Rs 142 mn ). Tax rate stood at $15.6 \%$ against $33.9 \%$ YoY.

## Key highlights from Balance Sheet and Cash Flow statement

- Short-term borrowings declined by Rs 7.0 mn YoY; the company repaid Rs 35.4 mn of working capital loan.
- Cash from operations went up to Rs 2.4 bn from Rs 933 mn in 1HFY19. The company incurred a capex of Rs 1.9 bn against Rs 152 mn in 1HFY19.
- Working capital came down to Rs 2.5 bn from Rs 2.7 bn on account of Rs 351 mn decline in Trade receivables to Rs 1.8 bn and Rs 159 mn increase in Trade payables to Rs 293 mn. Inventories increased by Rs 333 mn to Rs 1.0 bn.

## Growth drivers

The performance was impacted by lower IBB and ATBS sales, both impacted due to user industry (customer plant shut down in IBB and poor demand from Oil \& Gas for ATBS). The sale of both the products are expected to increase in the coming quarters. The butylated phenol project has been commissioned in 2QFY20 and would ramp-up by the end of the year. While the project is expected to add up to Rs 4.0 bn to the topline at full capacity level, the margins would be lower compared to the current products.

## Management commentary

- Revenue declined significantly on account of lower sales in IBB segment as few of the major customers had a shut down. However, one of the customers has restarted their plant and another would restart in the coming quarter. The IBB sales are expected to pick-up from the coming quarter.
- ATBS sales de-grew by single digit rate on account of slowdown of the demand from the Oil $\delta$ Gas industry. 2 H would be better than the current quarter.
- Butylated phenol plant which commenced operations in 2QFY20, would ramp-up in 3QFY20 and would contribute to the revenue. Revenue contribution for FY20 would be about Rs 1.0 bn while at full capacity it would generate revenue of about Rs 4.0 bn.
- Management expects margins to be in the range of $30-35 \%$ for the next couple of years and have lowered the guidance from 15-20\% revenue growth to about $10 \%$ revenue growth for FY2OE.
