## Diff. between incremental CoF and 3QFY18 CoF (bp)

STF	54
SCUF	36
BAF	10
LICHF	10
CIFC	6
DHFL	(5)
MUTH	(7)
MMFS	(12)
GRUH	(14)
CANFIN	(33)
REPCO	(43)
PNBHF	(48)
IHFL	(54)
CAFL	(83)

## Decline in FY19E EPS with 20bp increase in borrowing cost

MUTH	2%
MASFIN	2%
BAF	3%
SCUF	3%
SHTF	4%
CIFC	4%
IHFL	5%
REPCO	5%
MMFS	5%
GRUH	5%
CAFL	7%
PNBHF	8%
LICHF	9%
DHFL	10%

Note: Assuming ceteris paribus

## Analyzing the impact of rising G-Sec yields

### Varying degrees of impact across NBFCs; HFCs most at risk

- Over the past three years, there has been a notable shift in the liability mix of most NBFCs towards market borrowings on account of the liquidity flush in the system. However, over the past six months, the incremental benefit on cost on funds has been diminishing, as the 10-year G-Sec yield has risen more than 100bp to 7.5%+ currently. Stock price performance, since then, has varied greatly from company to company.
- In this report, we analyze companies based on liability mix, maturity pattern of liabilities, credit rating, and incremental v/s on-book cost of funds.
- The impact of rising yields will not necessarily be margin dilutive across NBFCs, as it would depend upon (a) the amount of liabilities re-pricing in the near term, (b) pricing power/competitive dynamics in the product segment (monoline retail housing companies to be impacted the most), and (c) ability to switch between various sources of funding. Hence, it would be incorrect to paint all NBFCs with the same brush.
- In our view, SHTF and SCUF are poised to reap additional 30-50bp reduction in cost of funds (from 3QFY18 levels), as the NCDs set to mature over the next 1-2 years bear significantly higher interest cost. For LICHF, BAF and CIFC, the impact will be neutral, as incremental and on-book cost of funds is largely similar. However, among them, incremental spreads for LICHF are likely to be under pressure due to limited pricing power in the core housing segment. Our top picks are BAF, SHTF and REPCO.

### Large beneficiaries of decline in CoF over last three years

Over the past three years, most NBFCs focused on diversifying their liability profile (Exhibit 6) by reducing dependence on bank borrowings. This was enabled by a sharp uptick in liquidity in the system coupled with favorable regulations (for example, increasing the cap on exposure of mutual funds to the HFC sector). On average, the share of bank borrowings in the liability mix declined by 1,000-2,000bp over the past three years for HFCs and even more for asset financiers (though two players in our coverage reported a higher share of bank borrowings). This resulted in cost of funds (CoF) declining 100-200bp – however, the decline has not been similar for all players. Factors influencing the quantum of decline in CoF include liability mix, maturity pattern of liabilities, and credit rating.

### Cost of bank borrowings & public deposits stickier than market borrowings

The cost of public deposits has been rather sticky in the past two quarters. For example, one of the leading HFCs offers 3-5 year tenured fixed deposits at ~7.5% today (vis-à-vis its 3-year NCD at 7.9% and 5-year NCD at 8.2%). **Most deposit-accepting NBFCs in our coverage have fixed deposit schemes carrying interest rates of 7.5-8%, that is, ~50bp lower than the cost of NCDs. Similarly, NBFCs with a higher share of bank borrowings are likely to be more protected from rising rates, as banks have increased their MCLR only ~10bp in the past few months.** Banks are still flush with liquidity and a sharp increase in MCLR is unlikely in the near-to-medium term, in our view. HDFC and PNBHF have the highest share of public deposits at 31% and 21% respectively among the HFCs under our coverage.

Research Analyst: Alpesh Mehta (Alpesh.Mehta@MotilalOswal.com); +91 22 3982 5415 | Piran Engineer (Piran.Engineer@MotilalOswal.com); +91 22 3980 4393

Nitin Aggarwal (Nitin.Aggarwal@MotilalOswal.com); +91 22 3982 5540 | Shubhanshu Mishra (Shubhanshu.Mishra@MotilalOswal.com); +91 22 3982 5558

Investors are advised to refer through important disclosures made at the last page of the Research Report.

