Indian Healthcare Industry – The sky is the limit

India's healthcare industry has shown remarkable growth in the recent past and the momentum will certainly continue in FY23 with improvement in occupancy, better case mix and sustainability of current ARPOB. Beyond FY23, we believe hospital companies will be more focused on growth as they are 1) adding new capacities largely through brownfield expansion for faster operationalization of beds & lower startup costs and 2) scaling up other ancillary businesses to tap further opportunities. We initiate coverage on Hospital Sector and recommend a 'BUY' rating on: Apollo Hospital (APHS IN, BUY, TP Rs 5772), Aster DM (ASTERDM IN, BUY, TP Rs 234), Fortis Healthcare (FORH IN, BUY, TP Rs362), Healthcare Global Enterprises (HCG IN, BUY, TP Rs 316), KIMS (KIMS IN, BUY, TP Rs 1638), Max Healthcare (MAXHEALT IN, BUY, TP Rs 427) and Narayana Hrudayalaya (NARH IN, BUY, TP Rs 773).

Investment Rationale:

- Secular story- Hospitals to be biggest beneficiaries in rising healthcare spends: Overall health spends are expected to grow at 16-18% CAGR, driven by improving affordability and increasing incidence of non-communicable diseases. Private hospital players are expected to be largest beneficiary with 65-70% share of healthcare spends with incremental gains from standalone hospitals/nursery centers to even large corporate Hospitals during COVID.
- Brownfield expansion to aid hospital segment: Companies under our coverage like APHS, NARH, HCG and ASTERDM had an aggressive investment phase over FY16-18, benefits of that were visible FY20 onwards. Most players are in consolidating phase till FY22. As companies reach to optimal level of utilization, we see companies initiating to fresh level of capex. However, this time companies are in better position to fund new capex and will be aided by internal accruals. Further companies are looking to add additional capacities through brownfield expansion for faster operationalization of beds and relatively lower costs.
- Ancillary business scaling up: Hospital companies are scaling up ancillary business like third party diagnostics, retail pharmacy and digital business for future growth. Scaling up of ancillary businesses and potential spin-offs could be value unlocking opportunity. APHS, FORH and MAXHEALT are best play in this theme with ancillary business contributing ~5-27% to total EBIDTA in FY24E.
- Strong FCF generation; compounding EBITDA: Companies under our coverage have reduced leverage over last 2 years, given low capex intensity and scale up in profitability. Hence we expect them to continue generating strong FCF annually after factoring annual brownfield capex streamlined over next 2-3 years. we expect +48% EBITDA CAGR over FY21-24E and 18% EBITDA CAGR over FY22-24E. Overall RoE are also likely to sustain at +15% for APHS, ASTERDM, KIMS, MAXHEALT and NARH despite capex intensity going up.

| | | Pre IND AS EBI | TDA (Rs mn) | | CAGR (%) | CAGR (%) |
|----------|--------|----------------|-------------|--------|--------------|--------------|
| | FY21 | FY22E | FY23E | FY24E | FY21 to FY24 | FY22 to FY24 |
| APHS | 9,124 | 21,408 | 25,177 | 31,883 | 51.7 | 22.0 |
| ASTERDM | 7,724 | 11,339 | 12,817 | 14,666 | 23.8 | 13.7 |
| FORH | 3,604 | 10,618 | 11,597 | 14,193 | 57.9 | 15.6 |
| HCG | 631 | 1,757 | 2,215 | 2,668 | 61.7 | 23.2 |
| KIMS | 809 | 2,386 | 3,854 | 4,576 | 78.2 | 38.5 |
| MAXHEALT | 5,780 | 13,696 | 14,368 | 17,414 | 44.4 | 12.8 |
| NARH | 1,321 | 5,809 | 7,077 | 8,392 | 85.2 | 20.2 |
| Total | 28,993 | 67,013 | 77,104 | 93,792 | 47.9 | 18.3 |

Listed Hospitals: What We Like and Where To Invest

Apollo Hospitals Enterprise:

APHS has pursued aggressive expansion (25-30% capacity expansion) in past few years and created a strong growth platform. The company's digital foray (2021) makes it a strong omni - channel play whereas strong presence in offline format makes it a formidable player than pure play online companies.

Aster DM Healthcare:

ASTERDM Healthcare has a unique business model with presence in India's growing healthcare industry and an established business with strong returns in GCC. We expect 26% EBITDA CAGR over FY21-24E as margin in its India business gradually improve and new hospitals ramp-up in the GCC.

Fortis Healthcare:

FORH had legacy issues, wherein they had inefficient capital structure. Post IHH entry in FY19, FORH witnessed strong recovery across segments. We expect margins across segments to improve, given increasing volume in diagnostics business and improving product mix in hospital segment along with cost rationalization initiatives. We expect 58% EBITDA CAGR (16% over FY22-24E) over FY21-24E.

HealthCare Global Enterprises:

HCG's asset light approach with focus on partnering has made its business model capital efficient and scalable. The company operates most of its comprehensive cancer center (CCC) on lease/rental basis with HCG investing only in equipment's. HCG is in a consolidation mode and given reducing capex intensity, we expect profitability to improve from FY22. We expect a 62% EBITDA CAGR over FY21- 24E (23% CAGR over FY22-24E) after adjusting for IND AS.

Krishna Institute of Medical Sciences:

KIMS's robust cost control, low capital intensive set-up, value accretive acquisitions have ensured good profitability. EBITDA has grown at 40% CAGR over FY18-22. The recent acquisition of Sunshine is value accretive. This coupled with brownfield and greenfield expansion of +1500 beds over next 3-4 years will enhance capacity by +65%.

Max Healthcare Institute:

MAXHEALT's operational efficiency (EBITDA/bed at 4.5x vs 0.9-2.5x of peers) has been commendable in competitive markets like NCR. Company's EBIDTA growth (61% CAGR over FY20-22) has been phenomenal in past two years. Company's expansion plan (2x bed addition over next 5 years), improving payor mix (reducing low margin institutional mix which is at 31%) and scale up in labs business will aid growth momentum in medium term.

Narayana Hrudayalaya:

NARH's India business got most impacted from COVID due to higher reliance on elective surgeries, international patients and company ethos of not charging much for vaccine and other COVID related revenues.

With strong performance at Cayman, steady pick up in mature India hospitals and ramp-up at new hospitals, we expect EBITDA CAGR of 20% (21% CAGR over FY20-24E) over FY22-24E. This also would lead to superior return ratios at 25% by FY24E.

