Subject: Update on Development and Successful Trial of Stainless Steel Container

Dear Sir/Madam,

This is in continuation of our earlier intimation dated 27.08.2025 regarding the development of specialized stainless-steel containers by Kalyani Cast-Tech Limited.

We wish to inform you that M/s Kalyani Cast-Tech Limited was advised by the Research Designs and Standards Organisation (RDSO) vide its letter dated 05.12.2025 to manufacture stainless steel containers for transportation of salt. Pursuant to the said advice, the Company has successfully manufactured one 20-feet prototype stainless steel salt container.

Further, it was decided to conduct a trial for loading and unloading of the said 20-feet prototype stainless steel salt container at the designated salt loading/unloading area to gain first-hand operational experience and assess its suitability for salt transportation.

We are pleased to inform that the trial was conducted at Bhimasar, District Kutch, Gujarat, and the same has been successfully completed.

This development marks another significant milestone in the Company’s continuous efforts towards innovation, product diversification, and strengthening its presence in specialized logistics solutions.

This is for your information and record.

Thanking you,

For **Kalyani Cast-Tech Limited**

Jayashree Kumar
(Whole Time Director)