Motilal Oswal research is available on [www.motilaloswal.com](http://www.motilaloswal.com)/Institutional Equities, Bloomberg, Thomson Reuters, Factset and S&P Capital.

On the other hand, Repco and SCUF have a significant share of bank (including NHB for Repco) borrowings at 75% and 60%, respectively. **The rise in CoF for these players will be less pronounced than for those heavily dependent on market borrowings.**

#### **Benefit of re-pricing of lagged liabilities still possible for a few players**

**We analyzed the current CoF of all NBFCs vis-à-vis their incremental cost of funds.**

We looked at prices of outstanding listed NCDs to understand the incremental cost of market borrowings. For bank borrowings, we took a range of MCLR to MCLR+30bp depending on the rating. For public deposits, we looked up the rates offered on the respective websites. **We believe SHTF and SCUF are best placed, as there is still a 30-50bp reduction in CoF (from 3QFY18 levels) possible, as maturing liabilities bear significantly higher interest cost.** The impact on LICHF, DHFL, BAF, MUTH and CIFC will be neutral, as incremental and on-book cost of funds is largely similar. In our view, IHFL and PNBHF bear the highest risk on CoF, going forward, since incremental cost of funds is higher than on-book cost of funds.

#### **Credit rating change possible for a few NBFCs**

While most NBFCs under our coverage have a 'Stable' outlook assigned to them by credit rating agencies, **we note that Can Fin Homes (not under our coverage) has a 'Negative' outlook assigned by ICRA. Can Fin Homes has been assigned a negative outlook in line with its parent's (Canara Bank) rating outlook. On the other hand, SCUF has a 'Positive' outlook assigned by CRISIL.** A potential rating upgrade to 'AA' would reduce incremental cost of funds for SCUF and also enable greater access to capital market borrowings for the company.

#### **Pricing power to determine margin trajectory**

In our view, segments/companies with low pricing power will be most impacted, while other players will be able to offset the CoF increase. Retail home loans and LAP have the lowest pricing power in our view – we do not expect players in these segments to be able to pass on the increase in cost of funds to their customers effectively. Car and M&HCV financing, despite being competitive segments, would not see much spread compression, as NBFCs cater to different customer segments than banks.

## Dissecting the liability franchise

2-10% impact on FY19E EPS, with 20bp increase in cost of borrowings

To understand the impact of rising rates on cost of funds going forward, we look at past instances of how stocks reacted during a liquidity tightening phase. In addition, we analyze our NBFC coverage on several parameters including:

- Trend in liability mix and cost of funds
- ALM – Maturity pattern of fixed-rate liabilities
- Differential between incremental and on-book cost of funds
- Credit rating – Potential for upgrade/downgrade
- Sensitivity of EPS to movement in borrowing cost

Stock price performance has varied greatly from company to company

### 100bp+ rise in G-Sec yields; significant correction in HFC stocks

- From its trough of 6.4% in July 2017, the 10-year G-Sec yield has spiked over 100bp to 7.6-7.7% currently.
- While this has had a negative sentimental impact on the NBFC sector, stock price performance has varied significantly from company to company. Repco and LICHF have been the biggest underperformers, while SHTF has been the biggest outperformer.

Exhibit 1: Trend in G-Sec yields (%)

Source: MOSL, Company

Exhibit 2: Top 3 underperformers since July 2017 have been HFCs

Source: MOSL, Company; Note: Stock price returns taken from 21/07/2017 when the 10yr GSec yield was at its trough

NBFC stocks were down 20% on average during the short-lived liquidity tightening in 2013

### What happened during the liquidity tightening phase in 2013?

- Over a period of just three months, G-Sec yield shot up from 7.2% in May 2013 to 9% in August 2013.
- This had a severe sentimental impact on NBFCs. Stocks were down ~20% on average.