Operating dynamics-Listed firms have strong platform

Key operating metrics - MAXHEALT, FORH & APHS enjoy higher ARPOB while NARH, KIMS cost/bed is very impressive

| Listed Firms (Q3FY22) | APHS | ASTERDM | FORH | HCG | KIMS | MAXHEALT | NARH |
|---|--------|---------|--------|--------|--------|----------|--------|
| No of hospitals | 44 | 14 | 24 | 25 | 9 | 16 | 20 |
| Operational beds | 7,860 | 2,907 | 3,881 | 1,702 | 2,590 | 3271 | 6,181 |
| Avg revenue per occupied bed (INR /day) | 46,062 | 33,600 | 50,959 | 38,317 | 23,189 | 61,000 | 32,055 |
| Avg length of stay (days) | 4.3 | 3.4 | NA | 2.1 | 4.8 | 4.3 | 4.6 |
| Gross block per bed (Rs in mn) | 10 | 17 | 13 | 7 | 3.5 | 11 | 4.5 |
| Q3 FY22 Occupancy (%) | 66% | 65% | 65% | 55% | 61% | 77% | NA |
| 9MFY22 hospital OPM (%) for India operations- Post IND AS | 23.0% | 16.6% | 16.0% | 16.9% | 31.0% | 26.0% | 11.0% |

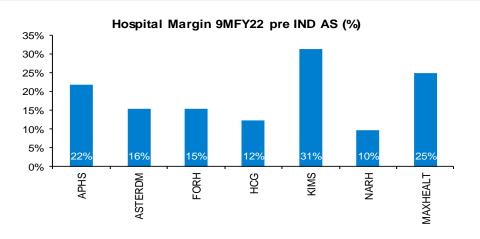

Source: Company, PL Note: APHS ARPOB is net of doctor fees; ASTERDM ARPOB, ALOS and occupancy is only for India operations

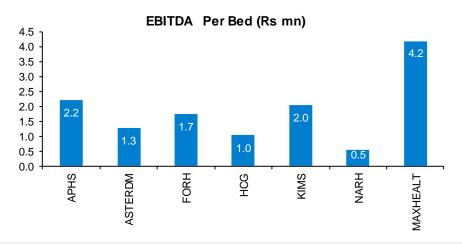

APHS & FORH opting largely for owned while NARH and HCG opting largely for asset light model

| Company | Particulars | Remark |
|----------|---|--|
| APHS | Most properties are owned | Prefers to owned land; 65-70% of hospital assets/land are owned by Apollo |
| ASTERDM | Consists of owned, leased and O&M basis | 13 Hospitals in GCC and 19 hospitals in India |
| FORH | Owned model | Post buy out of stake from RHT- Fortis now owns 100% of land/hospital building . |
| HCG | Only four out of 25 properties is on owned land | The company operates most of its comprehensive cancer center on lease/rental basis with HCG investing only in equipment |
| KIMS | Out of nine properties – 4 are owned, 2 on lease, 1 on O&M and remaining 2 as part owned /part leased | KIMS low capital intensive set up given bed configuration of 200-250 beds/unit in micro markets |
| MAXHEALT | Consists of owned, leased and O&M basis | Network consists of 10 owned/ leased hospitals, four partnered healthcare facilities, two Radiant hospitals on O&M basis |
| NARH | Only four out of 20 properties are on owned land | The current NARH's network cost is at ~ Rs3.6mn/bed. |

Cost comparison- MAXHEALT, KIMS & APHS model is cost efficient

KIMS & MAXHEALT enjoys higher margins while NARH & HCG low margins on account of lower ARPOB and losses from new hospitals

Source: Company, PL Note: NARH & ASTERDM margins are only of India operations while APHS margins is optically higher as doctor fee cost are net off from revenues

Cost structure across hospitals – Better operational efficiency for KIMS, MAXHEALT

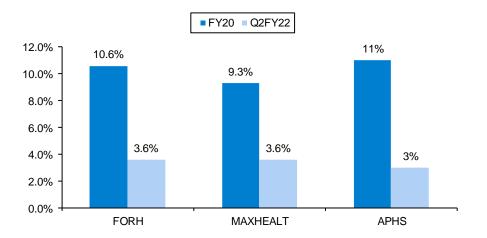

| | С | oGS (% of sale | es) | Emplo | yee cost (% o | f sales) | Other expenses | | | |
|----------|------|----------------|--------|-------|---------------|----------|----------------|------|--------|--|

| NARH | 24 | 26 | 25 | 22 | 24 | 21 | 41 | 42 | 37 | |

Source: Company, PL Note APHS COGS are higher due to pharmacy biz. NARH and ASTERDM expenses factors in Cayman and GCC operations. Other exps includes doctor cost

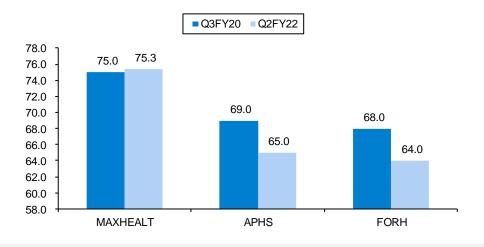

Occupancy, specialty & payor-mix will drive profitability in near term

- Companies like APHS, FORH reported occupancy of 65% in 9MFY22 which is still below pre-covid levels of ~ 70%.
- International patients used to contribute 10-12% of total revenues which is currently at 60-80% below pre-covid levels. As travel normalizes, revenue from international patients should pick up (which is of high margin in nature).
- Further companies like MAXHEALT are also increasing cash & non-institutional payor mix, in order to drive profitability.
- Large tertiary care hospitals in our coverage have relied on case mix to continue improving their ARPOBs. This will continue to aid pricing.

International patient revenue contribution (in %)

Occupancy still below pre-COVID levels for APHS & FORH

Investment Rationale

Secular story: Under penetration market with attractive dynamics

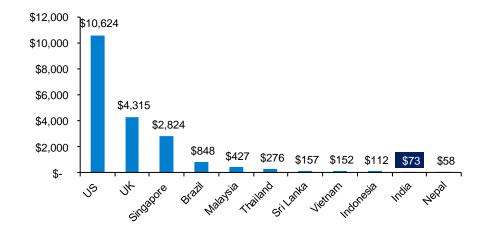

Secular story: Under penetration market with attractive dynamics

- India healthcare industry is poised to grow at a 15-17% CAGR driven by ageing population, burgeoning lifestyle diseases, rising affordability which in turn drives quality healthcare and improved medical insurance penetration. Hospitals are largest component and biggest beneficiaries of the healthcare market (~73%) in India with public spend likely to be limited to ~25-30% of annual healthcare spend.
- Unlike most countries where public spend dominates the industry, India's private sector accounts for 70-75% of healthcare spend; hence new investments will largely be driven by private firms.
- Low public spending and limited penetration of health insurance has led to 'out-of-pocket' expenditure accounting for ~63% of total healthcare which is one of highest in the world and well above global average of 22%.
- Given rising disposable income, we see pricing environment for hospitals to remain healthy
- India healthcare spend is just 3.8% of GDP vs 17% in case of US. This works out to be USD 73 per person annually on health care vs USD 10,600 in case of US.
- India offers significant opportunity for growth of medical tourism. This market is expected to rise at a CAGR of 65- 70% between FY21-25.

