

Bajaj Finance (BAJFI)

₹ 2700

No major impact from Ind-As, sustained growth

- PAT without Ind-As adjustments for Q1 FY19 grew 69% to ₹ 1,018 crore from ₹ 602 crore in Q1 FY18. However, post adjustments, PAT grew 81% YoY to ₹ 834 crore. Due to Ind-As, net impact on reserves & surplus (post tax) was ₹ 612 crore, which is ~6.5% reduction in opening reserves & surplus
- Headline asset quality stayed steady QoQ. With expected credit loss the standard asset provisioning has gone up to 89 bps from 40 bps. Hence, provisions were up 41%QoQ to ₹ 327 crore from ₹ 231 crore. Total slippages for the quarter were ₹ 379 crore
- Consolidated AUM including housing grew 35% YoY to ₹ 93314 crore. It was largely led by rural & housing finance that doubled QoQ
- NII pre-adjustments increase was at 43% YoY to ₹ 2,904 crore from ₹ 2,042 crore in Q1FY18 led by AUM growth. Post adjusted NII grew 46% YoY to ₹ 2578 crore from ₹ 1761 crore. Operating leverage with opex to NII declining 300 bps QoQ came as a positive surprise
- Customer franchise as of June 30, 2018 increased 30% to 28.28 million from 21.69 million as of June 30, 2017. New loans acquired in Q1FY19 were up 49% to 5.63 million

Stronghold in consumer loans & diversified portfolio to sustain growth

Bajaj Finance (BFL) is one of the leading asset finance NBFCs. The USP of BFL is its stronghold in the consumer durable (CD) & lifestyle product financing business (~15% of the AUM). Further, it has a diversified loan portfolio with five heads viz. consumer finance (39% of loans), SME (33%) commercial (12.9%), rural (7.2%) and mortgage (7.8%). Such diversity has given BFL an edge in terms of AUM growth (>40% CAGR to ₹ 60194 crore in FY11-17) and asset quality with steady 1.2-1.6% GNPA in the past three years). PAT rose 40% CAGR in FY11-18 to ₹ 2646 crore (old GAAP). With Ind-As, factoring NII and provisions adjustment, in FY19-21E, we expect PAT traction to be strong at 35% CAGR to ₹ 6170 crore.

Expect AUM traction at 32% in FY19-21E led by consumer and housing

Strong AUM traction of 44% CAGR in FY11-15 to ₹ 32410 crore was mainly driven by the SME category increasing at 51% CAGR followed by the CF category, which rose at 41% CAGR. Within SME, it was the LAP (25% of overall AUM then) portfolio that saw high traction in FY11-15 while CD financing within the CF book saw 47% CAGR. Going ahead, we expect AUM growth at 34% CAGR to ₹ 193949 crore in FY18-21E, led by consumer, housing and rural.

Steady asset quality, strong margins with Ind-As reflect strength of model

BFL's GNPA ratio at 1.39% (₹ 1280 crore), as on Q1FY19, is better than some of its peers wherein the ratio is above 2.5%. With expected credit loss (ECL model), NPA provisions are lower but standard asset provisioning is higher at 89 bps. BFL earns highest margins of 10-11%. However, the management has guided on margin contraction from Q3FY18 onwards due to higher costs, partly offset by lower opex ratios.

Rich valuations to sustain; maintain BUY, revise target price higher

A strong performance in a volatile economic scenario (healthy return ratios - RoA at >3.5%, RoE at ~20% GNPA at <2%) maintained investor interest even at higher P/ABV multiple with strong growth momentum at 34% CAGR in AUM, PAT CAGR of 35% in FY18-21E to ₹ 6170 crore. BFL's premium valuations may sustain. We revise our target price higher to ₹ 3050 from ₹ 2400 earlier, rolling over to FY21E valuing the stock at ~28 FY21E EPS (5.8x FY21E ABV). We retain **BUY**.