**Exhibit 3: Change in stock prices over May-August 2013**

Source: MOSL, Company; Note: Reference dates taken as 23/5/13 and 20/8/13

Barring SCUF and MUTH, all NBFCs have reported a healthy decline in the share of bank borrowings

### Evolving liability mix; 100-200bp decline in CoF over FY15-18E

- CAFL, CIFC and IHFL have witnessed the sharpest reduction in share of bank borrowings. On the other hand, SCUF and MUTH have actually witnessed an increase in the share of bank borrowings.
- The decline in CoF has been markedly different for different NBFCs. Factors impacting this include change in liability mix, credit rating and maturity pattern of liabilities.

**Exhibit 4: Over 1,000bp reduction in share of bank borrowings for most players; SCUF and MUTH are exceptions (%)**

Source: MOSL, Company

**Exhibit 5: 100-200bp decline in CoF over the past three years**

Source: MOSL, Company

Repco, SCUF and MUTH have higher share of bank borrowings compared to peers – this should provide some respite, as banks have barely increased MCLR

### Liability mix a key factor in cost of funds going forward

- Theoretically, companies with higher share of market borrowings will report higher increase in CoF compared to those with high share of bank borrowings or public deposits.
- This is because G-Sec yields have increased ~100bp over the past 6-7 months, while MCLR has gone up only ~10bp and is likely to go up only another 20-30bp. Public deposit rates too have only increased ~50bp in the interim.
- However, NBFC would be in a position to quickly move towards bank borrowings due to existing relationship. Significant diversification on the liability side over last 5 years has been the big positive for NBFCs especially HFCs.
- As of now, Repco, SCUF and MUTH are relatively better off due to a significant share of bank borrowings. HDFC and PNBHF have a meaningful contribution from public deposits, which should provide some cushion to rising CoF.

**Exhibit 6: Repco, SCUF and MUTH are relatively safer since MCLR should not rise more than 20-30bp in the near term**

Source: MOSL, Company

**Exhibit 7: NBFCs with a high share of market borrowings are more prone to sharp re-pricing in cost of funds**

Source: MOSL, Company

**Exhibit 8: Public deposits to provide some cushion on rising cost of funds**

Source: MOSL, Company

We believe there is still further scope of reduction in CoF for SHTF and SCUF

**Benefit of re-pricing of lagged liabilities still possible for a few players**

- A key determinant of the trajectory of CoF going forward is the delta between the on-book cost of funds and the cost of funds on incremental borrowings.
- Interestingly, some players like SHTF and SCUF are likely to still report decline in CoF because their incremental CoF is still lower than their on-book CoF.
- We calculate the incremental CoF assuming the same liability mix going forward.

**Exhibit 9: STF and SCUF have room to further reduce CoF; BAF, LICHF and CIFC should witness stable CoF**

Source: MOSL, Company

Repco, MASFIN and LICHF have funding gaps in the <1 year bucket

### Asset liability management – Analyzing re-pricing risk

Our funding gap analysis reveals that LICHF, MASFIN and Repco are running asset liability mismatches in the sub-1 year bucket. On the other hand, BAF, SCUF and MUTH have funding surpluses in the sub-1 year bucket. These companies could potentially migrate towards a greater share of CP borrowing, which would help mitigate the upward CoF trajectory in this environment.

**Exhibit 10: LICHF, MASFIN and REPCO had large funding gaps in <1 year bucket in FY17 (%)**

Source: MOSL, Company; Note: Funding gap is the ALM mismatch divided by total assets

Over one-fourth of liabilities of CIFIC, PNBHF and MASFIN will come up for re-pricing in one year – a key risk

At the same time, we analyze what proportion of liabilities would come up for re-pricing and in what time frame. **Over the next one year, the share of market borrowing and public deposits liabilities that will come up for re-pricing varies greatly across HFCs – from 6%/7% for Repco/GRUH to 26% for PNBHF.** The share for Repco and GRUH is low due to the relatively lower share of market borrowings in the overall borrowing mix. Hence, Repco and GRUH will be relatively protected from sharp increases in cost of funds as compared to HFCs over the next year. *(Note: we assume that only market borrowings and public deposits will come up for re-pricing, as bank borrowings are anyway at floating rate and the MCLR gets re-priced regularly)*

**Exhibit 11: Re-pricing risk higher for CIFIC, PNBHF and MASFIN and lower for GRUH, Repco**

Source: MOSL, Company; Note: Some companies do not disclose the ALM break-up between bank borrowings and market borrowings; hence excluded from the table above