Healthcare expenditure (4% of GDP) - A lots of room to catch up

Brownfield expansion to aid hospital segment

Expansion plans across hospital companies

- APHS: Company will continue to explore bolt on acquisitions in markets like NCR and Mumbai where it has limited presence and can also add 1000-2000 beds through brownfield expansion in hospital segment. On pharmacy side, it will continue to add 300-400 net stores annually.
- ASTERDM: Possible restructuring in Saudi hospital and Cayman Island capex plans, as an extension of GCC hospital business. Aster is looking to add 145 beds in Oman by end of FY22. In India 276 beds are planned through brownfield expansion in its Whitefield hospital (Bangalore) by H1FY23 end. Further company will continue with O&M opportunities. It will also look to expand clinics under Aster Lab business.
- FORH: The Company has re-initiated its investment plans for bed expansion in select existing facilities such as Noida, BG Road, Anandapur, Mulund, Shalimar Bagh, FMRI, Mohali and Arcot Road which will see a cumulative addition of ~1,300 beds over FY22-25E
- HCG: No major capex; in phase of consolidation
- MAXHEALT: Planning to expand 2,300 beds (70% of current capacity) over next 5 years at existing location such as Saket complex (Delhi), Nanavati (Mumbai) and Shalimar Bagh. These are brownfield expansion at locations which are already running at optimal occupancy and capacity enhancement will be EBIDTA accretive. Further company has recently added 300 beds in NCR market (Dwarka location) on O&M model which will get commercialized in FY24.
- NARH: Intends to step up investments to upgrade some of existing facilities post COVID environment. Will be exploring bolt on acquisitions / greenfield in markets like Kolkata, Bangalore, MMR.
- **KIMS:** KIMS will be adding 650 beds through brownfield expansion across its Kondapur, Vizag and Anantpur units for total capex of Rs3.8bn over FY21-25E. Further company is looking to add additional 1000-1200 beds through greenfield across Chennai, Bangalore and Maharashtra regions.

Major capex expansion through brownfield

| | Existing operational beds | Expansion plans | Remarks |
|----------|---------------------------------|-----------------|---|
| APHS | 7860 | 2000 | Mgmt guiding for 2000 beds over next 3 years addition across NCR, Mumbai and Bangalore region though brownfield and greenfield expansion |
| ASTERDM | 3828 | 1860 | GCC- 295; India - 1565 bed expansion \over next 3-4 years |
| FORH | 3881 | 1500 | Re-initiated investments plans for bed expansions in (brownfield) facilities such as Shalimar Bagh, Noida, FMRI, Mulund, Mohali and Anandpur over next 3-4 years |
| HCG | 1702 | - | No major capex; in phase of consolidation |
| KIMS | 2590 | 2400 | Sunhsine acquisition to add 600 beds from FY23; 1100bed addition across Chennai, Bangalore, Maharashtra though greenfield while 700 bed addition through brownfield across Kondapur, Anantpur over next 4 years |
| MAXHEALT | 3271 | 3300 | Out of 3300 beds- 2300 bed expansion though brownfield across Saket, Nanavati |
| NARH | 6181 | 200 | 150-200 beds brownfield expansion over next 2 years; Cayman new facility to add 50 beds from FY24 |

Ancillary business scaling up

Ancillary business scaling up

Hospital companies are scaling up ancillary business like third party diagnostics, retail pharmacy and digital business for future growth. Scaling up of these ancillary businesses and potential spin-offs could be a value unlocking opportunity.

- APHS is expected to generate ~28% of EBITDA from non-hospital segment in FY24 i.e. Pharmacy and Retail Health. It is looking to partially stake sale in pharmacy/24x7 digital business for funding growth and creating one of India's largest Omni-channel platform. Further Apollo is also scaling up its third party B2C diagnostics segment which will create significant value, going forward.
- FORH owns 57% stake in SRL- one of top 3 diagnostic chain in India. Company has been expanding aggressively with collection centres to increase its B2C share. Over last few quarters, company growth recovery has been in line with peers.
- MAXHEALT's non captive business Max Labs and Max Homecare witnessed strong traction during COVID-19. We expect the company to generate Rs1bn of EBITDA over next 2-3 years from current level of Rs300mn.

Scaling up of these ancillary businesses and potential spin-offs could be a value unlocking opportunity

| Non hospital EBIDTA (Rs mn) | FY22 | Remarks |
|-----------------------------|-------|---|
| APHS | 3,100 | As losses from 24x7 comes down, we see 68% EBITDA CAGR over FY22-24E across pharmacy + AHLL format. |
| FORH | 4,078 | We see 15% EBITDA CAGR over FY22-24 adj for COVID |
| MAXHEALT | 300 | Scaling up its third party diagnostics and lab business |

Hospital Companies are making huge Digital strides

Apollo Hospital Enterprises

Aster DM Healthcare

Narayana Hrudayalaya

myFortis

Fortis Healthcare

Krishna Institute of Medical Sciences

Hospital Companies are making huge Digital strides

Apollo Hospitals Enterprise:

- Apollo digital healthcare app "Apollo 24/7" agile and digitally connected to the consumer- completes 45,000 deliveries/ day in pharmacy business and carries out 5,000-6,000 daily video / tele consultations
- Best positioned to become the largest digital health platform to with 100 million targeted registered users on Apollo 24/7 in next 5 years.

Aster DM Healthcare:

 Launched OneAster in India connecting all the hospitals in Kerala and Maharashtra to a single patient engagement platform

Fortis Healthcare:

 MyFortis platform customer lifecycle management got fully integrated with other Fortis digital systems

HealthCare Global Enterprises:

 Implemented DISHA-C (Digital Information Systems & Healthcare Analytics – Clinical), an advanced platform for transitioning to Electronic Medical Record (EMR), with an intent of enhancing clinical competence and operational efficiency.

Krishna Institute of Medical Sciences:

- Embarked on a journey of digital transformation across financial, clinical, operational and patient engagement:
- Realize Phase of S4 HANA deeply integrated with Hospital Information System and other core applications
- Digital Clinical Applications have been deployed for nurses and doctors (patients records on mobile)

Max Healthcare Institute:

- Leverage brand, customer loyalty and data to build a digital ecosystem
- Online marketing activities and web-based appointments have increased the digital revenues i.e. ~11% of overall revenue along with ~20000 video consults,
- Strengthened and developed remote monitoring capabilities, particularly during lockdown, in Tri-city

Narayana Hrudayalaya:

- Integrated doctor's mobile app with ICU monitors for real-time remote patient assessment
- Implemented machine learning-based diagnosis for X Ray for smart technology-based assessment
- Launched a pilot project ie "Enhanced Doctor's Bay Management System for OP patient queue management

Key risk to our call

- Venturing into new geography: While we are positive on the companies strategy to venture into newer and challenging geographies as it seeks to reduce dominance of its existing footprints in the business mix, we believe it will test companies project execution and operational management capabilities. Listed firms' ability to successfully manage this geographical expansion will be a key metric to track.
- Resource availability poses operational and financial risk: India produces 35,000 doctors on an average each year, but the number of super specialists is well below. The hospital network includes several multi-specialty and super-specialty centers, which require highly skilled human resources. A strong brand equity has enabled listed firms to attract good doctors. However, getting super-specialist doctors for newer super-specialty units would be a challenge, given scarcity of highly qualified talent. Given the nature of service offerings, we see that as a key operational and financial risk (higher employee cost) for companies under our coverage universe.
- Ability to successfully manage increased scale: Companies are likely to witness significant increase in scale over the next couple of years as it ramps up new hospitals. The scale will come with its own challenges. Management's ability to successfully manage it will be critical to facilitate the next growth phase.