Company Analysis

Overall book expected to grow at 32% CAGR over FY19-21E

BFL has a diversified loan portfolio. Further, the company has a leadership position in under penetrated & growing segments like CD financing, lifestyle product financing, two-wheeler financing, LAP, etc. which account for ~50% of its portfolio. These factors have allowed BFL to clock strong AUM CAGR of >40% in FY11-17 to ₹ 60194 crore. This has happened despite a weak economic environment in the past few years.

Of the total AUM, BFL places about 4-5% for securitisation for better asset-liability management. As on FY17, of the total AUM of ₹ 60194 crore, about ₹ 2511 crore was the off book or securitised amount. The balance ₹ 57683 crore is advances outstanding in the balance sheet as on FY17. Off book is ₹ 3410 crore on total AUM of ₹ 93314 crore as on Q3FY18. Growth was strong at 35% YoY in Q1FY19. During Q1, BFL provided 5.63 million new loans vs. 4.54 million QoQ.

Going ahead, we expect overall advances traction at 34% CAGR in FY18-21E to ₹ 193949 crore driven by CF and housing segment.

Going ahead, we expect overall advances traction at 34% CAGR in FY18-21E to ₹ 193949 crore driven by CF and housing segment

Exhibit 5: Consumer finance dominates loan mix (standalone excluding housing finance subsidiary)

Source: Company, ICICI Direct Research, Due to reclassification Q1FY19 not comparable

Stronghold in CD financing & diversified nature of book

Bajaj Finance is an “asset finance” NBFC. The lending book can be broadly diversified into four categories viz. consumer finance (CF), SME finance, commercial finance and rural finance.

In the four broad categories, CF book as on FY18 was at ₹ 36730 crore, comprising 46% of total AUM of ₹ 80444 crore. Within the CF book, CD financing & lifestyle product financing book were at ₹ 8000 crore and ₹ 2845 crore, respectively, as on Q2FY18. Apart from these, the CF book includes two and three wheeler finance, personal loans and home loans to salaried individuals.

Exhibit 6: Break-up of consumer finance (CF) book

AUM (₹ Crore)	FY14	FY15	FY16	Q3FY17	FY17	Q1FY18	Q2FY18
2W & 3W finance	3593	3324	3773	4961	5057	5215	5398

Source: Company, ICICI Direct Research; Break up not available now as the company has stopped publishing this data

We expect share of the CF division in consolidated AUM mix to increase and stay ~40% mainly led by CD financing & lifestyle financing segment. Personal loans and two-wheeler also continues to grow stronger.

BFL's SME was the largest category of the four broad categories and comprising ~48% of the total AUM as on FY15. It was at ₹ 15620 crore as on FY15 and ₹ 25320 crore as on FY18. It includes small business loans, loan against property (LAP), home loans to self-employed & SME cross sale. LAP comprises the highest part in SME financing and comprises ~13% of overall AUM as on FY18.

Exhibit 7: Break-up of SME book

AUM (₹ Crore)	FY14	FY15	FY16	Q3FY17	FY17	Q1FY18	Q2FY18

Source: Company, ICICI Direct Research; Break up not available as the company has stopped publishing this data

Since FY11, the LAP book witnessed robust growth of 38% CAGR to ₹ 8232 crore. Of late, traction in the LAP portfolio has slowed (proportion dipped to 13% as on FY18 from 28.7% in FY14) owing to enhanced competitive pressures, higher commission payouts and ongoing focus on direct lending over intermediaries.

In the commercial category, it provides finance in the construction equipment (CE) and infrastructure space. Apart from these, BFL also offers wholesale lending products covering short, medium and long term needs of auto component vendors in India. The proportion of commercial segment was at 13% as on FY17 and 15% as on FY18. There has been a continuous run down in the book related to CE and infra financing. These segments witnessed asset quality pressures. Hence, BFL reduced its exposure.

Exhibit 8: Break-up of commercial lending category

AUM (₹ Crore)	FY14	FY15	FY16	Q3FY17	FY17	Q1FY18	Q2FY18
Construction equip. finance	448	188	158	639	896	1290	1604

Source: Company, ICICI Direct Research; Break up not available as the company has stopped publishing this data

In the rural eco system, BFL is a highly diversified lender. The company is currently present in CD financing, asset backed financing, gold loans, personal loans, etc. BFL functions through a hub & spoke model. The company operates its rural business in Maharashtra, Gujarat and Karnataka.