A rating upgrade for SCUF would not only lower borrowing cost but also broaden the avenues for raising liabilities

### Rating changes for some NBFCs could provide relief

While most NBFCs under our coverage have a 'Stable' outlook assigned to them by credit rating agencies, we note that Can Fin Homes (not under our coverage) has a 'Negative' outlook assigned by ICRA. Can Fin Homes has been assigned a negative outlook in line with its parent's (Canara Bank) rating outlook. **On the other hand, SCUF has a 'Positive' outlook assigned by CRISIL. A potential rating upgrade to 'AA' would reduce incremental cost of funds for SCUF and also enable greater access to capital market borrowings for the company.**

**Exhibit 12: Credit rating snapshot**

	LT Debt Rating	Outlook	Rating Agency
<b>HFCs</b>			
HDFC	AAA	Stable	CRISIL
LICHF	AAA	Stable	CRISIL
IHFL	AAA	Stable	CRISIL
DHFL	AAA	Stable	CARE
REPCO	AA-	Stable	ICRA
GRUH	AAA	Stable	CRISIL
CANFIN	AAA	Negative	ICRA
PNBHF	AA+	Stable	CRISIL
<b>AFCs</b>			
STF	AA+	Stable	CRISIL
BAF	AAA	Stable	CRISIL
LTFH	AA+	Stable	ICRA
MMFS	AA+	Stable	CRISIL
CIFC	AA	Stable	CRISIL
SCUF	AA-	Positive	CRISIL
CAFL	AA+	Stable	CARE
MASFIN	A	Stable	ICRA
ABCL	AA+	Stable	ICRA
MUTH	AA	Stable	CRISIL

2-10% FY19E EPS impact with 20bp increase in borrowing cost

### Sensitivity analysis – DHFL, LICHF most impacted by rising cost of borrowings; MUTH, MASFIN and BAF least impacted

We analyze the sensitivity of profits to changes in borrowing cost. For a 20bp increase in borrowing cost, FY19E PAT declines by 2-3% for MUTH, MASFIN and BAF and by 9-10% for LICHF and DHFL. Hence, effective liability management assumes much greater importance for players LICHF and DHFL.

**Exhibit 13: Change in FY19E PAT for 20bp increase in borrowing cost**

Source: MOSL, Company

**How our coverage stacks up**

Below is a comparison of the Top-3 and Bottom-3 players on each metric described above.