Valuation Summary- Only Hospitals

| | EV20 | EV24 | EV22E | EV22E | FY24E |

Companies

Apollo Hospitals Enterprise

Rating: BUY | CMP: Rs4,918 | TP: Rs5,772 | Mcap: Rs707.1bn

We initiate coverage on Apollo hospital (APHS) with BUY rating at TP of Rs 5772 (SOTP based) as 1) the pursued expansion plan in hospital segment and 2) presence across healthcare delivery chain makes APHS an formidable player in the industry.

Largest healthcare provider: APHS is Asia's largest healthcare group in India with ~7,650 operational beds. With 44 owned hospitals and focus on clinical outcomes, It is a formidable brand in the Indian healthcare space. Further Apollo Pharmacy (SAP) is by far the largest organized pharmacy chain in India with 4,300 stores on Pan-India basis.

One of best omni-channel play: Apollo 24/7 will combine strengths of Apollo Group's offline healthcare leadership with new-age digital offerings that will address all its healthcare consumer needs. Company intends to cover more pin-codes and faster order delivery (currently within 2 hours). We expect Apollo Health Co (offline+online) to register \$1.1bn of revenues in FY24 of which 24x7 app will contribute ~\$150mn from ~\$40-50mn in FY22.

Scale up in B2C diagnostic segment: Though APHS is late entrant in diagnostic business, but has outlined extremely aggressive targets for the business – Rs10bn revenues in 3 years vs Rs4bn in FY22. Digital platform is expected to play a key role in this growth.

Multiple growth levers in place: APHS will continue to explore bolt-on acquisitions in markets like NCR and Mumbai where it has limited presence and can also add 1000-2000 beds through brownfield expansion in hospital segment. Further its digital health space foray will help APHS to cross sell its services to a larger population. Overall we expect 21% EBITDA CAGR over FY22-24E.

Outlook and Valuation

- APHS's strong performance in past has been broad based. Company has pursued aggressive expansion in past few years which has created a strong growth platform. APHS digital foray makes it a strong omni channel play and given strong presence in offline format makes the company more formidable player than pure play online companies. We estimate 24% revenue CAGR and 44% EBITDA CAGR over FY21-24E and 590bp margin expansion over FY21-24E.
- We value APHS on an SOTP basis. We ascribe 22x EV/EBITDA multiple to the hospital segment, 35x EV/EBITDA to offline pharmacy and 30x EV/EBITDA to AHLL. We also ascribe EV/Sales multiple of 3x to the 24/7 business and arrive at a price target of Rs5,772, an upside of 19% from the current levels. Recommend BUY rating.

Key Risk:

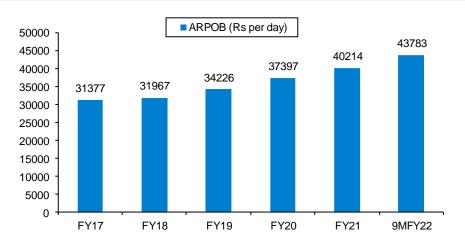

- Delay in break-even of 24x7 operations.
- Any major greenfield capex/inorganic expansion in hospital segment dragging profitability in near term.

Increasing private label contribution to aid margins

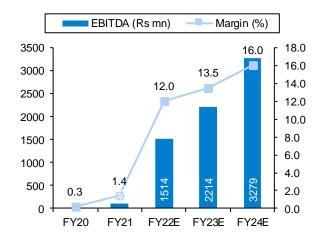

AHLL – Profitable times ahead

- APHS has made investments in retail healthcare through its subsidiary- Apollo Health and Lifestyle, or AHLL to leverage the strong Apollo brand. AHLL is
 engaged in retail healthcare business encompassing primary and secondary health clinics, diagnostic labs, birthing centres, dental & dialysis centres, day
 surgery centres and sugar clinics.
- AHLL has shown strong revenue CAGR over 33% CAGR over FY19-22 aided by better utilization across diagnostic and spectra business.
- We expect AHLL to be one of the strongest diagnostic players in South and further strengthen its presence in East and North within the next 24 months. Expect 25-30% CAGR in diagnostic revenues over FY22-25E
- Overall we expect 47% revenue CAGR over FY21-24E with OPM of 16% in FY24 vs 1.4% in FY21.

Key Financials

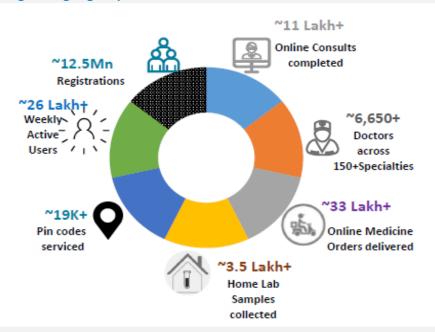

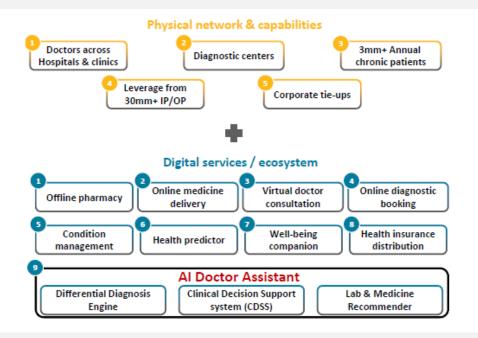

| AHLL 9MF22 Revenue break-up | (Rs mn) |
|-----------------------------|---------|
| Diagnostics | 2,818 |
| Primary Care | 2,687 |
| Specialty Care | 2,758 |
| AHLL (Consol) | 7,941 |

Transformational Value Unlocking (Apollo 24/7)

- Apollo 24/7 will combine strengths of Apollo Group's offline healthcare leadership with Apollo group's new-age digital offerings, that will address all its
 healthcare consumer needs.
- Currently Apollo 24/7 app has 12m registered users and intends to achieve 80-100m registered users in next 5 years. Apollo cost of acquisition is less than Rs 150/user (which is currently lower than some of its peers) and intends to cover more pin-codes and faster order delivery (currently within 2 hours).
- Company is looking for strategic partnership in Apollo Healthco (offline+online) which will add significant value. We have valued Apollo Healthco at USD3.2bn.
 Recent partnership with Amazon will improve hyper local availability which is now at 97% at Apollo end, expected to reach at 99% with Amazon.
- We expect 24/7 online pharmacy revenues to reach to \$200mn by FY24 from ~\$40-50mn in FY22 and EBITDA break even by FY25E

Creating strong digital platform

Aster DM Healthcare

Rating: BUY | CMP: Rs167 | TP: Rs234 | Mcap: Rs83.0bn

We are initiating coverage on Aster DM Healthcare (ASTERDM) with BUY rating and TP of Rs 234. We believe that increasing contribution from high growing India business and established GCC business offers unique business model.