Exhibit 9: Rural proportion to rise further, going ahead

AUM (₹ Crore)	FY14	FY15	FY16	FY17	Q1FY17	Q2FY18	Q3FY18	Q4FY18	Q1FY19
Rural financing	50	333	1339	3072	3916	4622	5497	6019	6674
% of Total AUM	0.21	1.03	3.03	5.10	5.69	6.41	7.20	7.48	7.76

Source: Company, ICICI Direct Research

In rural areas, BFL is currently present in CD financing, asset backed financing, gold loans, personal loans, etc. Owing to its small size, the segment has witnessed sharp traction with the loan book increasing to ₹ 6019 crore in FY18 from ₹ 50 crore in FY14

As business commenced in FY13, the book size is small and witnessed sharp traction. AUM increased to ₹ 6019 crore in FY17 from ₹ 50 crore in FY14. Recently, the company also launched its MSME lending business in rural areas. We expect the rural portfolio to continue to witness sharp traction, going ahead.

Well diversified funding, strong parentage, credit rating enable lower CoF

The borrowings of BFL as on FY18 were at ₹ 61567 crore. The borrowings are well diversified with NCDs proportion the highest at 51% followed by banks at 31% and CPs/FDs at 18%. This is owing to strong parentage and credit rating (consistently holding AA+/stable and LAA+ stable rating from Crisil and Icra over the last seven years, with a positive outlook. Further, the fixed deposit scheme has been rated FAAA/Stable by Crisil and MAAA/stable by Icra). The company is able to raise funds at competitive rates from various sources.

Further, at regular intervals, the company was able to raise funds via QIP, which also helps reduce its cost of borrowings. In 2015, BFL raised ~₹ 1800 crore via allotment of warrants to promoters and equity to QIBs.

In FY18, the company raised ₹ 4500 crore through QIP. Deposits are growing strong for Bajaj Finance and are at ₹ 9427 crore from ₹ 7569 crore now forming 14% of borrowings.

Borrowings are well diversified into bank term loans, NCDs and CPs/FDs

Exhibit 10: Trend in borrowings

Source: Company, ICICI Direct Research

Exhibit 11: Trend in resource mix

Source: Company, ICICI Direct Research

The margins of BFL are one of the highest among its peers. Its margins during FY18 were at ~10%. Such high margins were on the back of its strong blended yields of >17% and competitive CoF, which helped the company earn overall spread of ~10%

Margins one of the highest; to sustain at healthy levels, going ahead

The margins of Bajaj Finance are one of the highest among its peers. Its margins during FY18 were at ~10%. Such high margins were on the back of strong blended yields of >17% and competitive CoF, which helps the company to earn overall spread of ~10%. Yields in the consumer financing category are high.

In the past few years, margins witnessed a slide owing to a change in loan mix towards lower yielding segments as BFL's strategy was to go for scale and secured products like in the SME category (such as LAP). This impacted the yield, to some extent, but also helped maintain steady asset quality. The LAP portfolio, where yields are ~11-12%, increased at 38% CAGR in FY11-15. Margins at 10% in FY18 will be seen moderating with cost of funds rising and low yielding housing finance gaining traction.

Exhibit 12: Margins to remain strong

Source: Company, ICICI Direct Research

The company has entered into an agreement with One Mobikwik Systems Pvt Ltd (Mobikwik) on August 8, 2017, and invested ₹ 225 crore in the equity shares and cumulatively compulsorily convertible preference shares of Mobikwik. This is a strategic investment helping to increase business from existing customers.

Asset quality remains at acceptable levels; expect to stay steady

Bajaj Finance's gross NPA ratio at 1.5% (₹ 1141 crore), as on FY18, is relatively better than some of its peers especially considering the weak economic environment of the past two or three years. The asset quality has improved sharply over the last five or six years. The GNPA ratio was at 16.6%, 7.6% in FY09, FY10, respectively. This was owing to high stress in the two-wheeler financing and computer financing business then.

