## Artemis Centre for Bone Marrow Transplant

Artemis Centre for Bone Marrow Transplant is among the most renowned BMT and Stem Cell Transplant centers in Asia respected for its clinical excellence. A dedicated facility, equipped with ultra-modern infrastructure and internationally trained, widely experienced faculty. The Centre is supported by state-of-the-art laboratory services and transfusion services, along with a fully equipped radiation oncology unit.

The Hematology and Bone Marrow transplantation center at Artemis Hospitals, India has performed over 300 transplants with an excellent success rate. Artemis Hospitals, India is also a trusted name in BMT for international patients, as the hospital has not just a highly qualified BMT team, but also very stringent infection control norms which are critical for BMT patients

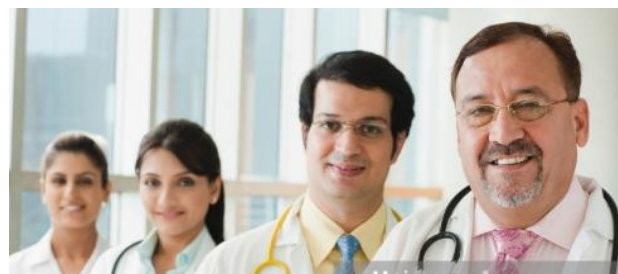

The Centre offers both allogenic and autologous transplant using bone marrow, peripheral blood stem cells and cord blood stem cells for various benign and malignant disorders like Thalassemia, Aplastic Anaemia, Leukemia, Lymphomas, Multiple Myelomas and Advanced Pediatric Solid Tumors.

**Artemis Hospital also has pioneered India's First Haplo-identical Stem Cell Transplant (half matched transplant) and the first successful half matched bone marrow transplant for Fanconi Anaemia in India.**

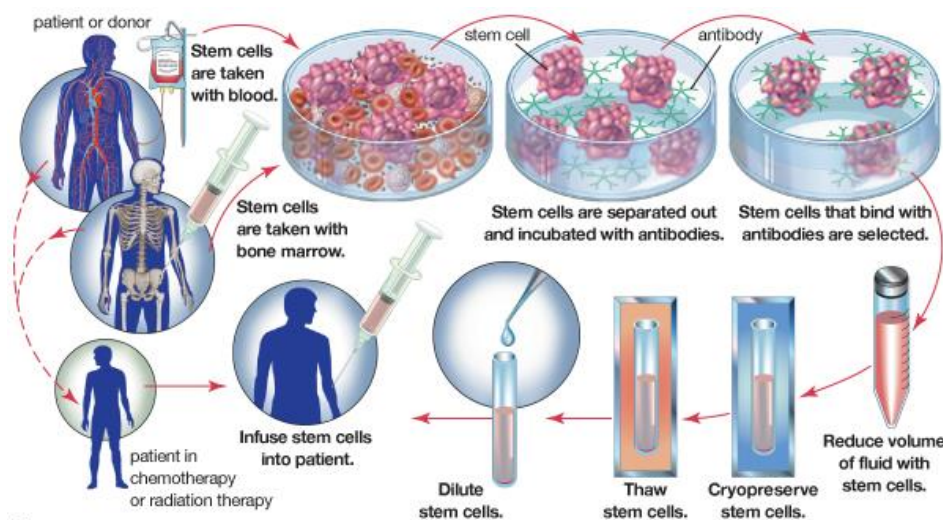

### **What is Bone Marrow**

### **Transplant/Stem Cell Transplant ?**

Bone marrow transplantation (BMT/SCT) is a medical procedure being used to treat diseases once thought incurable. Bone marrow transplantation (also known as stem cell transplantation) involves harvesting healthy stem cells from the donor to replenish the bone marrow of the patient. The new stem cells take over the production of the blood cells. It is the transplantation of multi potent hematopoietic stem cells, usually derived from bone marrow, peripheral blood stem cells, or umbilical cord blood from donor to recipient.

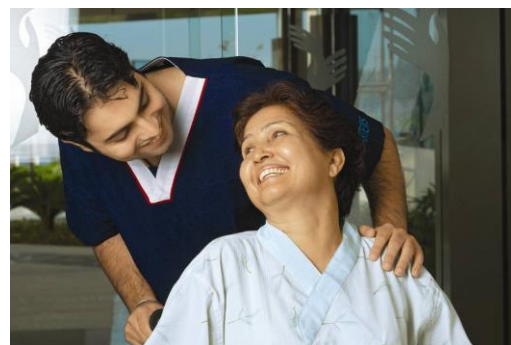

**Each BMT dedicated patient room is supported by separate HEPA filter with triple level air filtration. Transplants are routinely performed for children as well as adults.**