Leading player in GCC: ASTERDM is one of the leading healthcare providers in Gulf Cooperation Region (GCC) with 921 operating beds, 233 pharmacies and 118 clinics as of Dec 2021. GCC revenues were impacted due to COVID led disruptions in FY21, however it has now normalized and should see pick up from H2FY22. Mandatory insurance and increasing medical tourism augurs well for GCC business.

Increasing India footprints: The company has 14 hospitals in India with 2,907 operational beds, mostly in South India, of which 946 beds were commissioned over last 4-5 years. India hospitals profitability witnessed sharp jump in 9MFY22 aided by better occupancy and higher ARPOB. We expect EBITDA CAGR of 25% over FY21-24E as benefits of operating leverage kicks in.

Capital allocation is key: ASTERDM has managed to reduce debt by Rs10bn over last 12 month, given no major capex expansion. Net debt to EBITDA has come from 2.9x in FY20 to 1.7x in FY22. Possible restructuring in Saudi hospital viability testing and revisiting of Cayman Island plans is key monitorable in the near future. In case the company intends to go ahead with Cayman unit expansion on its own, it can drag profitability.

New growth avenues: ASTERDM is foraying into diagnostics (in India), home-care (in UAE) and tele-health creates new avenues for growth over medium to long term. Further ASTERDM has also undertaken strong cost-rationalization initiatives and guided for partial sustainability of costs reduction in FY22.

Outlook and Valuation

ASTERDM has a unique business model with presence in India's growing healthcare industry and an established business with strong returns in GCC. We expect 25% EBITDA CAGR over FY21-24E, as margin in its India business gradually improves and new hospitals ramp-up in GCC. At current market price, the stock trades at an attractive valuation of 7.5x FY24E EV/EBITDA, which is at 25-50% discount to Indian peers. We believe such high discount reflects ASTERDM's lower contribution from India region and higher capital outlay outside India region. Such steep discount is unwarranted given stable profit trajectory going forward and reduction in leverage. We recommend Buy with TP of Rs234/share based on 15x FY24E EV/EBITDA to India business and 7x EV/EBITDA to GCC business.

Key risk

- Higher capital allocation to Cayman Island unit
- Heavy reliance on the GCC region (80% of sales).
- Any economic slowdown and change in regulations can impact profitability.

India hospitals segment-Increasing contribution

- ASTERDM has increased operating beds from 917 in FY14 to 2,907 in FY22, with installed bed capacity of 3,900. The company started its India operations in FY08 with Aster Aadhar Hospital at Kolhapur in Maharashtra. It currently has 14 hospitals, predominantly in South India.
- With over 400 beds to be operationalized in India by FY23, ASTERDM's India vision now envisages around 40-50% Revenue/ EBITDA contribution over the medium term by investing Rs3bn+ annually in various brownfield/ greenfield projects.
- India business grew +51% YoY in revenue and 120% YoY in EBITDA for 9MFY22 on the back of strong recovery in mature units. This was aided by higher ARPOB and better utilization levels.
- Overall we expect Revenue CAGR 21% for FY21-FY24E and EBITDA CAGR of 43% for FY21-FY24E.

Fortis Healthcare

Rating: BUY | CMP: Rs285 | TP: Rs362 | Mcap: Rs199.7bn

We are initiating coverage on Fortis Healthcare (FORH) with BUY rating and TP of Rs 362. We expect margins across segments to improve, given increasing volume in diagnostics business and improving product mix in hospital segment along with cost rationalization initiatives. We expect 58% EBITDA CAGR over FY21-24E

New leadership at helm: With new management on board, IHH (Malaysian company) has made significant changes in company's operations. Company has roped in Ashutosh Raghuvanshi as CEO who has over 35 years of healthcare experience (earlier CEO of Narayana Hrudayalaya Ltd). They also roped in Mr K Anand as SRL CEO who has great depth of understanding in running partner model in diagnostic segment.

Brownfield expansion to aid hospital growth: The Company has reinitiated its investment plans for bed expansion in select existing facilities such as Noida, BG Road, Anandapur, Mulund, Shalimar Bagh, FMRI, Mohali and Arcot Road which will see a cumulative addition of ~1,500 beds over FY22-26E. The bed additions will largely be brownfield expansion which will allow faster operationalization and relatively lower startup costs. This will enhance bed capacity by 30%.

Network expansion and B2C focus to drive growth in diagnostic business: The B2C:B2B revenue mix has significantly strengthened to 52:48 in 9MFY22 (FY21 at 45:55) aided by increasing collection center and DDRC-SRL JV acquisition in FY21. Company intends to double its collection center (currently at 2,232) over next 2-3 years and increase B2C focus. We expect growth diagnostic business to improve in line with peers in next 3-4 quarters.

Margin expansion across segments: FORH margins have lagged peers given legacy issues. As asset utilization further improves across segments along with likely reduction in certain overheads like legal cost, we see hospital margins at 20% and diagnostic margins at 26% by FY24E. Overall we expect EBIDTA margin to expand by 180bps from 18.5% in FY22 to 20.2% in FY24.

Outlook and Valuation

- FORH had legacy issues, wherein they had inefficient capital structure of paying service fee to RHT till FY19. IHH had bought-out assets from RHT at market value in FY19. Resultant return ratios look depressed given creation of goodwill. Adjusted for goodwill, RoCE is at 14% in FY22.
- FORH has witnessed strong recovery across segments for past few quarters. We expect margins across segments to improve, given increasing volume in diagnostics business and improving product mix in hospital segment along with cost rationalization initiatives. We expect 58% EBITDA CAGR (20% over FY22-24E) over FY21-24E. At CMP, stock is trading at 18x EV/EBITDA on FY24E adjusted for SRL stake and rental. We Recommend Buy rating with TP of INR 362/share. We value diagnostics at 25x FY24E EV/EBITDA and hospitals at 20x FY24E EV/EBITDA. Resolution of legal issues would be a key additional trigger for re-rating.

Key risk

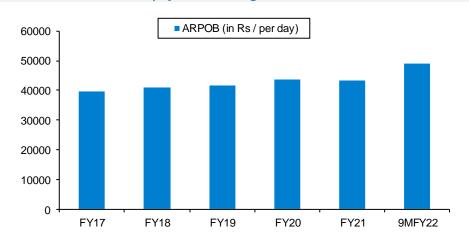

- Any adverse impact of ongoing legal issues.
- Delay in network and brownfield expansion across diagnostic and hospital segment.