Post such a setback in asset quality, BFL focused on improving its risk management process and framework. This included product rationalisation like exiting the computer financing business, focusing on safer products like LAP and mortgages during the weak economy of FY11-14, increased use of Cibil scores, focusing on repeat customers with good repayment pattern and on affluent & mass affluent customers.

These efforts yielded large gains with improvement in asset quality as the absolute GNPA declined from ₹ 416 crore in FY09 to ₹ 148 crore by FY12 before increasing to ₹ 1141 crore by FY17. However, the loan book size is much larger now than in FY09.

BFL's asset quality has improved sharply over the last five or six years. The GNPA ratio was at 16.6%, 7.6% during FY09, FY10, respectively. As on FY18, the GNPA ratio is at 1.5%

Exhibit 13: Asset quality expected to stay at acceptable levels, going ahead

Source: Company, ICICI Direct Research

The credit cost (i.e. provisions as percentage of loans) also declined from 8.1% of advances in FY10 to 1.2% by FY13 and 1.6% as on FY16. In FY18, loan loss provisions to AUM stood at 1.23%.

Headline asset quality stayed steady QoQ with GNPA ratio at 1.39% a dip of 5 bps and NNPA ratio rose 16% to 0.44% from 0.28%. The provision coverage ratio improved dipped to 69% from 75% QoQ but with a rise from Q3FY18 of 68%, as Q4 was an exceptional quarter. The company has moved to Ind-As with expected credit loss on the basis of the standard asset provisioning has gone up to 89 bps from 40 bps. Accordingly, provisions were up 41%QoQ to ₹ 327 crore from ₹ 231 crore. Total slippages for the quarter were ₹ 379 crore.

Going ahead, we expect the GNPA ratio to increase a bit in FY18-20E. However, these levels are still acceptable and better than peers. The company has begun to report GNPA on 90 days overdue from Q1FY18 wherein the GNPA ratio was at 1.7%.

Outlook and valuation

In the past four years, investors have taken a keen interest in BFL as reflected in the sharp rise in its stock price since September, 2013. The stock performance has surpassed its peers. It is currently trading at 6x FY19E ABV for a RoA of 3.7% and RoE of ~20%. The two year forward multiple increased from 1x to >5x currently post September 2013. We believe the reason for such strong interest is owing to its leadership position in the short duration, lower ticket size, CD financing and lifestyle product financing business along with the diversified nature of its loan portfolio. This has allowed BFL to register strong AUM growth of >40% CAGR in the past four years to ₹ 80444 crore as on FY18 with asset quality staying under control (GNPA ratio at 1.5%). PAT in FY11-18 rose at a robust pace of 40% CAGR to ₹ 2646 crore as on FY18.

A strong performance in volatile economic scenario (healthy return ratios - RoA at >3.5%, RoE at ~20% GNPA at <2%) kept investor interest maintained even at higher P/ABV multiple. with strong growth momentum at 32% CAGR in AUM, PAT CAGR of 35% in FY19-21E to ₹ 6170 crore. BFL's premium valuations are expected to sustain. We revise our target price higher to ₹ 3050 from ₹ 2400 earlier, rolling over to FY21E valuing the stock at ~28 FY21E EPS (5.8x FY21E ABV). We maintain our **BUY** rating on the stock.

Exhibit 14: Valuation

	NII (₹ cr)	Growth (%)	PAT (₹ cr)	Growth (%)	P/E (x)	ABV (₹)	P/ABV (x)	RoA (%)	RoE (%)

RATING RATIONALE

ICICI Direct endeavours to provide objective opinions and recommendations. ICICI Direct assigns ratings to its stocks according to their notional target price vs. current market price and then categorises them as Strong Buy, Buy, Hold and Sell. The performance horizon is two years unless specified and the notional target price is defined as the analysts' valuation for a stock.

Strong Buy: >15%/20% for large caps/midcaps, respectively, with high conviction;

Buy: >10%/15% for large caps/midcaps, respectively;

Hold: Up to +/-10%;

Sell: -10% or more;