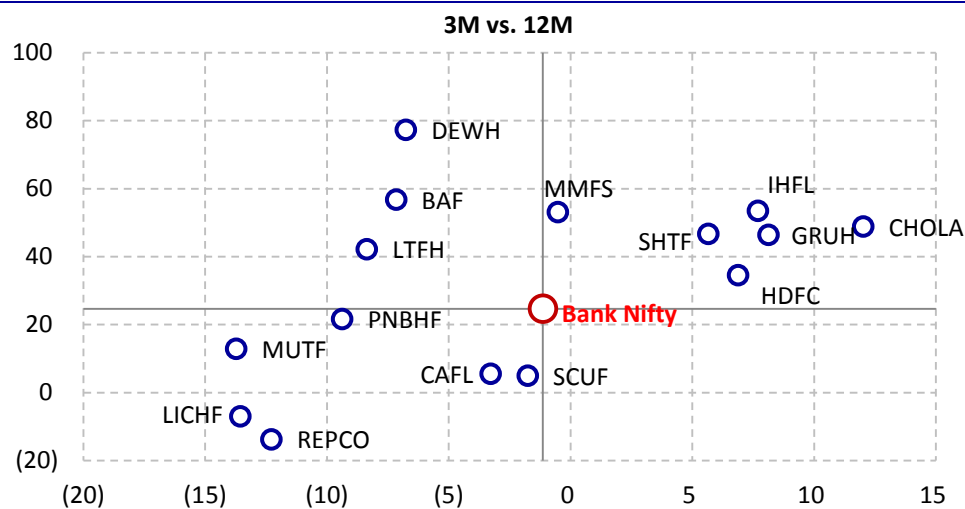

**Exhibit 14: SCUF, Repco and BAF seem better placed on most parameters**

	Delta in incremental v/s on-book CoF	Funding Surplus	Maturity of liabilities	Share of bank borrowings	Impact of CoF on EPS
Top 3	STF	MUTH	REPCO	REPCO	MUTH
	SCUF	SCUF	GRUH	SCUF	MASFIN
	BAF	BAF	MMFS	MUTH	BAF
Bottom 3	IHFL	REPCO	CFC	LICF	DHFL
	PNBHF	MASFIN	PNBHF	PNBHF	LICF
	REPCO	LICF	MASFIN	GRUH	PNBHF

Source: MOSL, Company

**NBFCs have been outperformers in the last one year**

- **HFCs** viz. DEWH (+77%), IHFL (+53%), GRUH (+46%) and HDFC (+34%), have been the large outperformers in last one year led by tailwinds in the sector and strong visibility of earnings and growth. Tightening of liquidity, limited pricing power and concern over growth has led to sharp valuation correction for LICHF. REPCO (continued local area issues impacting performance) and PNBHF (large selling by parent) has impacted performance over the last three months.
- **Vehicle financiers** like CFC (+49%), SHTF (+47%) and MMFS (+53%) have been the big outperformers led by rising CVs demand, expectation of normalization of earnings (post entire 90dpd transition getting over) in FY19 and focused efforts by GOI to boost rural economy. BAF also gave a higher return (+57%) than Bank Nifty in last one year.
- In our view, segments/companies with low pricing power will be most impacted in rising interest rate scenario, while other players will be able to offset the CoF increase. Retail home loans and LAP have the lowest pricing power in our view – we do not expect players in these segments to be able to pass on the increase in cost of funds to their customers effectively. Car and M&HCV financing, despite being competitive segments, would not see much spread compression, as NBFCs cater to different customer segments than banks. Our top picks in the space are **BAF, SHTF and REPCO**.

#### Regulatory Enquiries against Motilal Oswal Securities Limited by SEBI:

SEBI pursuant to a complaint from client Shri C.R. Mohanraj alleging unauthorized trading, issued a letter dated 29th April 2014 to MOSL notifying appointment of an Adjudicating Officer as per SEBI regulations to hold inquiry and adjudge violation of SEBI Regulations; MOSL requested SEBI to provide all documents, records, investigation report relied upon by SEBI which were referred in Show Cause Notice. The matter is closed and MOSL had to pay Rs. 2 lakhs towards penalty for misplacement of original POA of client.

MOSL, it's associates, Research Analyst or their relative may have any financial interest in the subject company. MOSL and/or its associates and/or Research Analyst may have beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report. MOSL and its associate company(ies), their directors and Research Analyst and their relatives may: (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report. Research Analyst may have served as director/officer, etc. in the subject company in the last 12 month period. MOSL and/or its associates may have received any compensation from the subject company in the past 12 months.

In the last 12 months period ending on the last day of the month immediately preceding the date of publication of this research report, MOSL or any of its associates may have:

managed or co-managed public offering of securities from subject company of this research report, received compensation for investment banking or merchant banking or brokerage services from subject company of this research report, received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report. Subject Company may have been a client of MOSL or its associates during twelve months preceding the date of distribution of the research report.

MOSL and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report. To enhance transparency, MOSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOSL and /or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOSL may have a potential conflict of interest that may affect the objectivity of this report. Compensation of Research Analysts is not based on any specific merchant banking, investment banking or brokerage service transactions.

#### Terms & Conditions:

This report has been prepared by MOSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOSL will not treat recipients as customers by virtue of their receiving this report.

#### Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

#### Disclosure of Interest Statement

Companies where there is interest

Analyst ownership of the stock No

A graph of daily closing prices of securities is available at [www.nseindia.com](http://www.nseindia.com), [www.bseindia.com](http://www.bseindia.com). Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

#### Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOSL & its group companies to registration or licensing requirements within such jurisdictions.

#### For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Securities (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

#### For U.S.

Motilal Oswal Securities Limited (MOSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the"1934 act") and under applicable state laws in the United States. In addition MOSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts"), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

#### Disclaimer:

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, not its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