Hospital segment – Improving occupancy and margin expansion to drive earnings

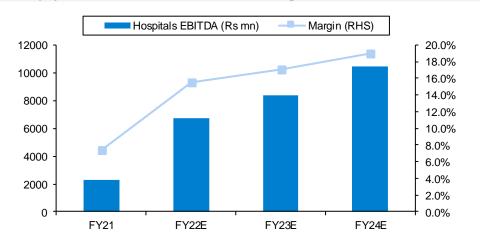

- Company enjoys occupancy at 65% currently. As non COIVD business normalizes along with medical tourism, expect occupancy to inch up to 68-70%. Further ARPOB also will sustain at Rs16-18mn.
- Company intends to add 1500 beds over next 4 years. The bed additions will largely be brownfield expansion which will allow faster operationalization of beds and relatively lower startup costs. This will enhance bed capacity by 30%.
- Hospital business has seen margin recovery from 12% in FY20 to 16.7% in 9MFY22 aided by higher ARPOB, better payor mix and cost controls. Despite this improvement, company OPM in hospital still lags peers. We believe given several cost control levers to drive current 16-17% OPM to 20% margins over next 2 years aided by more profitable payer mix, there is restructuring of underperforming assets and higher ARPOB.
- Overall we expect 10% revenue CAGR and 25% EBITDA CAGR over FY22-24E

HealthCare Global Enterprises

Rating: BUY | CMP: Rs238 | TP: Rs316 | Mcap: Rs29.8bn

We are initiating coverage on Healthcare Global Enterprises (HCG) with BUY rating and TP of Rs316. HCG is in a consolidation mode and given its reducing capex intensity, we expect profitability to improve from FY22.

Focused player: HCG business model is to provide specialty healthcare with focus on oncology and fertility incidences in India. Given that company offers one-stop solution at competitive prices makes it differentiated and scalable business model. Further company's experienced management, high- quality board and pan- India focus enhances our comfort on its long term business outlook.

Ramp-up in new centers hold key: HCG's 40% of operational beds have been commercialized over FY17- 20. Some new centers are dragging overall EBITDA and profitability as they are in ramp-up phase. Currently, the company reported INR 160mn of EBITDA loss from new centers in FY21 and has also achieved break even in H1FY22. This should start to contribute in a meaningful way over FY22-24.

Equity infusion by CVC capital was positive: In May 2020, HCG issued shares worth Rs6.5bn to Aceso Company, an investment arm of US based PE fund CVC Capital for total worth of Rs6.5bn. With this transaction, Aceso Company has become the largest shareholder with 56.7% stake. This has helped company to reduce high leverage risk. Further strategic investment by CVC will bring in more operational and financial efficiency.

Expect 39% EBITDA CAGR over FY21-24E: We estimate strong 39% EBIDTA CAGR aided by steady growth in Centre of Excellence (Bengaluru), scale up in existing centres and reduction of losses from new centres.

Outlook and Valuation

- HCG's asset light approach with focus on partnering has made its business model capital efficient and scalable. The company operates most of its comprehensive cancer centre (CCC) on lease/rental basis with HCG investing only in equipments. Out of 25 HCG's CCC, only four are on owned land.
- HCG is in a consolidation mode and given reducing capex intensity, we expect profitability to improve from FY22. We expect a 39% EBITDA CAGR over FY21- 24E after adjusting for IND AS. At the CMP, the stock trades at ~15x FY24E EV/EBITDA. We recommend Buy with a TP of Rs316 on 16x FY24E EV/EBITDA.

Key risk

- Delay in break-even of new cancer centres
- Retaining partnerships across its existing cancer units

Existing cancer centres - Steady OPM at +20%

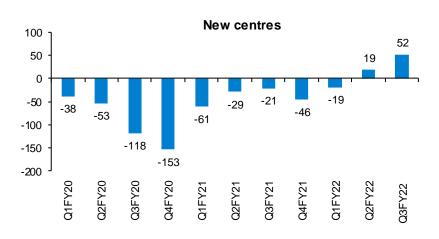

Source: Company, PL

Revenue - New centres ramping up well

Source: Company, PL

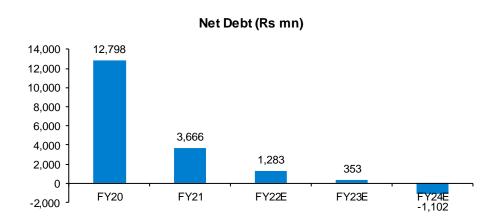

New centres EBITDA - Reducing losses since last 2 quarters

Strong cash flow generation

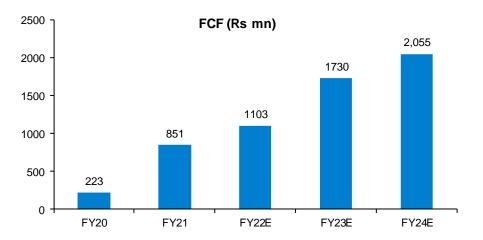

- Commercialization of operational beds and addition of new centers led to higher debts in FY19-FY20,
- The capital infusion in May'20 by US based PE fund has helped to reduce high leverage risk and bought more operational and financial efficiency in business.
- We expect further reduction in net debt going ahead.

Reduction of net debt via capita infusion in FY21 & healthy cash-flows

Krishna Institute of Medical Sciences

Rating: BUY | CMP: Rs1,300 | TP: Rs1,638 | Mcap: Rs104.0bn

We are initiating coverage on KIMS with BUY rating and TP of Rs 1638. We believe that the recent acquisition of Sunshine as well as planned brownfield and greenfield expansion of +1500 beds over next 3-4 years will continue to aid growth momentum.

Strong regional leader in Andhra Pradesh & Telangana: KIMS is one of largest corporate healthcare groups in Andhra Pradesh and Telangana with strong brand equity. Currently, company operates nine multi-specialty hospitals in AP and Telangana region with 2,600 operational beds as of Dec 2021 which is 2x times more beds than the second largest provider in AP and Telangana.

Enjoys superior margins: KIMS enjoys healthy operating margins of +30% (highest among peers). KIMS robust cost control, low capital intensive set-up, value accretive acquisitions have ensured good profitability even in the affordable offering set-up and translates to higher likelihood of replicating success at newer locations.

Capacity addition of 1600-1800 beds over next 3-4 years: KIMS will be adding 650 beds through brownfield expansion across its Kondapur, Vizag and Anantpur units for total capex of Rs3.8bn over FY21-25E. Further company is looking to add additional 1000-1200 beds through greenfield across Chennai, Bangalore and Maharashtra regions. In some of its adjacent markets like Bangalore and Chennai, KIMS already attracts patients through its regional connect. This will help to drive growth in such markets.

Acquisition of Sunshine Hospitals is positive: KIMS has acquired a majority stake of 51.07% in Sunshine Hospitals (600 bed capacity) at a total EV of Rs 7.3bn, at 9.7x FY21 EV/EBITDA. Sunshine's current occupancy stands at 40% and KIMS expects to improve over next 2-3 years after adding more specialties. Further there will be synergies in consumables procurement and HR cost. This along with scale up in occupancy should drive margins.

Outlook and Valuation

KIMS robust cost control, low capital intensive set-up, value accretive acquisitions have ensured good profitability. EBITDA has grown at 40% CAGR over FY18-22. The recent acquisition of Sunshine is value accretive. This coupled with brownfield and greenfield expansion of +1500 beds over next 3-4 years will continue to aid growth momentum. We expect 24% EBIDTA CAGR over FY21-24E with best in class return ratios at 22%/32% RoE/RoCE. At CMP, stock is trading at attractive valuations 16x EV/EBITDA (adj for IND AS) and 27x P/E on FY24E. We recommend Buy with TP of Rs1638/share based on 20x FY24E EV/EBITDA on KIMS hospital and 15x EV/EBITDA on Sunshine.

Key risk

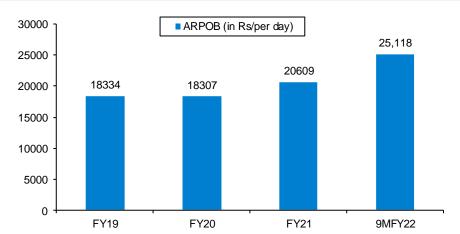

- Company is exploring greenfield expansion in Chennai, Bangalore and Maharsthtra. These are newer markets of KIMS and may take longer time for break even.
- Higher dependency to revenues from Hyderabad units. Any impact on this
 2 units can impact profitability.

Specialty Mix (9MFY22)- Transplant biz gaining momentum

Strong regional leader in Telangana

- KIMS Secunderabad is one of the largest private hospitals in India at a single location with ~1,000 beds capacity.
- KIMS' flagship of Secunderabad and Kondapur hospitals together accounted for ~64% and ~74% of the company's overall revenue and EBITDA in FY21
- Recently KIMS added high-end specialties such as heart & lung transplant at its flagship unit Secunderabad which is aiding margin improvement.
- Current EBITDA margins of +35% across its Secunderabad and Kondapur unit is sustainable.

Operating metrics - Mature & Acquired Hospitals in Andhra Pradesh region

- New Clinical specialties of Oncology, Vascular Surgeries and Mother & Child are planned in Ongole, Vizag and Anantapur. Addition of Beds and better
 occupancy are also planned in these units.
- ARPOB and ARPP of Acquired assets have enough headroom to grow to the same levels of Mature Assets.
- Further reduction of ALOS in acquired assets is possible, as we continue to optimize costs in these units.
- EBIDTA Margin of acquired assets has potential to reach at the same levels of Mature assets.

Healthy margins across units of Andhra Pradesh region

Capex plan – Adding 2x capacities over next 5 years

- Sunshine acquisition to add 600 beds from FY23. These 600 beds are spread across 3 units -Secunderabad, Gachibowli & Karimnagar
- Company intends to add 1100 new beds across Chennai, Bangalore, Maharashtra though greenfield; has already acquired land in Chennai and process of acquiring asset /land in Bangalore and Maharashtra.
- KIMS already has certain regional connect within few of these markets and already attracts patients from adjacent geographies to its existing hospitals.
- 700 bed addition through brownfield across Kondapur, Anantpur and Vizag over next 4 years. Major bed addition at Kondapur region, which is already running at optimum utilization and enjoys +35% OPM.

Region-wise expansion and capex plans

| Units | Current Beds | Incremental Beds | New Departments | Approx. Capex (Rs mn) | Approx. Timeline (Starting April 2021) |
|-------------------------|--------------|---------------------|--------------------------------|-----------------------|---|
| Kondapur | 200 | 500 | All Specialities | 3000 | 36-42 months |
| Vizag | 434 | 50 | Cancer Centre | 150-200 | 24 months |
| Anantapur | 250 | 150 | Cancer Centre / Mother & Child | 500-600 | 36-48 months |
| Ongole | 350 | - | Cancer Centre | 150-200 | 36-42 months |
| Bangalore | - | 350-400 | All Specialities | 3000-3300 | 36 months |
| Chennai | - | 350-400 | All Specialities | 4000 | 36 months |
| Western / Central India | - | 250-300 | All Specialities | 3000 | 24-36 months |

Sunshine acquisition- Value accretive

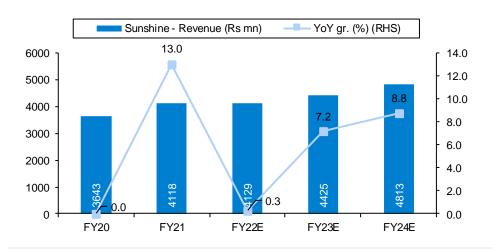

- Current occupancy level of 40% is an opportunity to scale by adding new clinical specialties and strengthening existing ones.
- Opportunity to scale EBITDA margin by enhancing revenue.
- Opportunity to optimize on consumables costs, HR cost and integrate with KIMS.

Max Healthcare Institute

Rating: BUY | CMP: Rs370 | TP: Rs427 | Mcap: Rs358.4bn

We are initiating coverage on Max Healthcare (MAXHEALT) with BUY rating and TP of Rs427. MAXHEAT's operational efficiency has been commendable in competitive markets like NCR with phenomenal growth in past two years. We believe company's expansion plan, improving payor mix and scale up in labs business will aid its growth momentum.

Brownfield expansion by ~2x over next 5 years: MAXHEALT is planning to expand 1,800 beds (65% of current capacity) over next 5 years at existing location such as Saket complex (Delhi), Nanavati (Mumbai) and Shalimar Bagh. These brownfield expansions at locations which are already running at optimal occupancy will be EBIDTA accretive from year one itself. Further company has recently acquired 300 beds in NCR market (Dwarka location) on O&M model which will get commissioned in FY24.

Best operating metrics among peers: MAXHEALT enjoys ARPOB of Rs55k/day, which is 10-40% higher than APHS, FORH and NARH given its more city centric locations. Further company enjoys occupancy at +75% vs 65% among peers. This allows them to enjoy higher operating leverage and OPM of +25% despite 20% of payee mix from institutional segment.

Strong track record of successful M&A and turnaround: MAXHEALT has strong management team at helm lead by Mr. Abhay Soi (turnaround specialist). Post-merger of Radiant with erstwhile Max, it has completely turnaround business from EBITDA of Rs3.5bn in FY19 to Rs14bn in FY22E, 1,650 bps margin expansion. We believe company under leadership of Mr Abhay Soi could continue to extend growth momentum though combination of brownfield expansion, inorganic opportunities and improving payor mix.

Strong FCF generation: MAXHEALT net debt stands at Rs 2.9bn vs Rs21bn as of FY20 end. Sharp reduction of debt was aided by strong FCF generation and Rs12bn of equity issuance in FY21. We expect company to generate Rs5-6bn of FCF annually after factoring Rs7.5bn of annual capex to fund brownfield capex.

Outlook and Valuation

- MAXHEALT operational efficiency has been commendable in competitive markets like NCR. Company's growth has been phenomenal in past two years. Given company's expansion plan, improving payor mix and scale up in labs, business will aid growth momentum in medium term.
- We expect 42% EBITDA CAGR over FY21-24E. FY22 had one-time contribution from vaccine and COVID revs. Resultant we expect moderate EBITDA growth in FY23E. We value Max on an SOTP basis. We ascribe 22x EV/EBITDA multiple to the hospital segment and 30x EV/EBITDA to lab business to arrive at a price target of Rs427, marking an upside of 15% from current levels. Recommend BUY rating.

Key risk

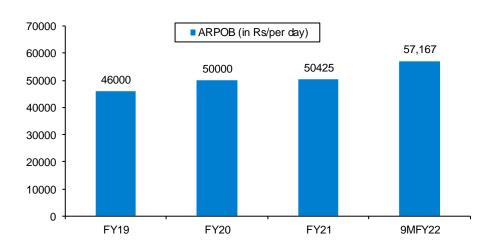

- Delay in new capacity addition
- Change in agreement with partnered healthcare facilities/trusts which is not in favor of MAXHEALT

Scaling up third party diagnostic and home lab business

- Max Labs and Max Homecare witnessed strong traction during COVID-19.
- Added 230+ collection centers in 9M'22 with total count of partner network (collection and PUPs) at 493.
- Max Labs business operates in 20 cities, mainly in north Indian states of Delhi NCR, Uttarakhand, and Punjab which offers 1,900+ test portfolio.
- As on Dec'21, company had 18 owned and more than 265 partner-run collection centers with 210 pick-up points and 25 hospital based labs.

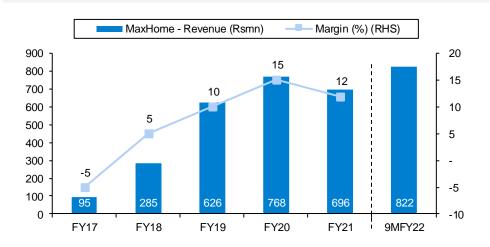

- MaxHome is a non-captive business vertical of Max Healthcare, offering more than 12 services including COVID-care at home.
- MaxHome aims to explore new service lines and extend existing offerings such as dental at home, chemotherapy at home, dialysis at home, etc.
- Company plans to build new collection centers and is partnering with local collection centers for sample collection.
- MaxHome also plans to technologically enable and automate existing customer acquisition channels to directly place home care request through online medium.

Narayana Hrudayalaya

Rating: BUY | CMP: Rs668 | TP: Rs774 | Mcap: Rs136.5bn

We are initiating coverage on Narayana Hrudayalaya (NARH) with BUY rating and TP of Rs773. We expect EBITDA CAGR of 19% over FY22-24E with strong performance at Cayman, steady pick up in mature India hospitals and ramp-up of new hospitals.

Steady pick up in flagship hospitals: NARH's 3 flagship Hospitals (~2,100 operational beds) witnessed temporary blip in FY21/H1FY22, due to COVID-induced disruption given heavy reliance on elective surgeries and international patients. We expect recovery and normalcy in profitability from FY23 onwards. As business normalizes, we estimate mid-high single digit revenue growth with higher EBITDA growth across flagship units.

Brownfield investments to improve mix in India business: NARH intends to step up investments to upgrade some of existing facilities in post COVID environment. NARH will take benefit of recent RBI policy by borrowing at attractive rates of ~5%. The objective is to increase high end complex procedures across network which will improve overall ARPOB. Further other mature hospitals are scaling up and gaining market share.

New hospitals to achieve breakeven in FY23, EBIDTA positive in FY24: Losses at three new hospitals in India were at Rs 424mn in FY21 and Rs 85mn in 9MFY22 (sharp loss reduction led by COVID led benefits across NCR). Losses may increase in Q4 as COVID normalizes. The Dharamshila unit (Delhi) has already turned EBITDA positive. We expect Gurgaon unit to be EBIDTA positive from FY23 while SRCC Mumbai will take time. We estimate zero EBITDA in FY23E and Rs250mn EBITDA in FY24.

Cayman profitability to sustain: Cayman operations, on account of increased domestic patients flow to the facility due to overseas travel restrictions, continued its strong run with FY21 EBITDA growing at a YoY 73.6% to USD 26.2mn. This momentum continued in 9MFY22 with EBITDA of USD 29mn. NARH focused more on primary and secondary healthcare offerings during COVID environment which has worked well. We expect current profitability to sustain and expect higher growth from FY24 given expansion program through a new set-up at the Cayman Islands city center, which will offer full-fledged oncology and outpatient services.

| | Dividend Yield (%) | - | 0.2 | 0.2 | 0.2 |

Outlook and Valuation

- NARH India business got impacted most under COVID due to higher reliance on elective surgeries, international patients and company ethos of not charging much for vaccine and other COVID related revenues. Despite NARH's aggressive expansion over next 2 years aided by new Cayman unit, we expect net debt at comfortable levels and turn net cash by FY24E.
- With strong performance at Cayman, steady pick up in mature India hospitals and ramp-up at new hospitals, we expect EBITDA CAGR of 19% (21% CAGR over FY20-24E) over FY22-24E. This also would lead to superior return ratios at 25% by FY24E. At CMP, stock is trading at attractive valuations 20x EV/EBITDA (adj for IND AS) to India biz. and 16x EV/EBITDA to Cayman biz. on FY24E. We recommend Buy with TP of Rs773/share based on 20x FY24E EV/EBITDA.

Key risk

- Delay in break-even in new hospitals
- Increased competition in Cayman unit.
- Ability to expand at similar historical low cost structure

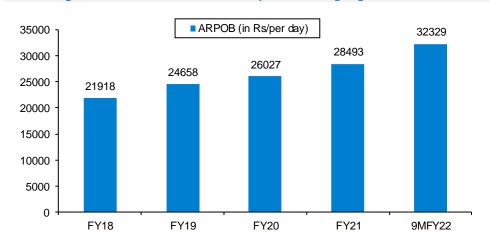

Valuation Summary

| Particular | FY24 |
|--|---------|
| Target EV/EBIDTA multiple (India) (x) | 20 |
| Target EV/EBIDTA multiple (Cayman) (x) | 16 |

Cayman profitability to sustain

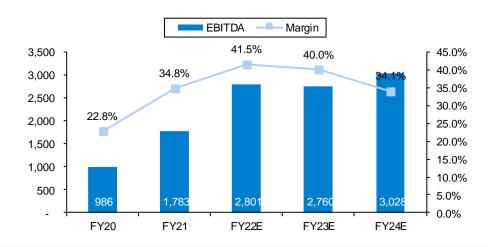

- Cayman profitability has seen sharp jump in FY21 with 74% YoY growth (USD terms) in EBIDTA. Wealthy patients, who usually go to the US, have visited NARH facilities during COVID due to lockdown and travel restrictions there. This has resulted in rise in high-end procedures, aiding in Cayman profitability.
- Company has opened standalone 3-4 primary clinics in Cayman which has also increased patient footfalls specially for some of OPD services.
- Company will be setting up new unit which will be close to city center guided for USD80-100mn capex. The new facility should contribute meaningfully from FY24 onwards which will enhance Cayman profitability.
- Currently 85-90% of revenues across its existing unit comes from domestic population. Given unit offers quality services at prices which is 20-25% discount to some of neighboring island. Once new unit becomes operational, company will be in better position to attract medical tourism.
- Overall we expect 15% revenue CAGR growth over FY22-24E from Cayman, aided by commissioning of its radiotherapy center by end of FY23. We expect current 40% margins to sustain at existing unit.

Cayman revenue expansion on high-Networth patients & reimbursements

Source: Company, PL

Cayman - New Unit to increase EBIDTA but impact margins from FY24

Segmental break up

- We expect steady growth in flagship hospital
- Losses from new hospital should come off as NCR units scale up
- Expect margin improvement in other mature hospitals as revenue scale up

Key business segments

| Revenue (Rs mn) | FY18 | FY19 | FY20 | FY21 | FY22E | FY23E | FY24E |
